CONTENTS

NUMBER 1, JANUARY 1974

Secretion of unconjugated androgens and estrogens by the normal and abnormal human testis before and after human chorionic gonadotropin. *R. L. Weinstein, R. P. Kelch, M. R. Jenner, S. L. Kaplan, and M. M. Grumbach* 1

Antibiotic levels in pericardial fluid. *James S. Tan, John C. Holmes, Noble O. Fowler, George T. Manitsas, and John P. Phair* 7

Hemolytic plaque formation by leukocytes in vitro. Control by vasoactive hormones. *Kenneth L. Melmon, Henry R. Bourne, Yacob Weinstein, G. M. Shearer, Jerrold Kram, and Sara Bauminger* .. 13

Separation of specific antibody-forming mouse cells by their adherence to insolubilized endogenous hormones. *Kenneth L. Melmon, Yacob Weinstein, G. M. Shearer, Henry R. Bourne, and Sara Bauminger* 22

Mechanisms of immune lysis of the red cells in hereditary erythroblastic multinuclearity with a positive acidified serum test and paroxysmal nocturnal hemoglobinuria. *Wendell F. Rosse, Gerald L. Logue, Judith Adams, and John H. Crookston* 31

The rapid changes of hepatic glycolytic enzymes and fructose-1,6-diphosphatase activities after intravenous glucagon in humans. *H. L. Greene, O. D. Taunton, F. B. Stifel, and R. H. Herman* 44

Bone crystal maturation in renal osteodystrophy in humans. *James M. Burnell, Elizabeth Teubner, Jon E. Wergedal, and Donald J. Sherrard* 52

Enzymatically inactive red cell carbonic anhydrase B in a family with renal tubular acidosis. *Emmanuel Shapira, Yoav Ben-Yoseph, Fabien G. Eyal, and Alexander Russell* 59

Effects of weight reduction on obesity. Studies of lipid and carbohydrate metabolism in normal and hyperlipoproteinemic subjects. *Jerrold Olefsky, Gerald M. Reaven, and John W. Farquhar* 64

Glomerular complement components in human glomerulonephritis. *Pierre J. Verroust, Curtis B. Wilson, Neil R. Cooper, Thomas S. Edgington, and Frank J. Dixon* 77

Quantitative aspects of pinocytosis and the intracellular fate of *N*-acetyl-α-D-glucosaminidase in Sanfilippo B fibroblasts. *K. von Figura and H. Kresse* 85

Studies of human adipose tissue in culture III. Influence of insulin and medium glucose concentration on cellular metabolism. *Ulf Smith* 91

Impaired lymphocyte function in aged humans. *Marc E. Weksler and Thomas H. Hütteroth* 99

Dynamics of glomerular ultrafiltration in the rat. V. Response to ischemic injury. *Terrance M. Daugharty, Iris F. Ueki, Paul F. Mercer, and Barry M. Brenner* 105

Regulation of renal cortex ammoniagenesis. I. Stimulation of renal cortex ammoniagenesis in vitro by plasma isolated from acutely acidotic rats. *George A. O. Alleyne and Anne Roobol* 117

Effects of acetazolamide on the urinary excretion of cyclic AMP and on the activity of renal adenyl cyclase. *Hector J. Rodriguez, John Walls, Jesse Yates, and Saulo Klahr* 122

Phagocytic and bactericidal properties of normal human monocytes. *Roy T. Steigbigel, Lewis H. Lambert, Jr., and Jack S. Remington* 131

Micropuncture studies of phosphate transport in the proximal tubule of the dog. The relationship to sodium reabsorption. *Sung-Feng Wen* 143

Physicochemical and biological properties of human and canine plasmins. *Y. Takeda and M. Nakabayashi* 154

Plasma clearance rates and renal clearance of ^{3}H-labeled cyclic AMP and ^{3}H-labeled cyclic GMP in the dog. *Lawrence Blonde, Robert E. Wehmann, and Alton L. Steiner* 163

Sources of cyclic nucleotides in plasma. *Robert E. Wehmann, Lawrence Blonde, and Alton L. Steiner* .. 173

T and B lymphocytes in peripheral blood and tissue lesions in Sjögren's syndrome. *Norman Talal, Robert A. Sylvester, Troy E. Daniels, John S. Greenspan, and Ralph C. Williams, Jr.* 180

Effects of glucagon on lipolysis and ketogenesis in normal and diabetic men. *John E. Liljenquist, James D. Bomboy, Stephen B. Lewis, Bruce C. Sinclair-Smith, Philip W. Felts, William W. Lacy, Oscar B. Crofford, and Grant W. Liddle* 190

Effect of glucagon on net splanchnic cyclic AMP production in normal and diabetic men. *John E. Liljenquist, James D. Bomboy, Stephen B. Lewis, Bruce C. Sinclair-Smith, Philip W. Felts, William W. Lacy, Oscar B. Crofford, and Grant W. Liddle* 198
Inhibition of ileal water absorption by intraluminal fatty acids. Influence of chain length, hydroxylation, and conjugation of fatty acids. *Helmut V. Ammon and Sidney F. Phillips* 205
Induction of the platelet release reaction by phytohemagglutinin. *Douglas M. Tollefsen, John R. Feagler, and Philip W. Majerus* 211
Mechanism of suppression of vasopressin during alpha-adrenergic stimulation with norepinephrine. *Tomas Berl, Pravit Cadnapaphornchai, Judith A. Harbottle, and Robert W. Schrier* 219
Studies on derivation of transcobalamin III from granulocytes. Enhancement by lithium and elimination by fluoride of in vitro increments in vitamin B_{12}-binding capacity. *J. M. Scott, F. J. Bloomfield, R. Stebbins, and V. Herbert* 228
The effect of in vivo hydrocortisone on subpopulations of human lymphocytes. *Anthony S. Fauci and David C. Dale* 240
Food iron absorption in man. Applications of the two-pool extrinsic tag method to measure heme and nonheme iron absorption from the whole diet. *Erik Björn-Rasmussen, Leif Hallberg, Björn Isaksson, and Bertil Arvidsson* 247
The effects in the rat of varying intakes of dietary calcium, phosphorus, and hydrogen ion on hyperparathyroidism due to chronic renal failure. *Michael Kaye* 256
Blastogenic suppression and alloantibody activity of sera from renal allograft recipients. *Armead H. Johnson, Roger D. Rossen, Evan M. Hersh, Sandra S. Farrow, William T. Butler, and Wadi N. Suki* 270
Functional and morphologic maturation of the superficial nephrons. Relationship to total kidney function. *Adrian Spitzer and Matthias Brandis* 279
The neurogenic vasoconstrictor effect of digitalis on coronary vascular resistance. *Nason P. Hamlin, James T. Willerson, Hasan Garan, and William John Powell, Jr.* 288
Mechanisms of lysosomal enzyme release from human leukocytes. II. Effects of cAMP and cGMP, autonomic agonists, and agents which affect microtubule function. *Robert B. Zurier, Gerald Weissmann, Sylvia Hoffstein, Sandra Kammerman, and Hsin Hsiung Tai* 297
Electrical dose for ventricular defibrillation of large and small animals using precordial electrodes. *L. A. Geddes, W. A. Tacker, J. P. Rosborough, A. G. Moore, and P. S. Cabler* 310
Hemoglobinopathic erythrocytosis due to a new electrophoretically silent variant, hemoglobin San Diego (β109(G11)val → met). *Peter E. Nute, George Stamatoyannopoulos, Mark A. Hermodson, and Daniel Roth* 320
Hemoglobin San Diego (β109 (G11) val → met). Crystal structure of the deoxy form. *N. Leigh Anderson* 329

CONCISE PUBLICATIONS

Effect of histamine and its methyl derivatives on cyclic AMP metabolism in gastric mucosa and its blockade by an H_2 receptor antagonist. *Thomas P. Dousa and Charles F. Code* 334
Regulation of human lipolysis. In vivo observations on the role of adrenergic receptors. *Thomas W. Burns, James M. Mohs, Paul E. Langley, Roy Yawn, and Gerald R. Chase* 338
JANUARY AUTHOR INDEX 342

NUMBER 2, FEBRUARY 1974

Serum heat-labile opsonins in systemic lupus erythematous. *Hugo E. Jasin, J. Humberto Orozco, and Morris Ziff* 343
Antibacterial mechanisms of the lower respiratory tract. I. Immunoglobulin synthesis and secretion. *W. Lee Hand and J. Robert Cantey* 354
Total and effective coronary blood flow in coronary and noncoronary heart disease. *David Mymin and Gyan P. Sharma* 363
Effects of oleic and ricinoleic acids on net jejunal water and electrolyte movement. Perfusion studies in man. *Helmut V. Ammon, Paul J. Thomas, and Sidney F. Phillips* 374

Leukocyte antimicrobial function in patients with leprosy. *David J. Drutz, Martin J. Cline, and Louis Levy* 380
Calcium metabolism of brain in acute renal failure. Effects of uremia, hemodialysis, and parathyroid hormone. *Allen I. Arieff and Shaul G. Massry* 387
Sodium chloride, urea, and water transport in the thin ascending limb of Henle. Generation of osmotic gradients by passive diffusion of solutes. *Masashi Imai and Juha P. Kokko* 393
Biochemical properties of human glomerular basement membrane in normal and diabetic kidneys. *Nicholas A. Kefalides* 403
Pituitary-testicular responsiveness in male hypogonadotropic hypogonadism. *Richard L. Weinstein and Richard E. Reitz* 408
A multiple ligand-binding radioimmunoassay of diiodotyrosine. *Jerald C. Nelson, Rene M. Weiss, John E. Lewis, R. Bruce Wilcox, and Fred J. Palmer* 416
Studies of the hepatic excretory defects in essential fatty acid deficiency. Their possible relationship to the genesis of cholesterol gallstones. *I. J. Sarfeh, D. A. Beeler, D. H. Treble, and J. A. Balint* 423
The glomerular mesangium. II. Studies of macromolecular uptake in nephrotoxic nephritis in rats. *S. Michael Mauer, Alfred J. Fish, Noorbibi K. Day, and Alfred F. Michael* 431
A study of the abnormal lipoproteins in abetalipoproteinemia. *Angelo M. Scanu, Lawrence P. Aggerbeck, Arthur W. Kruski, Chang T. Lim, and Herbert J. Kayden* 440
Factors governing the transepithelial potential difference across the proximal tubule of the rat kidney. *Lindsay J. Barratt, Floyd C. Rector, Jr., Juha P. Kokko, and Donald W. Seldin* 454
Renal regulation of acid-base equilibrium during chronic administration of mineral acid. *Rui C. De Sousa, John T. Harrington, Edmond S. Ricanati, Joel W. Shelkrot, and William B. Schwartz* 465
Cytoplasmic receptor for glucocorticoids in lung of the human fetus and neonate. *Philip L. Ballard and Roberta A. Ballard* 477
An in vitro model of gluten-sensitive enteropathy. Effect of gliadin on intestinal epithelial cells of patients with gluten-sensitive enteropathy in organ culture. *Z. Myron Falchuk, Roger L. Gebhard, Clementine Sessoms, and Warren Strober* 487
Proximal tubule reabsorption after hyperoncotic albumin infusion. Role of parathyroid hormone and dissociation from plasma volume. *F. G. Knox, E. G. Schneider, L. R. Willis, J. W. Strandhoy, C. E. Ott, J.-L. Cuche, R. S. Goldsmith, and C. D. Arnaud* 501
Ketone-body production and oxidation in fasting obese humans. *G. A. Reichard, Jr., O. E. Owen, A. C. Haff, P. Paul, and W. M. Bortz* 508
Distal tubular feedback in the autoregulation of single nephron glomerular filtration rate. *L. Gabriel Navar, Thomas J. Burke, Roscoe R. Robinson, and James R. Clapp* 516
Glucose reabsorption from bile. Evidence for a biliohepatic circulation. *Philip Guzelian and James L. Boyer* 526
Interaction of immunoglobulins with liposomes. *Gerald Weissmann, Ann Brand, and Edward C. Franklin* 536
Hereditary deficiency of the sixth component of complement in man. I. Immunochemical, biologic, and family studies. *J. P. Leddy, M. M. Frank, T. Gaither, J. Baum, and M. R. Klemperer* 544
Hereditary deficiency of the sixth component of complement in man. II. Studies of hemostasis. *R. S. Heusinkveld, J. P. Leddy, M. R. Klemperer, and R. T. Breckenridge* 554
Activation of human blood monocytes by products of sensitized lymphocytes. *Ross E. Rocklin, Carmen T. Winston, and John R. David* 559
Human lymphocyte subpopulations. Effect of corticosteroids. *David T. Y. Yu, Philip J. Clements, Harold E. Paulus, James B. Peter, Joshua Levy, and Eugene V. Barnett* 565
Role of the pituitary and thyroid glands in the decline of minimal O_2 consumption with age. *W. Donner Denckla* 572
Splanchnic glucose and amino acid metabolism in obesity. *Philip Felig, John Wahren, Rosa Hendler, and T. Brundin* 582
Stimulation of human neutrophil leukocyte aerobic glucose metabolism by purified chemotactic factors. *E. J. Goetzl and K. F. Austen* 591
Fibrinogen Philadelphia. A hereditary hypodysfibrinogenemia characterized by fibrinogen hypercatabolism. *Jose Martinez, Ruth R. Holburn, Sandor S. Shapiro, and Allan J. Erslev* 600

Increased formation of ursodeoxycholic acid in patients treated with chenodeoxycholic acid. *Gerald Salen, G. S. Tint, Bess Eliav, Norma Deering, and Erwin H. Mosbach* 612
Fletcher factor deficiency. A diminished rate of Hageman factor activation caused by absence of prekallikrein with abnormalities of coagulation, fibrinolysis, chemotactic activity, and kinin generation. *Allen S. Weiss, John I. Gallin, and Allen P. Kaplan* 622
Uptake of materials by the intact liver. The exchange of glucose across the cell membranes. *Carl A. Goresky and Brita E. Nadeau* 634

CONCISE PUBLICATIONS

Stimulation of heme oxygenase in macrophages and liver by endotoxin. *Diethard Gemsa, C. H. Woo, H. Hugh Fudenberg, and Rudi Schmid* 647
Augmentation of prolactin secretion by estrogen in hypogonadal women. *S. S. C. Yen, Y. Ehara, and T. M. Siler* 652
Thyroid hormone action. Demonstration of similar receptors in isolated nuclei of rat liver and cultured GH_1 cells. *Herbert H. Samuels and Jir S. Tsai* 656
The effect of vasopressin on phosphate transport in the proximal tubule of the dog. *Sung-Feng Wen* .. 660
The role of superoxide anion radical in the reduction of ferritin iron by xanthine oxidase. *D. M. Williams, G. R. Lee, and G. E. Cartwright* 665
FEBRUARY AUTHOR INDEX 668

NUMBER 3, MARCH 1974

Studies on the pathogenesis of type I (distal) renal tubular acidosis as revealed by the urinary P_{CO_2} tensions. *M. L. Halperin, M. B. Goldstein, A. Haig, M. D. Johnson, and B. J. Stinebaugh* 669
Attenuated vasodilator responses to K^+ in essential hypertensive men. *Henry W. Overbeck, Randall S. Derifield, Motilal B. Pamnani, and Tümay Sözen* 678
Reversal of cyclic AMP-mediated intestinal secretion by ethacrynic acid. *Qais Al-Awqati, Michael Field, and William B. Greenough, III* 687
Vitamin B_6 metabolism in chronic alcohol abuse. Pyridoxal phosphate levels in plasma and the effects of acetaldehyde on pyridoxal phosphate synthesis and degradation in human erythrocytes. *Lawrence Lumeng and Ting-Kai Li* 693
Adaption to hyperoxia. Influence on protein synthesis by lung and on granular pneumocyte ultrastructure. *Gloria D. Massaro and Donald Massaro* 705
Cholinergic modification of glucose-induced biphasic insulin release in vitro. *R. Sharp, S. Culbert, J. Cook, A. Jennings, and I. M. Burr* 710
Direct inhibitory effect of hypercalcemia on renal actions of parathyroid hormone. *Nama Beck, Harbans Singh, Sarah W. Reed, and Bernard B. Davis* 717
Remodeling of granulocyte membrane fatty acids during phagocytosis. *James E. Smolen and Stephen B. Shohet* 726
Cell-mediated immune response of ragweed-sensitive patients to ragweed antigen E. In vitro lymphocyte transformation and elaboration of lymphocyte mediators. *Ross E. Rocklin, Hobert Pence, Hyman Kaplan, and Richard Evans* 735
A furosemide-sensitive cotransport of sodium plus potassium in the human red cell. *James S. Wiley and Richard A. Cooper* 745
Study of the renal tubular interactions of thyrocalcitonin, cyclic adenosine 3′,5′-monophosphate, 25-hydroxycholecalciferol, and calcium ion. *Jules B. Puschett, William S. Beck, Jr., Adam Jelonek, and Pedro C. Fernandez* 756
Limited binding capacity sites for L-triiodothyronine in rat liver nuclei. Nuclear-cytoplasmic interrelation, binding constants, and cross-reactivity with L-thyroxine. *Jack H. Oppenheimer, Harold L. Schwartz, Diona Koerner, and Martin I. Surks* 768
Removing substances from blood by affinity chromatography. I. Removing bilirubin and other albumin-bound substances from plasma and blood with albumin-conjugated agarose beads. *Paul H. Plotz, Paul D. Berk, Bruce F. Scharschmidt, Joyce Kay Gordon, and John Vergalla* 778

Removing substances from blood by affinity chromatography. II. Removing bilirubin from the blood of jaundiced rats by hemoperfusion over albumin-conjugated agarose beads. *Bruce F. Scharschmidt, Paul H. Plotz, Paul D. Berk, Jeanne G. Waggoner, and John Vergalla* 786
Effects of ethacrynic acid on the isolated collecting tubule. *Maurice Abramow* 796
Sulfhydryl groups of the erythrocyte membrane and their relation to glycolysis and drug-induced hemolytic anemia. *Alvin Zipursky, Marlene Stephens, Elizabeth J. Brown, and Per Larsen* 805
Enhancement of random migration and chemotactic response of human leukocytes by ascorbic acid. *Edward J. Goetzl, Stephen I. Wasserman, Irma Gigli, and K. Frank Austen* 813
Hypophyso-gonadal function in humans during the first year of life. I. Evidence for testicular activity in early infancy. *Maguelone G. Forest, Pierre C. Sizonenko, Anne M. Cathiard, and Jean Bertrand* 819
Chemotherapy of experimental streptococcal endocarditis. II. Synergism between penicillin and streptomycin against penicillin-sensitive streptococci. *David T. Durack, Lawrence L. Pelletier, and Robert G. Petersdorf* 829
Lymphocytes in patients with variable immunodeficiency and panhypogammaglobulinemia. Evaluation of B and T cell surface markers and a proposed classification. *H. B. Dickler, N. F. Adkinson, Jr., R. I. Fisher, and W. D. Terry* 834
Hyperglucagonemia of renal failure. *Gordon L. Bilbrey, Gerald R. Faloona, Martin G. White, and James P. Knochel* 841
Glucose metabolism and the response to insulin by human adipose tissue in spontaneous and experimental obesity. Effects of dietary composition and adipose cell size. *L. B. Salans, G. A. Bray, S. W. Cushman, E. Danforth, Jr., J. A. Glennon, E. S. Horton, and E. A. H. Sims* 848
Mechanism of stimulation of vasopressin release during beta adrenergic stimulation with isoproterenol. *Tomas Berl, Pravit Cadnapaphornchai, Judith A. Harbottle, and Robert W. Schrier* 857
Isolation of a novel glycoprotein from the urine of a patient with chronic myelocytic leukemia. *Daniel Rudman, Rajender K. Chawla, Alejandro E. Del Rio, and Bettye Hollins* 868
Evidence for a structural requirement for the aggregation of platelets by collagen. *Russell Jaffe and Daniel Deykin* 875
Renal hemodynamics and ammoniagenesis. Characteristics of the antiluminal site for glutamine extraction. *Guy Lemieux, Patrick Vinay, and Pierre Cartier* 884
Metabolic clearance and production rates of human thyrotropin. *E. Chester Ridgway, Bruce D. Weintraub, and Farahe Maloof* 895
Design and evaluation by nitrogen balance and blood aminograms of an amino acid mixture for total parenteral nutrition of adults with gastrointestinal disease. *G. H. Anderson, D. G. Patel, and K. N. Jeejeebhoy* 904
The acute effect of 25-hydroxycholecalciferol on renal handling of phosphorus. Evidence for a parathyroid hormone-dependent mechanism. *Mordecai M. Popovtzer, John B. Robinette, Hector F. DeLuca, and Michael F. Holick* 913
Purification and properties of cytidine deaminase from normal and leukemic granulocytes. *Bruce A. Chabner, David G. Johns, C. Norman Coleman, James C. Drake, and Warren H. Evans* 922
A monoclonal IgM protein with antibody-like activity for human albumin. *Stephen Hauptman and Thomas B. Tomasi, Jr.* 932
Effects of prostaglandins and cholera enterotoxin on intestinal mucosal cyclic AMP accumulation. Evidence against an essential role for prostaglandins in the action of toxin. *Daniel V. Kimberg, Michael Field, Elaine Gershon, and Antonia Henderson* 941

CONCISE PUBLICATION

Canine cyclic neutropenia. A stem cell defect. *Paul L. Weiden, Barbra Robinett, Theodore C. Graham, John Adamson, and Rainer Storb* 950
MARCH AUTHOR INDEX 954

NUMBER 4, APRIL 1974

Program of the Sixty-Sixth Annual Meeting of the American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., 6 May 1974 i

Contents vii

Translational control of hemoglobin synthesis in thalassemic bone marrow. *Gabriel Cividalli, David G. Nathan, and Harvey F. Lodish* 955
The mechanism of bicarbonate secretion in rabbit ileum exposed to choleragen. *Kenneth A. Hubel* ... 964
Superficial and juxtamedullary nephron function during saline loading in the dog. *Frank J. Bruns, Edward A. Alexander, Arthur L. Riley, and Norman G. Levinsky* 971
Augmentation of the peripheral metabolism of L-triiodothyronine and L-thyroxine after acclimation to cold. Multifocal stimulation of the binding of iodothyronines by tissues. *Alan Balsam* 980
A specific role for saline or the sodium ion in the regulation of renin and aldosterone secretion. *Michael L. Tuck, Robert G. Dluhy, and Gordon H. Williams* 988
Hyperactivity of neutrophil leukotactic responses during active bacterial infection. *Harry R. Hill, Jonathan M. Gerrard, Nancy A. Hogan, and Paul G. Quie* 996
Uptake and utilization of exogenous cystine by cystinotic and normal fibroblasts. *Beatrice States, Dorothy Harris, and Stanton Segal* 1003
The effect of insulin on the alpha-cell response to hyperglycemia in long-standing alloxan diabetes. *Jan T. Braaten, Gerald R. Faloona, and Roger H. Unger* 1017
Ectopic ACTH production in carcinoma of the lung. *George Gewirtz and Rosalyn S. Yalow* 1022
β-Sitosterolemia and xanthomatosis. A newly described lipid storage disease in two sisters. *Ashim K. Bhattacharyya and William E. Connor* 1033
Neutral proteases and cathepsin D in human articular cartilage. *Asher I. Sapolsky, David S. Howell, and J. Frederick Woessner, Jr.* 1044
A serum component related to nonimmunoglobulin amyloid protein AS, a possible precursor of the fibrils. *G. Husby and J. B. Natvig* 1054
The intestinal absorption of dietary cholesterol by hypercholesterolemic (type II) and normocholesterolemic humans. *William E. Connor and Don S. Lin* 1062
Disturbance of serum viscosity in diabetes mellitus. *Donald E. McMillan* 1071
Substrate turnover during prolonged exercise in man. Splanchnic and leg metabolism of glucose, free fatty acids, and amino acids. *Gunvor Ahlborg, Philip Felig, Lars Hagenfeldt, Rosa Hendler, and John Wahren* 1080
Ventilatory acclimatization to moderate hypoxemia in man. The role of spinal fluid [H^+]. *J. A. Dempsey, H. V. Forster, and G. A. doPico* 1091
Increased clearance of antipyrine and *d*-propranolol after phenobarbital treatment in the monkey. Relative contributions of enzyme induction and increased hepatic blood flow. *Robert A. Branch, David G. Shand, Grant R. Wilkinson, and Alan S. Nies* 1101
Enhancement of human lymphocyte transformation by aggregated human gamma globulin. *T. Douglas Kinsella* 1108
On the mechanism of lithium-induced diabetes insipidus in man and the rat. *John N. Forrest, Jr., Alan D. Cohen, Jorge Torretti, Jonathan M. Himmelhoch, and Franklin H. Epstein* 1115
The mechanism of activation of hormone-sensitive lipase in human adipose tissue. *John C. Khoo, Alegria A. Aquino, and Daniel Steinberg* 1124
Bone marrow erythropoiesis in the anemia of infection, inflammation, and malignancy. *Stanley Zucker, Samuel Friedman, and Rita M. Lysik* 1132
Effects of dietary calcium restriction and chronic thyroparathyroidectomy on the metabolism of [^{3}H]25-hydroxyvitamin D_3 and the active transport of calcium by rat intestine. *Murray J. Favus, Marlin W. Walling, and Daniel V. Kimberg* 1139
Sequence of events mediating the effect of cholera toxin on rat thymocytes. *James M. Boyle and Jerry D. Gardner* 1149
Spontaneous and amino acid-stimulated glucagon secretion in the immediate postnatal period. Relation to glucose and insulin. *Mark A. Sperling, Paul V. DeLamater, Dale Phelps, Robert H. Fiser, William Oh, and Delbert A. Fisher* 1159
Stimulators and inhibitors of hepatic porphyrin formation in human sera. *Arleen B. Rifkind, Shigeru Sassa, Irwin R. Merkatz, Robert Winchester, Leonard Harber, and Attallah Kappas* 1167
Lung volumes in diffuse obstructive pulmonary syndromes. *A. C. Young, C. J. Martin, and S. Tsunoda* 1178
Effects of intraduodenal administration of HCl and glucose on circulating immunoreactive secretin and insulin concentrations. *Guenther Boden, Noorjehan Essa, Oliver E. Owen, and Frederick A. Reichle* 1185

CONCISE PUBLICATIONS

Detection of the carrier state in combined immunodeficiency disease associated with adenosine deaminase deficiency. *C. Ronald Scott, Shi-Han Chen, and Eloise R. Giblett* 1194
Superoxide dismutase activity in leukocytes. *Lawrence R. DeChatelet, Charles E. McCall, Linda C. McPhail, and Richard B. Johnston, Jr.* 1197
Studies on the mode of action of cholera toxin. Effects on solubilized adenylate cyclase. *Barbara Beckman, Jorge Flores, Patricia A. Witkum, and Geoffrey W. G. Sharp* 1202
April Author Index 1206

Number 5, May 1974

Myeloperoxidase-mediated iodination by granulocytes. Intracellular site of operation and some regulating factors. *Richard K. Root and Thomas P. Stossel* 1207
Measurement of diaphragmatic blood flow and oxygen consumption in the dog by the Kety-Schmidt technique. *Dudley F. Rochester* 1216
Interaction of baroreceptor and chemoreceptor reflexes. Modulation of the chemoreceptor reflex by changes in baroreceptor activity. *Donald D. Heistad, Francois M. Abboud, Allyn L. Mark, and Phillip G. Schmid* 1226
Familial hypercholesterolemia (one form of familial type II hyperlipoproteinemia). A study of its biochemical, genetic, and clinical presentation in childhood. *Peter O. Kwiterovich, Jr., Donald S. Fredrickson, and Robert I. Levy* 1237
The effect of cyclic AMP and dibutyryl cyclic AMP on the permeability characteristics of the renal tubule. *William B. Lorentz, Jr.* 1250
The reduction of glyceraldehyde by human erythrocytes. L-Hexonate dehydrogenase activity. *E. Beutler and E. Guinto* 1258
Effects of dobutamine on left ventricular performance, coronary dynamics, and distribution of cardiac output in conscious dogs. *Stephen F. Vatner, Robert J. McRitchie, and Eugene Braunwald* 1265
Isolation and characterization of an abnormal human intrinsic factor. *Max Katz, Carol S. Mehlman, and Robert H. Allen* 1274
Effects of alterations of plasma free fatty acid levels on pancreatic glucagon secretion in man. *John E. Gerich, Maurice Langlois, Victor Schneider, John H. Karam, and Claudio Noacco* 1284
Importance of free fatty acids as a determinant of myocardial oxygen consumption and myocardial ischemic injury during norepinephrine infusion in dogs. *Ole D. Mjøs, John Kjekshus, and Jon Lekven* 1290
A study of intercellular spaces in the rabbit jejunum during acute volume expansion and after treatment with cholera toxin. *Donald R. DiBona, Lincoln C. Chen, and Geoffrey W. G. Sharp* 1300
Fibrinogen Cleveland II. An abnormal fibrinogen with defective release of fibrinopeptide A. *Edward D. Crum, John R. Shainoff, Richard C. Graham, and Oscar D. Ratnoff* 1308
Bacterial growth in vivo. An important determinant of the pulmonary clearance of *Diplococcus pneumoniae* in rats. *Waldemar G. Johanson, Jr., Stephen J. Jay, and Alan K. Pierce* 1320
Measurement of δ-aminolevulinic acid synthetase activity in human erythroblasts. *Yosuke Aoki, Gumpei Urata, Osamu Wada, and Fumimaro Takaku* 1326
Transmissible gastroenteritis. Mechanisms responsible for diarrhea in an acute viral enteritis in piglets. *D. G. Butler, D. G. Gall, M. H. Kelly, and J. R. Hamilton* 1335
An inhibitor of histamine release from human leukocytes. *Michael T. Kelly and Arthur White* 1343
Development of cellular and humoral immunity in the respiratory tract of rabbits to *Pseudomonas* lipopolysaccharide. *Herbert Y. Reynolds, Russell E. Thompson, and Henry B. Devlin* 1351
Thrombocytopenia in experimental trypanosomiasis. *Charles E. Davis, Robert S. Robbins, Richard D. Weller, and Abraham I. Braude* 1359
Functional characterization of dipeptide transport system in human jejunum. *Siamak A. Adibi and Mohammad R. Soleimanpour* 1368
Immunofluorescent localization of antihemophilic factor antigen and fibrinogen in human renal diseases. *John R. Hoyer, Alfred F. Michael, and Leon W. Hoyer* 1375

Urea metabolism in chronic renal failure. *Mackenzie Walser* 1385
A biochemical abnormality in cerebrotendinous xanthomatosis. Impairment of bile acid biosynthesis associated with incomplete degradation of the cholesterol side chain. *T. Setoguchi, Gerald Salen, G. S. Tint, and E. H. Mosbach* 1393
Pathophysiology of experimental glomerulonephritis in rats. *Marjorie E. M. Allison, Curtis B. Wilson, and Carl W. Gottschalk* 1402
The effect of glucose on urinary cation excretion during chronic extracellular volume expansion in normal man. *Edward J. Lennon, J. Lemann, Jr., W. F. Piering, and L. S. Larson* 1424
Immunoglobulin in clinically uninvolved skin in systemic lupus erythematosis. Association with renal disease. *James N. Gilliam, Don E. Cheatum, Eric R. Hurd, Peter Stastny, and Morris Ziff* 1434
Adrenergic modulation of pancreatic glucagon secretion in man. *John E. Gerich, Maurice Langlois, Claudio Noacco, Victor Schneider, and Peter H. Forsham* 1441
Release of adenosine from human hearts during angina induced by rapid atrial pacing. *Arthur C. Fox, George E. Reed, Ephraim Glassman, Alfred J. Kaltman, and Barbara B. Silk* 1447
Assay of total plasma apolipoprotein B concentration in human subjects. *Gustav Schonfeld, Robert S. Lees, P. K. George, and Barbara Pfleger* 1458
Formation of an intermediate in prostaglandin biosynthesis and its association with the platelet release reaction. *J. B. Smith, Carol Ingerman, J. J. Kocsis, and M. J. Silver* 1468
Partial purification of osteoclast-activating factor from phytohemagglutinin-stimulated human leukocytes. *Richard A. Luben, Gregory R. Mundy, Clarence L. Trummel, and Lawrence G. Raisz* .. 1473
A model of the kinetics of insulin in man. *Robert S. Sherwin, Karl J. Kramer, Jordan D. Tobin, Paul A. Insel, John E. Liljenquist, Mones Berman, and Reubin Andres* 1481

CONCISE PUBLICATIONS

Proteolysis of myosin during platelet storage. *Joel Abramowitz, Alfred Stracher, and Thomas C. Detwiler* 1493
Nephron stop-flow pressure response to obstruction for 24 hours in the rat kidney. *William J. Arendshorst, William F. Finn, and Carl W. Gottschalk* 1497
MAY AUTHOR INDEX 1502

NUMBER 6, JUNE 1974

The roles of IgG, IgM rheumatoid factor, and their complexes in the induction of polymorphonuclear leukocyte chemotactic factor from complement. *Teresa Wagner, George Abraham, and John Baum* 1503
Evidence for a role of the microtubular system in the secretion of newly synthesized albumin and other proteins by the liver. *Yannick Le Marchand, Christoph Patzelt, Françoise Assimacopoulos-Jeannet, Ernest G. Loten, and Bernard Jeanrenaud* 1512
Evidence for different gestation-dependent effects of cortisol on cultured fetal lung cells. *Barry T. Smith, John S. Torday, and C. J. P. Giroud* 1518
Storage iron kinetics. VII. A biologic model for reticuloendothelial iron transport. *Georges Fillet, James D. Cook, and Clement A. Finch* 1527
Effects of anti-human neutrophil antibodies in vitro. Quantitative studies. *Laurence A. Boxer and Thomas P. Stossel* 1534
Studies on the mechanism of oliguria in a model of unilateral acute renal failure. *John W. Cox, Richard W. Baehler, Hari Sharma, Thomas O'Dorisio, Richard W. Osgood, Jay H. Stein, and Thomas F. Ferris* 1546
The presence of a natriuretic factor in urine of patients with chronic uremia. The absence of the factor in nephrotic uremic patients. *Jacques J. Bourgoignie, Kuo Hwa Hwang, Ebrahim Ipakchi, and Neal S. Bricker* 1559
The effects of the natriuretic factor from uremic urine on sodium transport, water and electrolyte content, and pyruvate oxidation by the isolated toad bladder. *Michael A. Kaplan, Jacques J. Bourgoignie, Jeffrey Rosecan, and Neal S. Bricker* 1568

Metabolic studies of the third component of complement and the glycine-rich beta glycoprotein in patients with hypocomplementemia. *J. A. Charlesworth, D. Gwyn Williams, E. Sherington, P. J. Lachmann, and D. K. Peters* 1578
Hypothalamic-pituitary function in diverse hyperprolactinemic states. *R. M. Boyar, S. Kapen, J. W. Finkelstein, M. Perlow, J. F. Sassin, D. K. Fukushima, E. D. Weitzman, and Leon Hellman* 1588
Coronary hemodynamics and regional myocardial metabolism in experimental aortic insufficiency. *Douglas M. Griggs, Jr., and Chin Chi Chen* 1599
Warfarin. Stereochemical aspects of its metabolism and the interaction with phenylbutazone. *Richard J. Lewis, William F. Trager, Kenneth K. Chan, A. Breckenridge, M. Orme, Malcolm Roland, and William Schary* 1607
Regional myocardial blood flow in awake dogs. *Frederick R. Cobb, Robert J. Bache, and Joseph C. Greenfield, Jr.* 1618
Incomplete relaxation between beats after myocardial hypoxia and ischemia. *Myron L. Weisfeldt, Paul Armstrong, Hugh E. Scully, Charles A. Sanders, and Willard M. Daggett* 1626
Abnormal secretion of insulin and glucagon by the in vitro perfused pancreas of the genetically diabetic chinese hamster. *Barbara J. Frankel, John E. Gerich, Ryoko Hagura, Rudy E. Fanska, George C. Gerritsen, and Gerold M. Grodsky* 1637
Human platelet collagenase. *Carolyn McI. Chesney, Elvin Harper, and Robert W. Colman* 1647
Reversal of ouabain and acetyl strophanthidin effects in normal and failing cardiac muscle by specific antibody. *Herman K. Gold and Thomas W. Smith* 1655
Biological defense mechanisms. The effect of bacteria and serum on superoxide production by granulocytes *John T. Curnutte and Bernard M. Babior* 1662
Role of sweat in accumulation of orally administered griseofulvin in skin. *Vinod P. Shah, William L. Epstein, and Sidney Riegelman* 1673
Effects of intravenous administration of slow-reacting substance of anaphylaxis, histamine, bradykinin, and prostaglandin $F_{2\alpha}$ on pulmonary mechanics in the guinea pig. *Jeffrey M. Drazen and K. Frank Austen* 1679
Active and passive bile acid absorption in man. Perfusion studies of the ileum and jejunum. *Einar Krag and Sidney F. Phillips* 1686
Interference with feedback control of glomerular filtration rate by furosemide, triflocin, and cyanide. *Fred S. Wright and Jürgen Schnermann* 1695
Effect of maternal intrahepatic cholestasis on fetal steroid metabolism. *Timo J. Laatikainen, Jari I. Peltonen, and Pekka L. Nylander* 1709
Digitalis-induced increase in aortic regurgitation and the contrasting effects of glucagon in the sedated dog. *Barry E. Hopkins and Roger R. Taylor* 1716
Immunochemical localization of parathyroid hormone in cancer tissue from patients with ectopic hyperparathyroidism. *Genaro M. A. Palmieri, Robert E. Nordquist, and Gilbert S. Omenn* 1726
On the adaptation in sodium excretion in chronic uremia. The effects of "proportional reduction" of sodium intake. *R. William Schmidt, Jacques J. Bourgoignie, and Neal S. Bricker* 1736
The effect of Bacillus Calmette-Guerin-induced macrophage activation on the in vivo clearance of sensitized erythrocytes. *John P. Atkinson and Michael M. Frank* 1742

CONCISE PUBLICATION

Effects of exogenous estrogen and progestin on pituitary responsiveness to synthetic luteinizing hormone-releasing factor. *G. Vandenberg, G. DeVane, and S. S. C. Yen* 1750

PROCEEDINGS OF THE ANNUAL MEETING OF THE AMERICAN SOCIETY FOR CLINICAL INVESTIGATION, INC., ATLANTIC CITY 1974

Presidential Address 1755
Abstracts, with Author Index 1a
JUNE AUTHOR INDEX 1761
INDEXES TO VOLUME 53 1762

AUTHOR INDEX

A

Abboud, Francois M. See Heistad, Abboud, Mark, and Schmid 1226
Abraham, George. See Wagner, Abraham, and Baum 1503
Abramow, Maurice. Effects of ethacrynic acid on the isolated collecting tubule 796
Abramowitz, Joel, Alfred Stracher, and **Thomas C. Detwiler.** Proteolysis of myosin during platelet storage 1493
Adams, Judith. See Rosse, Logue, Adams, and Crookston 31
Adamson, John. See Weiden, Robinett, Graham, Adamson, and Storb 950
Adibi, Siamak A., and **Mohammad R. Soleimanpour.** Functional characterization of dipeptide transport system in human jejunum 1368
Adkinson, N. F., Jr. See Dickler, Adkinson, Fisher, and Terry 834
Aggerbeck, Lawrence P. See Scanu, Aggerbeck, Kruski, Lim, and Kayden 440
Ahlborg, Gunvor, Philip Felig, Lars Hagenfeldt, Rosa Hendler, and **John Wahren.** Substrate turnover during prolonged exercise in man. Splanchnic and leg metabolism of glucose, free fatty acids, and amino acids 1080
Al-Awqati, Qais, Michael Field, and **William B. Greenough, III.** Reversal of cyclic AMP-mediated intestinal secretion by ethacrynic acid 687
Alexander, Edward A. See Bruns, Alexander, Riley, and Levinsky 971
Allen, Robert H. See Katz, Mehlman, and Allen 1274
Alleyne, George A. O., and **Anne Roobol.** Regulation of renal cortex ammoniagenesis. I. Stimulation of renal cortex ammoniagenesis in vitro by plasma isolated from acutely acidotic rats 117
Allison, Marjorie E. M., Curtis B. Wilson, and **Carl W. Gottschalk.** Pathophysiology of experimental glomerulonephritis in rats 1402
Ammon, Helmut V., Paul J. Thomas, and **Sidney F. Phillips.** Effects of oleic and ricinoleic acids on net jejunal water and electrolyte movement. Perfusion studies in man 374
— and **Sidney F. Phillips.** Inhibition of ileal water absorption by intraluminal fatty acids. Influence of chain length, hydroxylation, and conjugation of fatty acids 205
Anderson, G. H., D. G. Patel, and **K. N. Jeejeebhoy.** Design and evaluation by nitrogen balance and blood aminograms of an amino acid mixture for total parenteral nutrition of adults with gastrointestinal disease 904
Anderson, N. Leigh. Hemoglobin San Diego (β109 (G11) Val → Met). Crystal structure of the deoxy form 329
Andres, Reubin. See Sherwin, Kramer, Tobin, Insel, Liljenquist, Berman, and Andres 1481
Aoki, Yosuke, Gumpei Urata, Osamu Wada, and **Fumimaro Takaku.** Measurement of δ-aminolevulinic acid synthetase activity in human erythroblasts 1326
Aquino, Alegria A. See Khoo, Aquino, and Steinberg 1124
Arendshorst, William J., William F. Finn, and **Carl W. Gottschalk.** Nephron stop-flow pressure response to obstruction for 24 hours in the rat kidney 1497
Arieff, Allen I., and **Shaul G. Massry.** Calcium metabolism of brain in acute renal failure. Effects of uremia, hemodialysis, and parathyroid hormone 387
Armstrong, Paul. See Weisfeldt, Armstrong, Scully, Sanders, and Daggett 1626
Arnaud, C. D. See Knox, Schneider, Willis, Strandhoy, Ott, Cuche, Goldsmith, and Arnaud 501
Arvidsson, Bertil. See Björn-Rasmussen, Hallberg, Isaksson, and Arvidsson 247
Assimacopoulos-Jeannet, Françoise. See Le Marchand, Patzelt, Assimacopoulos-Jeannet, Loten, and Jeanrenaud 1512
Atkinson, John P., and **Michael M. Frank.** The effect of Bacillus Calmette-Guerin-induced macrophage activation on the in vivo clearance of sensitized erythrocytes 1742
Austen, K. Frank. See Drazen and Austen 1679
—. See Goetzl and Austen 591
—. See Goetzl, Wasserman, Gigli, and Austen 813

B

Babior, Bernard M. See Curnutte and Babior 1662
Bache, Robert J. See Cobb, Bache, and Greenfield 1618
Baehler, Richard W. See Cox, Baehler, Sharma, O'Dorisio, Osgood, Stein, and Ferris 1546
Balint, J. A. See Sarfeh, Beeler, Treble, and Balint 423
Ballard, Philip L., and **Roberta A. Ballard.** Cytoplasmic receptor for glucocorticoids in lung of the human fetus and neonate 477
Ballard, Roberta A. See Ballard and Ballard 477
Balsam, Alan. Augmentation of the peripheral metabolism of L-triiodothyronine and L-thyroxine after acclimation to cold. Multifocal stimulation of the binding of iodothyronines by tissues 980
Barnett, Eugene V. See Yu, Clements, Paulus, Peter, Levy, and Barnett 565
Barratt, Lindsay J., Floyd C. Rector, Jr., Juha P. Kokko, and **Donald W. Seldin.** Factors governing the transepithelial potential difference across the proximal tubule of the rat kidney 454
Baum, John. See Leddy, Frank, Gaither, Baum, and Klemperer 544
—. See Wagner, Abraham, and Baum 1503
Bauminger, Sara. See Melmon, Bourne, Weinstein, Shearer, Kram, and Bauminger 13
—. See Melmon, Weinstein, Shearer, Bourne, and Bauminger 22
Beck, Nama, Harbans Singh, Sarah W. Reed, and **Bernard B. Davis.** Direct inhibitory effect of hypercalcemia on renal actions of parathyroid hormone 717
Beck, William S., Jr. See Puschett, Beck, Jelonek, and Fernandez 756
Beckman, Barbara, Jorge Flores, Patricia A. Witkum, and **Geoffrey W. G. Sharp.** Studies on the mode of action of cholera toxin. Effects on solubilized adenylate cyclase 1202
Beeler, D. A. See Sarfeh, Beeler, Treble, and Balint 423
Ben-Yoseph, Yoav. See Shapira, Ben-Yoseph, Eyal, and Russell 59
Berk, Paul D. See Plotz, Berk, Scharschmidt, Gordon, and Vergalla 778
—. See Scharschmidt, Plotz, Berk, Waggoner, and Vergalla 786

Berl, Tomas, Pravit Cadnapaphornchai, Judith A. Harbottle, and **Robert W. Schrier.** Mechanism of stimulation of vasopressin release during beta adrenergic stimulation with isoproterenol 857
—, —, —, and —. Mechanism of suppression of vasopressin during alpha-adrenergic stimulation with norepinephrine 219
Berman, Mones. See SHERWIN, KRAMER, TOBIN, INSEL, LILJENQUIST, BERMAN, and ANDRES 1481
Bertrand, Jean. See FOREST, SIZONENKO, CATHIARD, and BERTRAND 819
Beutler, E., and **E. Guinto.** The reduction of glyceraldehyde by human erythrocytes. L-Hexonate dehydrogenase activity 1258
Bhattacharyya, Ashim K., and **William E. Connor.** β-Sitosterolemia and xanthomatosis. A newly described lipid storage disease in two sisters 1033
Bilbrey, Gordon L., Gerald R. Faloona, Martin G. White, and **James P. Knochel.** Hyperglucagonemia of renal failure 841
Björn-Rasmussen, Erik, Leif Hallberg, Björn Isaksson, and **Bertil Arvidsson.** Food iron absorption in man. Applications of the two-pool extrinsic tag method to measure heme and nonheme iron absorption from the whole diet 247
Blonde, Lawrence, Robert E. Wehmann, and **Alton L. Steiner.** Plasma clearance rates and renal clearance of ^{3}H-labeled cyclic AMP and ^{3}H-labeled cyclic GMP in the dog 163
—. See WEHMANN, BLONDE, and STEINER 173
Bloomfield, F. J. See SCOTT, BLOOMFIELD, STEBBINS, and HERBERT 228
Boden, Guenther, Noorjehan Essa, Oliver E. Owen, and **Frederick A. Reichle.** Effects of intraduodenal administration of HCl and glucose on circulating immunoreactive secretin and insulin concentrations 1185
Bomboy, James D. See LILJENQUIST, BOMBOY, LEWIS, SINCLAIR-SMITH, FELTS, LACY, CROFFORD, and LIDDLE 190, 198
Bortz, W. M. See REICHARD, OWEN, HAFF, PAUL, and BORTZ 508
Bourgoignie, Jacques J., Kuo Hwa Hwang, Ebrahim Ipakchi, and **Neal S. Bricker.** The presence of a natriuretic factor in urine of patients with chronic uremia. The absence of the factor in nephrotic uremic patients 1559
—. See KAPLAN, BOURGOIGNIE, ROSECAN, and BRICKER 1568
—. See SCHMIDT, BOURGOIGNIE, and BRICKER 1736
Bourne, Henry R. See MELMON, BOURNE, WEINSTEIN, SHEARER, KRAM, and BAUMINGER 13
—. See MELMON, WEINSTEIN, SHEARER, BOURNE, and BAUMINGER 22
Boxer, Laurence A., and **Thomas P. Stossel.** Effects of anti-human neutrophil antibodies in vitro. Quantitative studies 1534
Boyar, R. M., S. Kapen, J. W. Finkelstein, M. Perlow, J. F. Sassin, D. K. Fukushima, E. D. Weitzman, and **Leon Hellman.** Hypothalamic-pituitary function in diverse hyperprolactinemic states 1588
Boyer, James L. See GUZELIAN and BOYER 526
Boyle, James M., and **Jerry D. Gardner.** Sequence of events mediating the effect of cholera toxin on rat thymocytes 1149
Braaten, Jan T., Gerald R. Faloona, and **Roger H. Unger.** The effect of insulin on the alpha-cell response to hyperglycemia in long-standing alloxan diabetes 1017
Branch, Robert A., David G. Shand, Grant R. Wilkinson, and **Alan S. Nies.** Increased clearance of antipyrine and *d*-propranolol after phenobarbital treatment in the monkey. Relative contributions of enzyme induction and increased hepatic blood flow 1101
Brand, Ann. See WEISSMANN, BRAND, and FRANKLIN 536
Brandis, Matthias. See SPITZER and BRANDIS 279
Braude, Abraham I. See DAVIS, ROBBINS, WELLER, and BRAUDE 1359
Braunwald, Eugene. See VATNER, MCRITCHIE, and BRAUNWALD 1265
Bray, G. A. See SALANS, BRAY, CUSHMAN, DANFORTH, GLENNON, HORTON, and SIMS 848
Breckenridge, A. See LEWIS, TRAGER, CHAN, BRECKENRIDGE, ORME, ROLAND, and SCHARY 1607
Breckenridge, R. T. See HEUSINKVELD, LEDDY, KLEMPERER, and BRECKENRIDGE 554
Brenner, Barry M. See DAUGHARTY, UEKI, MERCER, and BRENNER 105
Bricker, Neal S. See BOURGOIGNIE, HWANG, IPAKCHI, and BRICKER 1559
—. See KAPLAN, BOURGOIGNIE, ROSECAN, and BRICKER 1568
—. See SCHMIDT, BOURGOIGNIE, and BRICKER 1736
Brown, Elizabeth J. See ZIPURSKY, STEPHENS, BROWN, and LARSEN 805
Brundin, T. See FELIG, WAHREN, HENDLER, and BRUNDIN 582
Bruns, Frank J., Edward A. Alexander, Arthur L. Riley, and **Norman G. Levinsky.** Superficial and juxtamedullary nephron function during saline loading in the dog 971
Burke, Thomas J. See NAVAR, BURKE, ROBINSON, and CLAPP 516
Burnell, James M., Elizabeth Teubner, Jon E. Wergedal, and **Donald J. Sherrard.** Bone crystal maturation in renal osteodystrophy in humans 52
Burns, Thomas W., James M. Mohs, Paul E. Langley, Roy Yawn, and **Gerald R. Chase.** Regulation of human lipolysis. In vivo observations on the role of adrenergic receptors 338
Burr, I. M. See SHARP, CULBERT, COOK, JENNINGS, and BURR 710
Butler, D. G., D. G. Gall, M. H. Kelly, and **J. R. Hamilton.** Transmissible gastroenteritis. Mechanisms responsible for diarrhea in an acute viral enteritis in piglets 1335
Butler, William T. See JOHNSON, ROSSEN, HERSH, FARROW, BUTLER, and SUKI 270

C

Cabler, P. S. See GEDDES, TACKER, ROSBOROUGH, MOORE, and CABLER 310
Cadnapaphornchai, Pravit. See BERL, CADNAPAPHORNCHAI, HARBOTTLE, and SCHRIER 219, 857
Cantey, J. Robert. See HAND and CANTEY 354
Cartier, Pierre. See LEMIEUX, VINAY, and CARTIER 884
Cartwright, G. E. See WILLIAMS, LEE, and CARTWRIGHT 665
Cathiard, Anne M. See FOREST, SIZONENKO, CATHIARD, and BERTRAND 819
Chabner, Bruce A., David G. Johns, C. Norman Coleman, James C. Drake, and **Warren H. Evans.** Purification and properties of cytidine deaminase from normal and leukemic granulocytes 922
Chan, Kenneth K. See LEWIS, TRAGER, CHAN, BRECKENRIDGE, ORME, ROLAND, and SCHARY 1607
Charlesworth, J. A., D. Gwyn Williams, E. Sherington, P. J. Lachmann, and **D. K. Peters.** Metabolic studies of the third component of complement and the glycine-rich beta glycoprotein in patients with hypocomplementemia 1578

Chase, Gerald R. See Burns, Mohs, Langley, Yawn, and Chase 338
Chawla, Rajender K. See Rudman, Chawla, Del Rio, and Hollins 868
Cheatum, Don E. See Gilliam, Cheatum, Hurd, Stastny, and Ziff 1434
Chen, Chin Chi. See Griggs and Chen 1599
Chen, Lincoln C. See DiBona, Chen, and Sharp 1300
Chen, Shi-Han. See Scott, Chen, and Giblett 1194
Chesney, Carolyn McI., Elvin Harper, and Robert W. Colman. Human platelet collagenase 1647
Cividalli, Gabriel, David G. Nathan, and Harvey F. Lodish. Translational control of hemoglobin synthesis in thalassemic bone marrow 955
Clapp, James R. See Navar, Burke, Robinson, and Clapp 516
Clements, Philip J. See Yu, Clements, Paulus, Peter, Levy, and Barnett 565
Cline, Martin J. See Drutz, Cline, and Levy 380
Cobb, Frederick R., Robert J. Bache, and Joseph C. Greenfield, Jr. Regional myocardial blood flow in awake dogs 1618
Code, Charles F. See Dousa and Code 334
Cohen, Alan D. See Forrest, Cohen, Torretti, Himmelhoch, and Epstein 1115
Coleman, C. Norman. See Chabner, Johns, Coleman, Drake, and Evans 922
Colman, Robert W. See Chesney, Harper, and Colman 1647
Connor, William E., and Don S. Lin. The intestinal absorption of dietary cholesterol by hypercholesterolemic (type II) and normocholesterolemic humans 1062
—. See Bhattacharyya and Connor 1033
Cook, J. See Sharp, Culbert, Cook, Jennings, and Burr 710
Cook, James D. See Fillet, Cook, and Finch 1527
Cooper, Neil R. See Verroust, Wilson, Cooper, Edgington, and Dixon 77
Cooper, Richard A. See Wiley and Cooper 745
Cox, John W., Richard W. Baehler, Hari Sharma, Thomas O'Dorisio, Richard W. Osgood, Jay H. Stein, and Thomas F. Ferris. Studies on the mechanism of oliguria in a model of unilateral acute renal failure 1546
Crofford, Oscar B. See Liljenquist, Bomboy, Lewis, Sinclair-Smith, Felts, Lacy, Crofford, and Liddle 190, 198
Crookston, John H. See Rosse, Logue, Adams, and Crookston 31
Crum, Edward D., John R. Shainoff, Richard C. Graham, and Oscar D. Ratnoff. Fibrinogen Cleveland II. An abnormal fibrinogen with defective release of fibrinopeptide A 1308
Cuche, J.-L. See Knox, Schneider, Willis, Strandhoy, Ott, Cuche, Goldsmith, and Arnaud 501
Culbert, S. See Sharp, Culbert, Cook, Jennings, and Burr 710
Curnutte, John T., and Bernard M. Babior. Biological defense mechanisms. The effect of bacteria and serum on superoxide production by granulocytes 1662
Cushman, S. W. See Salans, Bray, Cushman, Danforth, Glennon, Horton, and Sims 848

D

Daggett, Willard M. See Weisfeldt, Armstrong, Scully, Sanders, and Daggett 1626
Dale, David C. See Fauci and Dale 240
Danforth, E., Jr. See Salans, Bray, Cushman, Danforth, Glennon, Horton, and Sims 848
Daniels, Troy E. See Talal, Sylvester, Daniels, Greenspan, and Williams 180
Daugharty, Terrance M., Iris F. Ueki, Paul F. Mercer, and Barry M. Brenner. Dynamics of glomerular ultrafiltration in the rat. V. Response to ischemic injury 105
David, John R. See Rocklin, Winston, and David 559
Davis, Bernard B. See Beck, Singh, Reed, and Davis 717
Davis, Charles E., Robert S. Robbins, Richard D. Weller, and Abraham I. Braude. Thrombocytopenia in experimental trypanosomiasis 1359
Day, Noorbibi K. See Mauer, Fish, Day, and Michael 431
DeChatelet, Lawrence R., Charles E. McCall, Linda C. McPhail, and Richard B. Johnston, Jr. Superoxide dismutase activity in leukocytes 1197
Deering, Norma. See Salen, Tint, Eliav, Deering, and Mosbach 612
DeLamater, Paul V. See Sperling, DeLamater, Phelps, Fiser, Oh, and Fisher 1159
Del Rio, Alejandro E. See Rudman, Chawla, Del Rio, and Hollins 868
DeLuca, Hector F. See Popovtzer, Robinette, DeLuca, and Holick 913
Dempsey, J. A., H. V. Forster, and G. A. doPico. Ventilatory acclimatization to moderate hypoxemia in man. The role of spinal fluid $[H^+]$ 1091
Denckla, W. Donner. Role of the pituitary and thyroid glands in the decline of minimal O_2 consumption with age 572
Derifield, Randall S. See Overbeck, Derifield, Pamnani, and Sözen 678
De Sousa, Rui C., John T. Harrington, Edmond S. Ricanati, Joel W. Shelkrot, and William B. Schwartz. Renal regulation of acid-base equilibrium during chronic administration of mineral acid 465
Detwiler, Thomas C. See Abramowitz, Stracher, and Detwiler 1493
DeVane, G. See Vandenberg, DeVane, and Yen 1750
Devlin, Henry B. See Reynolds, Thompson, and Devlin 1351
Deykin, Daniel. See Jaffe and Deykin 875
DiBona, Donald R., Lincoln C. Chen, and Geoffrey W. G. Sharp. A study of intercellular spaces in the rabbit jejunum during acute volume expansion and after treatment with cholera toxin 1300
Dickler, H. B., N. F. Adkinson, Jr., R. I. Fisher, and W. D. Terry. Lymphocytes in patients with variable immunodeficiency and panhypogammaglobulinemia. Evaluation of B and T cell surface markers and a proposed classification 834
Dixon, Frank J. See Verroust, Wilson, Cooper, Edgington, and Dixon 77
Dluhy, Robert G. See Tuck, Dluhy, and Williams 988
doPico, G. A. See Dempsey, Forster, and doPico 1091
Dousa, Thomas P., and Charles F. Code. Effect of histamine and its methyl derivatives on cyclic AMP metabolism in gastric mucosa and its blockade by an H_2 receptor antagonist 334
Drake, James C. See Chabner, Johns, Coleman, Drake, and Evans 922
Drazen, Jeffrey M., and K. Frank Austen. Effects of intravenous administration of slow-reacting substance of anaphylaxis, histamine, bradykinin, and prostaglandin $F_{2\alpha}$ on pulmonary mechanics in the guinea pig 1679
Drutz, David J., Martin J. Cline, and Louis Levy. Leukocyte antimicrobial function in patients with leprosy 380

Durack, David T., Lawrence L. Pelletier, and **Robert G. Petersdorf.** Chemotherapy of experimental streptococcal endocarditis. II. Synergism between penicillin and streptomycin against penicillin-sensitive streptococci 829

E

Edgington, Thomas S. See Verroust, Wilson, Cooper, Edgington, and Dixon 77
Ehara, Y. See Yen, Ehara, and Siler 652
Eliav, Bess. See Salen, Tint, Eliav, Deering, and Mosbach 612
Epstein, Franklin H. See Forrest, Cohen, Torretti, Himmelhoch, and Epstein 1115
Epstein, William L. See Shah, Epstein, and Riegelman 1673
Erslev, Allan J. See Martinez, Holburn, Shapiro, and Erslev 600
Essa, Noorjehan. See Boden, Essa, Owen, and Reichle 1185
Evans, Richard. See Rocklin, Pence, Kaplan, and Evans 735
Evans, Warren H. See Chabner, Johns, Coleman, Drake, and Evans 922
Eyal, Fabien G. See Shapira, Ben-Yoseph, Eyal, and Russell 59

F

Falchuk, Z. Myron, Roger L. Gebhard, Clementine Sessoms, and **Warren Strober.** An in vitro model of gluten-sensitive enteropathy. Effect of gliadin on intestinal epithelial cells of patients with gluten-sensitive enteropathy in organ culture 487
Faloona, Gerald R. See Bilbrey, Faloona, White, and Knochel 841
—. See Braaten, Faloona, and Unger 1017
Fanska, Rudy E. See Frankel, Gerich, Hagura, Fanska, Gerritsen, and Grodsky 1637
Farquhar, John W. See Olefsky, Reaven, and Farquhar 64
Farrow, Sandra S. See Johnson, Rossen, Hersh, Farrow, Butler, and Suki 270
Fauci, Anthony S., and **David C. Dale.** The effect of in vivo hydrocortisone on subpopulations of human lymphocytes 240
Favus, Murray J., Marlin W. Walling, and **Daniel V. Kimberg.** Effects of dietary calcium restriction and chronic thyroparathyroidectomy on the metabolism of [^{3}H]25-hydroxyvitamin D_3 and the active transport of calcium by rat intestine 1139
Feagler, John R. See Tollefsen, Feagler, and Majerus 211
Felig, Philip, John Wahren, Rosa Hendler, and **T. Brundin.** Splanchnic glucose and amino acid metabolism in obesity 582
—. See Ahlborg, Felig, Hagenfeldt, Hendler, and Wahren 1080
Felts, Philip W. See Liljenquist, Bomboy, Lewis, Sinclair-Smith, Felts, Lacy, Crofford, and Liddle 190, 198
Fernandez, Pedro C. See Puschett, Beck, Jelonek, and Fernandez 756
Ferris, Thomas F. See Cox, Baehler, Sharma, O'Dorisio, Osgood, Stein, and Ferris 1546
Field, Michael. See Al-Awqati, Field, and Greenough 687
—. See Kimberg, Field, Gershon, and Henderson 941
Fillet, Georges, James D. Cook, and **Clement A. Finch.** Storage iron kinetics. VII. A biologic model for reticuloendothelial iron transport 1527
Finch, Clement A. See Fillet, Cook, and Finch 1527

SUBJECT INDEX*

A

ABSTRACTS Proceedings of the 66th Annual Meeting of the American Society for Clinical Investigation, Inc., held in Atlantic City, N. J., 6 May 1974, 1755

Abetalipoproteinemia
serum abnormal lipoproteins, 440

Absorption
intestine, dietary cholesterol in hypercholesterolemia, 1062

Acetaldehyde
effect on pyridoxal phosphate metabolism in human erythrocytes, 693

Acetazolamide
stimulation of renal adenyl cyclase and urinary excretion of cyclic AMP, 122

Acetylcholine
effect on glucose-induced biphasic insulin release, 710

***N*-Acetyl-α-D-glucosaminidase**
pinocytosis in Sanfilippo B disease, 85

Acetylstrophanthidin
effect on aortic regurgitation, 1716
neurogenic vasoconstrictor effect on coronary vascular resistance, 288
and ouabain effects in cardiac muscle, reversal by specific antibody, 1655

Acid-base balance
renal regulation during chronic acid ingestion, 465

Acidosis
acute, plasma factor regulation of renal cortex ammoniagenesis, 117
distal renal tubular, urinary P_{CO_2} tensions, 669
metabolic, renal regulation of acid-base equilibrium, 465
renal hemodynamics and ammoniagenesis, glutamine extraction, 884
renal tubular, inactive red cell carbonic anhydrase B, 59

ACTH
ectopic production in lung carcinoma, 1022

Adenosine
cardiac release during induced angina, in man, 1447
effect on myocardial blood flow, 1618

Adenosine deaminase
deficiency in combined immunodeficiency disease, 1194

Adenosine monophosphate
cyclic, and cyclic GMP, plasma clearance rates and renal clearance, 163
cyclic, and cyclic GMP, sites of production and removal in plasma, 173
cyclic, and dibutyryl cyclic, effect on permeability of renal tubule, 1250
cyclic, and intestinal fluid secretion, reversal by ethacrynic acid, 687
cyclic, intestinal mucosa, effects of prostaglandins and cholera enterotoxin, 941
cyclic, metabolism in gastric mucosa, effect of histamine, 334
cyclic, net splanchnic production, effects of glucagon, in man, 198
cyclic, parathyroid hormone-induced excretion by kidney, inhibition by calcium, 717
cyclic, renal tubular interaction with thyrocalcitonin, 25-hydroxycholecalciferol, and calcium, 756
cyclic, role in control of hemolytic plaque formation by leukocytes, 13
cyclic, role in glucagon-induced changes in hepatic glycolytic enzymes and fructose diphosphatase, 44
cyclic, stimulation of urinary excretion by acetazolamide, 122
cyclic, thymocytes, effect of cholera toxin, 1149

Adenyl cyclase
renal, activation by acetazolamide, 122

Adenylate cyclase
solubilized, effects of cholera toxin, 1202

Adipose tissue
human, effect of insulin and glucose on cultured explants, 91
human, hormone-sensitive triglyceride lipase, 1124
human obesity, glucose metabolism and insulin response, 848

α-Adrenergic
stimulation, norepinephrine, suppression of vasopressin, 219

β-Adrenergic
stimulation and vasopressin release, 857

Adrenergic
control of pancreatic glucagon secretion, in man, 1284
receptors, regulation of lipolysis, in man, 338

Agarose beads
albumin-conjugated, affinity chromatography of blood, 778
albumin-conjugated, in vivo removal of blood bilirubin by affinity chromatography, 786

Age
decline of minimal oxygen consumption, role of pituitary and thyroid glands, 572
decreased lymphocyte function, 99

Agglutinins
cold, lysis of red cells in hereditary erythroblastic multinuclearity and paroxysmal nocturnal hemoglobinuria, 31

Albumin
binding by monoclonal IgM protein antibody, 932
binding to agarose beads, affinity chromatography of blood bilirubin in vivo, 786
binding to agarose beads, affinity chromatography of blood in vitro, 778
infusion, proximal tubule sodium reabsorption, role of parathyroid hormone, 501
secretion by liver, role of microtubules, 1512

Alcoholism
vitamin B_6 metabolism, 693

Aldosterone
secretion, role of saline or sodium ion, 988

Allergy
ragweed hayfever, immune response to antigen E, role of lymphocytes, 735

Alloantibody
activity and blastogenic suppression of sera from renal allograft recipients, 270

Allograft
renal, blastogenic suppression and alloantibody activity of sera, 270

Amino acid
metabolism, splanchnic and leg, effect of exercise, 1080
mixture for total parenteral nutrition, gastrointestinal disease, 904
splanchnic metabolism, in obesity, 582
stimulation of glucagon secretion, in newborn, 1159
transport, thymocytes, stimulation by cholera toxin, 1149

* Abstracts listed in the Proceedings of the 66th Annual Meeting of The American Society for Clinical Investigation, Inc., 6 May 1974, are not included in this index.

δ-Aminolevulinic acid
synthetase in human erythroblasts, 1326
Ammonia
formation by renal cortex, regulation by plasma factor in acute acidosis, 117
Ammoniagenesis
and renal glutamine extraction, 884
Amyloidosis
nonimmunoglobulin protein AS-related component, 1054
Anaphylaxis
slow-reacting substance, effects on pulmonary mechanics, guinea pig, 1679
Androgen
activity in human infants, 819
secretion by normal and abnormal testes, effect of human chorionic gonadotropin, 1
Anemia
hemolytic, role of sulfhydryl groups of erythrocyte membrane, 805
infection, inflammation, and malignancy, bone marrow erythropoiesis, 1132
Anesthesia
effect on myocardinal blood flow, 1618
Angina
human, cardiac release of adenosine, 1447
Angiopathy
diabetes mellitus, increased serum viscosity, 1071
Anosmia
male hypogonadotropic hypogonadism, pituitary-testicular responsiveness, 408
Antibiotic
levels in pericardial fluid, 7
Antibody
antialbumin, monoclonal IgM protein, 932
antibacterial, production in lower respiratory tract, 354
antihuman neutrophil, 1534
cardiac glycoside-specific, reversal of ouabain and acetylstrophanthidin effects, 1655
formation by mouse cells, separation by adherence to insolubilized endogenous hormones, 22
release, hemolytic plaque formation by leukocytes, control by vasoactive hormones, 13
Antidiuretic hormone
antagonism of ethacrynic acid, 796
Antigen
antihemophilic factor, and fibrinogen, immunofluorescent localization, human renal diseases, 1375
Antigen E
ragweed, immune response, role of lymphocytes, 735
Antiglobulin microcytotoxicity test
blastogenic suppression and alloantibody activity of sera from renal allograft recipients, 270
Antihemophilic factor
antigen, and fibrinogen, human renal diseases, 1375
Antipyrine
hepatic clearance, effect of phenobarbital, 1101
Aortic
insufficiency, coronary hemodynamics and regional myocardial metabolism, 1599
regurgitation, effects of glucagon and digitalis, 1716
Apolipoprotein B
plasma concentration in man, 1458
Ascorbic acid
effect on migration and chemotaxis of human leukocytes, 813
Atropine
effect on cholinergic modification of glucose-induced biphasic insulin release, 710

B

Bacteria
Diplococcus pneumoniae, in vivo growth and lung clearance in rats, 1320
infection, hyperactive neutrophil leukotactic response, 996
and serum, effect on superoxide production by granulocytes, 1662
Bactericidal
activity of leukocytes, in leprosy, 380
activity and phagocytosis of human monocytes, 131
Baroreceptor
and chemoreceptor reflex interaction, 1226
Basement membrane
glomerular, normal and diabetic human kidneys, biochemical properties, 403
Bicarbonate
secretion by ileum, effect of cholera-gen, 964
Bile
glucose reabsorption, 526
metabolism of cholesterol, taurocholate, lecithin, and water, effect of essential fatty acid deficiency on gallstone formation, 423
Bile acid
active and passive absorption in man, perfusion of ileum and jejunum, 1686
formation of ursodeoxycholic acid from chenodeoxycholic acid, 612
synthesis impairment, cerebrotendinous xanthomatosis, 1393
Bilirubin
albumin-bound, in vitro removal from blood by affinity chromatography, 778
albumin-bound, in vivo removal from blood of jaundiced rats by affinity chromatography, 786
Blastogenesis
in vitro lymphocyte suppression and alloantibody activity of sera from renal allograft recipients, 270
Blood
phagocytic and bactericidal properties of human monocytes, 131
removal of albumin-bound bilirubin by affinity chromatography in vivo, 786
removal of albumin-bound substances by affinity chromatography in vitro, 778
viscosity, increase in diabetes mellitus, 1071
Blood flow
acute unilateral renal failure, mechanism of oliguria, 1546
coronary, total and effective, coronary and noncoronary heart disease, 363
hepatic, and clearance of antipyrine and propranolol, effect of phenobarbital, 1101
myocardial, and coronary metabolism in aortic insufficiency, 1599
myocardial, effects of anesthesia, thoracotomy, and adenosine, 1618
and oxygen consumption, diaphragm, Kety-Schmidt technique, 1216
response to potassium in essential hypertension, 678
Bone
crystal maturation in human renal osteodystrophy, 52
osteoclast-activating factor, isolation from human leukocytes, 1473
pathology in hyperparathyroidism due to chronic renal failure, effects of calcium, phosphorus, and hydrogen ion, 256
Bone marrow
erythropoiesis, anemia of infection, inflammation, and malignancy, 1132
lymphocyte subpopulations, effect of corticosteroids, 565
lymphocytes, cell surface markers in variable immunodeficiency and panhypogammaglobulinemia, 834
lymphocytes, increase in peripheral blood, Sjögren's syndrome, 180
stem cell defect, cyclic neutropenia, grey collie syndrome, 950
thalassemia, translational control of hemoglobin synthesis, 955

Bradykinin
effect on pulmonary mechanics, guinea pig, 1679
Brain
calcium metabolism, acute renal failure, role of parathyroid hormone, 387

C

Calcium
effect on hyperparathyroidism in chronic renal failure, 256
inhibition of renal action of parathyroid hormone, 717
metabolism of brain, acute renal failure, role of parathyroid hormone, 387
renal tubular interaction with thyrocalcitonin, cyclic AMP, and 25-hydroxycholecalciferol, 756
transport and 25-hydroxyvitamin D_3 metabolism by intestine, effect of thyroparathyroidectomy, 1139
Carbohydrate
and lipid metabolism in hyperlipoproteinemia, effects of weight reduction, 64
relation to glucagon in chronic renal failure, 841
Carbonate
decrease in bone crystal, human renal osteodystrophy, 52
Carbonic anhydrase B
red cell, inactive mutant in familial renal tubular acidosis, 59
Carcinoma
lung, ectopic ACTH production, 1022
Cardiology
coronary hemodynamics and cardiac metabolism in aortic insufficiency, 1599
effect of free fatty acids on myocardial oxygen consumption and ischemic injury in norepinephrine infusion, 1290
effects of anesthesia, thoracotomy, and adenosine on myocardial blood flow, 1618
effects of dobutamine on left ventricular performance, coronary dynamics, and cardiac output, 1265
effects of glucagon and digitalis on aortic regurgitation, 1716
electrical dose and body weight, ventricular defibrillation with precordial electrodes, 310
incomplete relaxation between beats after myocardial hypoxia and ischemia, 1627
interaction of baroreceptor and chemoreceptor reflexes, 1226
neurogenic vasoconstrictor effect of digitalis and acetylstrophanthidin on coronary vascular resistance, 288
release of adenosine by human heart during induced angina, 1447
reversal of ouabain and acetylstrophanthidin effects in myocardium by specific antibody, 1655
total and effective coronary blood flow in coronary and noncoronary heart disease, 363
Cartilage
human articular, neutral proteases and cathepsin D, 1044
Catecholamines
effect on pancreatic glucagon secretion, in man, 1284
Cathepsin D
and neutral proteases in human articular cartilage, 1044
Cations
urinary, during extracellular volume expansion, effect of glucose, 1424
Cellular hypersensitivity
activation of human blood monocytes by sensitized lymphocytes, 559
Cerebrospinal fluid
role of pH in ventilatory acclimatization to hypoxemia, 1091
Cerebrotendinous xanthomatosis
bile acid synthesis impairment, 1193
chenodeoxycholic acid therapy and formation of ursodeoxycholic acid, 612
Chemoreceptor
and baroreceptor reflex interaction, 1226
Chemotaxis
defect in Fletcher factor deficiency 622
human leukocytes, effect of ascorbic acid, 813
leukocyte, role of IgG and IgM rheumatoid factor in induction from complement, 1503
stimulation of human neutrophil glucose metabolism, 591
Chemotherapy
streptomycin and penicillin synergism in streptococcal endocarditis, 829
Chenodeoxycholic acid
active and passive absorption by human ileum and jejunum, 1686
therapy and formation of ursodeoxycholic acid, 612
Childhood
familial hypercholesterolemia, 1237
Chinese hamster
genetically diabetic, abnormal secretion of insulin and glucagon by pancreas, 1637
Chloride
secretion by intestine, cyclic AMP-mediated, effect of ethacrynic acid, 687
Cholecalciferol
25-hydroxy-, metabolism, and calcium transport by intestine, effect of thyroparathyroidectomy, 1139
Cholera
enterotoxin and prostaglandins, effects on intestinal mucosal cyclic AMP, 941
reversal of cyclic AMP-mediated intestinal fluid secretion by ethacrynic acid, 687
toxin, effect on bicarbonate secretion by ileum, 964
toxin, effect on thymocytes, 1149
toxin, effects on solubilized adenylate cyclase, 1202
toxin, and volume expansion, effects on jejunal intercellular spaces, 1300
Cholestasis
maternal, effect on fetal steroid metabolism, 1709
Cholesterol
biliary excretion, effect of essential fatty acid deficiency on gallstone formation, 423
side chain incomplete degradation, cerebrotendinous xanthomatosis, 1393
Cholesterolemia
hyper-, familial type II hyperlipoproteinemia, in childhood, 1237
hyper-, type II, intestinal absorption of dietary cholesterol, 1062
Chromatography
affinity, abnormal human intrinsic factor, 1274
affinity, removal of bilirubin and albumin-bound substances from blood in vitro, 778
affinity, removal of bilirubin from blood of jaundiced rats, in vivo, 786
Coagulation
defect in Fletcher factor deficiency, 622
effect of hereditary deficiency of sixth component of complement, 554
thrombocytopenia in trypanosomiasis, 1359
Cold
effect on metabolism and microsomal binding of thyroxine and triiodothyronine, 980
Collagen
glomerular basement membrane, normal and diabetic human kidneys, 403
structural requirement for platelet aggregation, 875
Collagenase
human platelet, 1647
Complement
activation, decreased alternate pathway, serum heat-labile opsonins in systemic lupus erythematosus, 343

depletion in nephrotoxic nephritis, effect on macromolecular uptake, 431
glomerular components in human glomerulonephritis, 77
hereditary deficiency of sixth component, effect on hemostasis, 554
hereditary deficiency of sixth component, immunochemical, biologic, and family studies, 544
lysis of red cells in hereditary erythroblastic multinuclearity and paroxysmal nocturnal hemoglobinuria, 31
metabolism of third component and glycine-rich beta glycoprotein in hypocomplementemia, 1578
role of IgG and IgM rheumatoid factor in induction of leukocyte chemotaxis, 1503

Coronary
blood flow, total and effective, coronary and noncoronary heart disease, 363
dynamics, effects of dobutamine, 1265
vascular resistance, neurogenic vasoconstrictor effect of digitalis, 288

Corticosteroids
effect on human lymphocyte subpopulations, 565

Cortisol
gestation-dependent effects on fetal lung, 1518

Crystallography
structure of deoxy form of hemoglobin San Diego, 329

Cyanide
effect on feedback control of glomerular filtration rate, 1695

Cystine
uptake by cystinotic and normal fibroblasts, 1003

Cytidine arabinoside
inactivation by cytidine deaminase, myelocytic leukemia, 922

Cytidine deaminase
isolation from leukemic granulocytes, 922

D

Dead space
volume in diffuse obstructive pulmonary syndromes, 1178

Defibrillation
ventricular, precordial electrodes, electrical dose and body weight, 310

Diabetes
abnormal secretion of insulin and glucagon by pancreas, 1637
biochemistry of human glomerular basement membrane, 403
chronic alloxan, effect of insulin on alpha cell response to hyperglycemia, 1017
effect of glucagon on net splanchnic cyclic AMP production, in man, 198
effects of glucagon on lipolysis and ketogenesis, in man, 190

Diabetes insipidus
induction by lithium, 1115

Diabetes mellitus
increased serum viscosity, 1071

Diaphragm
blood flow and oxygen consumption, Kety-Schmidt technique, 1216

Diarrhea
inhibition of ileal water absorption by fatty acids, 205
mechanism for, viral gastroenteritis, piglets, 1335

Diet
cholesterol, intestinal absorption in hypercholesterolemia, 1062

Digitalis
effect on aortic regurgitation, 1716
neurogenic vasoconstrictor effect on coronary vascular resistance, 288

Diiodotyrosine
multiple ligand-binding radioimmunoassay, 416

Dipeptide
transport system in human jejunum, 1386

Diplococcus pneumoniae
in vivo bacterial growth and lung clearance in rats, 1320

Dobutamine
cardiovascular effects, 1265

Dysfibrogenemia
fibrinogen Philadelphia, 600

E

Electrodes
precordial, ventricular defibrillation, electrical dose and body weight, 310

Electrolyte
and water absorption by jejunum, inhibition by oleic and ricinoleic acids, in man, 374
and water content, toad bladder, effect of natriuretic factor, 1568

Endocarditis
streptococcal, synergism between penicillin and streptomycin, 829

Endoperoxide
intermediate, prostaglandin synthesis, role in platelet release reaction, 1468

Endotoxin
stimulation of heme oxygenase in macrophages and liver, 647

Energy dose
ventricular defibrillation and body weight, precordial electrodes, 310

Enteropathy
gluten-sensitive, in vitro model, effect of gliaden on intestinal epithelial cells, 487

Enterotoxin
cholera, and prostaglandins, effects on intestinal mucosal cyclic AMP, 941

Enzyme
N-acetyl-α-D-glucosaminidase, pinocytosis in Sanfilippo B disease, 85
adenosine deaminase deficiency in combined immunodeficiency disease, 1194
adenylate cyclase, solubilized, effects of cholera toxin, 1202
alkaline phosphatase, intestinal epithelial cells in gluten-sensitive enteropathy, effect of gliaden, 487
δ-aminolevulinic acid synthetase, human erythroblasts, 1326
collagenase in human platelets, 1647
cytidine deaminase, isolation from leukemic granulocytes, 922
heme oxygenase, stimulation by endotoxin, in macrophages and liver, 647
L-hexonate dehydrogenase, reduction of glyceraldehyde by human erythrocytes, 1258
lecithin-cholesterol acyl transferase deficiency in abetalipoproteinemia, 440
red cell carbonic anhydrase B, inactive mutant in familial renal tubular acidosis, 59
superoxide dismutase activity in leukocytes, 1197
triglyceride lipase, hormone-sensitive, human adipose tissue, 1124
xanthine oxidase, reduction of ferritin iron, role of superoxide dismutase, 665

Enzymes
hepatic glycolytic, and fructose-1,6-diphosphatase, effect of glucagon in humans, 44
lysosomal, effects of cyclic nucleotides on release from human leukocytes, 297
neutral proteases and cathepsin D in human articular cartilage, 1044

Epinephrine
activation of hormone-sensitive lipase, human adipose tissue, 1124
role in regulation of human lipolysis, 338

Erythroblasts
δ-aminolevulinic acid synthetase activity, 1326

Erythrocyte
carbonic anhydrase B, inactive mutant in familial renal tubular acidosis, 59

clearance, effect of BCG-induced macrophage activation, 1742
human, cotransport of sodium and potassium, inhibition by furosemide, 745
Erythrocytes
human, effect of acetaldehyde on pyridoxal phosphate metabolism, 693
human, reduction of glyceraldehyde, hexonate dehydrogenase activity, 1258
iron, transport by reticuloendothelial cells, 1527
membrane, sulfhydryl groups, relation to glycolysis and hemolytic anemia, 805
Erythrocytosis
and high oxygen affinity, hemoglobin San Diego, 320
Erythropoiesis
bone marrow, anemia of infection, inflammation, and malignancy, 1132
Estrogen
effect on prolactin secretion in hypogonadal women, 652
exogenous, and progestin, effects on pituitary responsiveness to synthetic luteinizing hormone-releasing factor, 1750
secretion by normal and abnormal testes, effect of human chorionic gonadotropin, 1
Ethacrynic acid
effects on osmotic water permeability of collecting tubule, 796
reversal of cyclic AMP-mediated intestinal fluid secretion, 687
Exercise
splanchnic and leg metabolism of glucose, free fatty acids, and amino acids, 1080

F

Factor
intrinsic, abnormal human, 1274
osteoclast-activating, in human leukocytes, 1473
Factor VIII
antigen, and fibrinogen, immunofluorescent localization, human renal diseases, 1375
Fatty acids
deficiency, effect on biliary metabolism of taurocholate, lecithin, cholesterol, and water, 423
granulocyte membrane, effect of phagocytosis, 726
inhibition of ileal water absorption, 205
oleic and ricinoleic, inhibition of jejunal water and electrolyte absorption, in man, 374
Ferritin
iron reduction by xanthine oxidase, role of superoxide dismutase, 665
Fetus
human, lung cytoplasmic receptor for glucocorticoids, 477
lung, gestation-dependent effects of cortisol, 1518
steroid metabolism, effect of maternal intrahepatic cholestasis, 1709
Fibrils
nonimmunoglobulin protein AS component, amyloidosis, 1054
Fibrinogen
and antihemophilic factor, immunofluorescent localization, human renal diseases, 1375
Fibrinogen Cleveland II
defective release of fibrinopeptide A, 1308
Fibrinogen Philadelphia
hereditary hypodysfibrinogenemia associated with hypercatabolism, 600
Fibrinolysis
defect in Fletcher factor deficiency, 622
Fibrinopeptide A
defective release in fibrinogen Cleveland II, 1308
Filtration rate
glomerulus, effect of furosemide, triflocin, and cyanide on feedback control, 1695
nephron, superficial and juxtamedullary, during saline load, 971
Fletcher factor deficiency
abnormal plasma coagulation, fibrinolysis, chemotaxis, and kinin generation, 622
Fluoride
elimination of granulocyte release of transcobalamin III, vitamin B_{12}-binding capacity, 228
Food
heme and nonheme iron absorption, in man, 247
Free fatty acids
effect on myocardial oxygen consumption and ischemic injury in norepinephrine infusion, 1290
effects on pancreatic glucagon secretion, in man, 1441
metabolism, splanchnic and leg, effect of exercise, 1080
Fructose diphosphatase
and hepatic glycolytic enzymes, effect of glucagon in humans, 44
Furosemide
effect on feedback control of glomerular filtration rate, 1695
inhibition of cotransport of sodium and potassium, human erythrocyte, 745

G

Galactose
effect on glucose exchange across liver cell membranes, 634
Gallstones
chenodeoxycholic acid therapy and formation of ursodeoxycholic acid, 612
effect of essential fatty acid deficiency on biliary excretion of cholesterol, taurocholate, lecithin, and water, 423
Gastroenteritis
viral, mechanism of diarrhea, piglets, 1335
Gastrointestinal disease
amino acid mixture for total parenteral nutrition, 904
Genetic
defect, familial hypercholesterolemia in childhood, 1237
heterozygous detection of combined immunodeficiency disease, adenosine deaminase deficiency, 1194
Gentamicin
in pericardial fluid, 7
Gestation
role in effect of cortisol on fetal lung, 1518
Gliaden
effect on intestinal epithelial cells in gluten-sensitive enteropathy, 487
γ-Globulin
aggregated, effect on lymphocyte transformation, 1108
Glomerulonephritis
glomerular complement components, 77
pathophysiology in rats, 1402
Glomerulus
biochemistry of basement membrane, normal and diabetic human kidneys, 403
dynamics of ultrafiltration in acute renal failure, 105
filtration rate, distal tubular feedback in autoregulation, 516
filtration rate, effect of furosemide, triflocin, and cyanide on feedback control, 1695
filtration rate, proportional reduction of sodium intake, chronic uremia, 1736
filtration rate, relationship to maturation of superficial nephrons, 279
mesangial macromolecular uptake in nephrotoxic nephritis, 431
Glucagon
chronic renal failure, 841
effect on aortic regurgitation, 1716
effect on human hepatic glycolytic enzymes and fructose-1,6-diphosphatase, 44
effects on lipolysis and ketogenesis in man, 190

effects on net splanchnic cyclic AMP in man, 198
and insulin, abnormal secretion by pancreas, in diabetes, 1637
response to hyperglycemia, effect of insulin, chronic alloxan diabetes, 1017
secretion, adrenergic control, in man, 1284
secretion, effects of free fatty acids, in man, 1441
spontaneous and amino acid-stimulated secretion, in newborn, 1159
Glucocorticoid
cytoplasmic receptor, lung of human fetus and neonate, 477
Gluconeogenesis
effect of glucagon on human hepatic glycolytic enzymes and fructose diphosphatase, 44
effect of prolonged exercise, 1080
renal cortex, regulation by plasma factor in acute acidosis, 117
Glucose
effect of insulin on alpha cell response to, in chronic alloxan diabetes, 1017
effect on transepithelial potential difference across proximal tubule, 454
effect on urinary cations during extracellular volume expansion, 1424
homeostasis in newborn, role of glucagon, 1159
and insulin, effects on metabolism of human adipose tissue in culture, 91
intraduodenal, effect on immunoreactive secretin and insulin, 1185
metabolism by human neutrophils, stimulation by chemotactic factors, 591
metabolism and insulin response, human adipose tissue in obesity, 848
metabolism, splanchnic and leg, effect of exercise, 1080
oxidation, activation of human blood monocytes by sensitized lymphocytes, 559
reabsorption from bile, 526
splanchnic metabolism, in obesity, 582
transport by liver membranes, 634
Glutamine
renal extraction, and ammoniagenesis, 884
Gluten-sensitive enteropathy
in vitro model, effect of gliaden on intestinal epithelial cells, 487
Glyceraldehyde
reduction by human erythrocytes, hexonate dehydrogenase activity, 1258
Glycolysis
role of sulfhydryl groups of erythrocyte membrane, 805
β-Glycoprotein
glycine-rich, and third component of complement, metabolism in hypocomplementemia, 1578
urinary, myelocytic leukemia, 868
Gonadotropin
activity in human infants, 819
deficiency in male hypogonadism, pituitary-testicular responsiveness, 408
human chorionic, effect on androgen and estrogen secretion by normal and abnormal human testes, 1
hypogonadal women, effect of estrogen, 652
Granulocytes
effect of bacteria and serum on superoxide production, 1662
membrane fatty acids, effect of phagocytosis, 726
myelocytic leukemia, isolation of cytidine deaminase, 922
release of transcobalamin III, effect of lithium and fluoride on serum vitamin B_{12}-binding capacity, 228
Grey collie syndrome
cyclic neutropenia, stem cell defect, 950
Griseofulvin
accumulation in skin, role of sweat, 1673
Guanosine monophoshate
cyclic, and cyclic AMP, plasma clearance rates and renal clearance, 163
cyclic, and cyclic AMP, sites of production and removal in plasma, 173

H

Hanssen technique
effect of saline load on superficial and juxtamedullary nephron function, 971
Hematology
abnormal human intrinsic factor, 1274
δ-aminolevulinic acid synthetase, human erythroblasts, 1326
collagen structure and platelet aggregation, 875
defective release of fibrinopeptide A in fibrinogen Cleveland II, 1308
effect of aggregated gamma globulin in lymphocyte transformation, 1108
effect of phenylbutazone on warfarin stereochemistry, 1607
endoperoxide intermediate in prostaglandin synthesis, role in platelet release reaction, 1468
erythrocytosis and high oxygen affinity, hemoglobin San Diego, 320
fibrinogen Philadelphia, hereditary hypodysfibrinogenemia, 600
Fletcher factor deficiency, abnormal plasma coagulation, fibrinolysis, chemotaxis, and kinin generation, 622
hereditary deficiency of sixth component of complement, effect on hemostasis, 554
hereditary deficiency of sixth component of complement, immunochemical, biologic, and family study, 544
human platelet collagenase, 1647
increased serum viscosity in diabetes mellitus, 1071
induction of platelet release reaction by phytohemagglutinin, 211
inhibitor of histamine release, human leukocytes, 1343
myosin proteolysis during platelet storage, 1493
reticuloendothelial iron transport, 1527
stem cell defect, cyclic neutropenia, grey collie syndrome, 950
sulfhydryl groups of erythrocyte membrane, relation to glycolysis and hemolytic anemia, 805
thrombocytopenia in trypanosomiasis, 1359
translational control, hemoglobin synthesis in thalassemic bone marrow, 955
X-ray crystallographic structure of deoxy form of hemoglobin San Diego, 329
Heme oxygenase
stimulation by endotoxin, in macrophages and liver, 647
Hemodialysis
and hyperglucagonemia, chronic renal failure, 841
Hemodynamics
and ammoniagenesis, renal glutamine extraction, 884
blood flow and oxygen consumption, diaphragm, Kety-Schmidt technique, 1216
coronary, and cardiac metabolism in aortic insufficiency, 1599
effects of glucagon and digitalis on aortic regurgitation, 1716
incomplete relaxation between beats after myocardial hypoxia and ischemia, 1627
interaction of baroreceptor and chemoreceptor reflexes, 1226
neurogenic vasoconstrictor effect of digitalis and acetylstrophanthidin on coronary vascular resistance, 288
vasodilator responses to potassium in essential hypertension, 678

Hemoglobin
synthesis, thalassemic bone marrow, translational control, 955
Hemoglobin San Diego
β109(G11)Val → Met, crystal structure of deoxy form, 329
erythrocytosis, high oxygen affinity, 320
Hemoglobinuria
paroxysmal nocturnal, immune lysis of red cells, 31
Hemostasis
collagen structure and platelet aggregation, 875
effect of hereditary deficiency of sixth component of complement, 554
Hereditary erythroblastic multinuclearity
immune lysis of red cells, 31
L-Hexonate dehydrogenase
reduction of glyceraldehyde by human erythrocytes, 1258
Histamine
effect on cyclic AMP metabolism in gastric mucosa, 334
effects on pulmonary mechanics, guinea pig, 1679
releasing factor, human leukocytes, 1343
Hormone
ACTH, ectopic production in lung carcinoma, 1022
activation of triglyceride lipase, human adipose tissue, 1124
cortisol, gestation-dependent effects on fetal lung, 1518
estrogen, effect on prolactin secretion in hypogonadal women, 652
glucagon in chronic renal failure, 841
glucagon secretion, adrenergic control, in man, 1284
glucagon secretion, effects of free fatty acids, in man, 1441
glucagon, spontaneous and amino acid-stimulated secretion, in newborn, 1159
histamine, catecholamines, and prostaglandins, control of hemolytic plaque formation by leukocytes, 13
histamine, catecholamines, and prostaglandins, insolubilized, adherence of specific antibody-forming mouse cells, 22
hydrocortisone, effects on human lymphocytes, 240
insulin biphasic release, effect of cholinergic agents, 710
insulin, effect on alpha cell response to hyperglycemia, chronic alloxan diabetes, 1017
insulin and glucagon, abnormal secretion by pancreas, in diabetes, 1637
insulin kinetics, three compartment model, in man, 1481
insulin and secretin, immunoreactive, effect of intraduodenal HCl and glucose, 1185
parathyroid, effect of calcium on renal response, 717
parathyroid, immunochemical localization in ectopic malignant tumors, 1726
parathyroid, role in calcium metabolism of brain in acute renal failure, 387
parathyroid, role in 25-hydroxycholecalciferol effect on renal handling of phosphorus, 913
parathyroid, role in proximal tubule sodium reabsorption after albumin infusion, 501
prolactin, hypothalamic-pituitary function, 1588
testosterone in human infants, 819
thyrotropin, metabolic clearance and production rates, 895
triiodothyronine binding, isolated nuclei of rat liver and GH_1 cells, 656
triiodothyronine nuclear binding capacity, cross-reactivity with thyroxine, 768
triiodothyronine and thyroxine metabolism, effect of cold, microsomal and tissue binding, 980
vasopressin, mechanism of suppression during alpha adrenergic stimulation with norepinephrine, 219
vasopressin release, beta adrenergic stimulation with isoproterenol, 857
Hydrochloric acid
intraduodenal, effect on immunoreactive secretin and insulin, 1185
Hydrocortisone
effects on human lymphocytes, 240
25-Hydroxycholecalciferol
effect on renal handling of phosphorus, role of parathyroid hormone, 913
metabolism and calcium transport by intestine, effect of thyroparathyroidectomy, 1139
renal tubular interaction with thyrocalcitonin, cyclic AMP, and calcium, 756
Hypercholesterolemia
familial, in childhood, 1237
Hyperglycemia
effect of insulin on alpha cell response to, chronic alloxan diabetes, 1017
Hyperlipoproteinemia
lipid and carbohydrate metabolism, effects of weight reduction, 64
Hyperoxia
effect on lung protein synthesis and granular pneumocyte ultrastructure, 705
Hyperprolactinemia
hypothalamic-pituitary function, 1588
Hypertension
essential, vasodilator responses to potassium, 678
Hypocomplementemia
metabolism of third component of complement and glycine-rich beta glycoprotein, 1578
Hypogammaglobulinemia
and variable immunodeficiency, B and T lymphocyte cell surface markers, 834
Hypogonadism
female, effect of estrogen on prolactin secretion, 652
male hypogonadotropic, pituitary-testicular responsiveness, 408
Hypothalamus
and pituitary function in hyperprolactinemia, 1588
Hypoxia
and ischemia, myocardial, incomplete relaxation between beats, 1627
ventilatory acclimatization, role of spinal fluid pH, 1091

I

Ileum
active and passive bile acid absorption, in man, 1686
bicarbonate secretion, effect of choleragen, 964
water absorption, inhibition by intraluminal fatty acids, 205
Immune response
decreased lymphocyte function in aged humans, 99
Immunity
cellular and humoral, in rabbit respiratory tract to *Pseudomonas* lipopolysaccharide, 1351
Immunodeficiency disease
adenosine deaminase deficiency, 1194
variable, and panhypogammaglobulinemia, B and T lymphocyte cell surface markers, 834
Immunoglobulins
glomerular deposits in human glomerulonephritis, 77
IgG, IgM rheumatoid factor and complexes, induction of leukocyte chemotactic factor from complement, 1503
IgG and IgM sensitized erythrocytes, effect of BCG-induced macrophage activation on clearance, 1742
interaction with liposomes, 536
monoclonal IgM antialbumin antibody, 932
skin, systemic lupus erythematosus, association with renal disease, 1434

synthesis and secretion, lower respiratory tract, 354
Immunology
activation of human blood monocytes by sensitized lymphocytes, 559
blastogenic suppression and alloantibody activity of sera from renal allograft recipients, 270
effects of antihuman neutrophil antibodies, 1534
hereditary deficiency of sixth component of complement, 544
localization of parathyroid hormone in malignant ectopic hyperparathyroidism, 1726
nonimmunoglobulin protein AS component of fibrils in amyloidosis, 1054
pathophysiology of glomerulonephritis, 1402
response to ragweed antigen E, role of lymphocytes, 735
Immunosuppression
in vivo effect of hydrocortisone on human lymphocytes, 240
Indicator dilution technique
glucose exchange across liver cell membranes, 634
Infancy
human, hypophyso-gonadal function, 819
Infection
anemia, bone marrow erythropoiesis, 1132
bacterial, hyperactive neutrophil leukotactic response, 996
bacterial, lower respiratory tract, immunoglobulin and antibody synthesis and secretion, 354
Diplococcus pneumoniae, in vivo growth and lung clearance in rats, 1320
effect of BCG-induced macrophage activation on erythrocyte clearance, 1742
systemic lupus erythematosus, serum heat-labile opsonins, 343
thrombocytopenia in trypanosomiasis, 1359
viral gastroenteritis, mechanism of diarrhea, piglets, 1335
Inflammation
anemia, bone marrow erythropoiesis, 1132
Insulin
biphasic release, effect of cholinergic agents, 710
effect on alpha cell response to hyperglycemia, chronic alloxan diabetes, 1017
and glucagon, abnormal secretion by pancreas, in diabetes, 1637
and glucose, effects on metabolism of human adipose tissue in culture, 91
immunoreactive, effects of intraduodenal HCl and glucose, 1185
kinetics, three compartment model, in man, 1481
resistance in obesity, metabolic effects of weight reduction, 64
response and glucose metabolism, human adipose tissue in obesity, 848
role in splanchnic glucose and amino acid metabolism in obesity, 582
Intestine
absorption of dietary cholesterol in hypercholesterolemia, 1062
active and passive bile acid absorption, perfusion of ileum and jejunum, human, 1686
cyclic AMP, effects of prostaglandins and cholera enterotoxin, 941
effect of thyroparathyroidectomy on 25-hydroxyvitamin D_3 metabolism and calcium transport, 1139
fluid secretion, cyclic AMP-mediated, reversal by ethacrynic acid, 687
glucose and HCl, effect on immunoreactive secretin and insulin, 1185
gluten-sensitive enteropathy, effect of gliaden on epithelial cells, 487
Intravenous feeding
amino acid mixture for gastrointestinal disease, 904
Intrinsic factor
abnormal human, 1274
Inulin
permeability in renal tubule, effect of cyclic AMP, 1250
Iodothyronines
tissue and microsomal binding, effect of cold, 980
Iodotyrosine
multiple ligand-binding radioimmunoassay, 416
Iron
ferritin reduction by xanthine oxidase, role of superoxide dismutase, 665
heme and nonheme, measurement of absorption from whole diet, in man, 247
reticuloendothelial transport, 1527
Ischemia
acute renal failure, dynamics of glomerular ultrafiltration, 105
and hypoxia, myocardial, incomplete relaxation between beats, 1627
myocardial, release of adenosine, in man, 1442
Isoproterenol
β-adrenergic stimulation and vasopressin release, 857

J

Jaundice
removal of blood albumin-bound bilirubin by affinity chromatography, 786
Jejunum
human, active and passive bile acid absorption, 1686
human, dipeptide transport system, 1368
human, inhibition of water and electrolyte absorption by oleic and ricinoleic acids, 374
rabbit, effect of volume expansion and cholera toxin on intercellular spaces, 1300

K

Ketogenesis
and lipolysis, effects of glucagon, in man, 190
Ketone-body
metabolism, in obesity, 508
Kety-Schmidt technique
blood flow and oxygen consumption of diaphragm, 1216
Kidney
acute renal failure, calcium metabolism of brain, role of parathyroid hormone, 387
acute renal failure, dynamics of of glomerular filtration, 105
acute renal failure, unilateral, mechanism of oliguria, 1546
antihemophilic factor antigen and fibrinogen in human renal diseases, 1375
chronic renal failure, effects of dietary calcium, phosphorus, and hydrogen ion on hyperparathyroidism, 256
chronic renal failure, hyperglucagonemia, 841
chronic renal failure, urea metabolism, 1385
distal tubular feedback in autoregulation of nephron glomerular filtration rate, 516
effect of cyclic AMP and dibutyryl cyclic AMP on permeability of renal tubule, 1250
effect of ethacrynic acid on osmotic water permeability of collecting tubule, 796
effect of furosemide, triflocin, and cyanide on feedback control of glomerular filtration rate, 1695
effect of glucose on urinary cations during extracellular volume expansion, 1424
effect of 25-hydroxycholecalciferol on renal handling of phosphorus, role of parathyroid hormone, 913
effect of natriuretic factor on sodium transport, water, and electrolyte content, pyruvate oxidation by toad bladder, 1568
effect of vasopressin on phosphate transport in proximal tubule, 660
glomerular complement components in human glomerulonephritis, 77

glomerular mesangium, macromolecular uptake in nephrotoxic nephritis, 431
hemodynamics and ammoniagenesis, extraction of glutamine, 884
inhibition by calcium of renal response to parathyroid hormone, 717
lithium-induced diabetes insipidus, 1115
maturation of superficial nephrons and total renal function, 279
natriuretic factor in urine of chronic uremia, absence in nephrotic uremia, 1559
nephron stop-flow pressure response to obstruction, 1497
normal and diabetic, human, biochemistry of glomerular basement membrane, 403
pathogenesis of distal renal tubular acidosis, 669
pathophysiology of glomerulonephritis, 1402
proportional reduction of sodium intake in chronic uremia, 1736
proximal tubule sodium reabsorption after albumin infusion, role of parathyroid hormone, 501
regulation of renal cortex ammoniagenesis, plasma factor in acute acidosis, 117
renal metabolism of plasma cyclic AMP and cyclic GMP, 163
renal regulation of acid-base equilibrium during chronic acid ingestion, 465
sodium chloride, urea, and water transport in thin ascending limb of Henle, 393
sodium and phosphate transport in proximal tubule, 143
superficial and juxtamedullary nephron function during saline load, 971
transepithelial potential difference across proximal tubule, 454
transplantation, blastogenic suppression and alloantibody activity of serum, 270
tubular interactions of thyrocalcitonin, cyclic AMP, 25-hydroxycholecalciferol, and calcium, 756

Kinetics
dipeptide transport, human jejunum, 1368
insulin, three compartment model, in man, 1481

L

Lecithin
biliary excretion, effect of essential fatty acid deficiency on gallstone formation, 423

Lecithin-cholesterol acyl transferase
deficiency in abetalipoproteinemia, 440

Leprosy
leukocyte antimicrobial function, 380

Leukemia
myelocytic, isolation of cytidine deaminase from granulocytes, 922
myelocytic, urinary glycoproteins, 868

Leukocyte
antimicrobial function, in leprosy, 380
hemolytic plaque formation, control by vasoactive hormones, 13
human, effect of ascorbic acid on migration and chemotaxis, 813
human, inhibitor of histamine release, 1343
human, lysosomal enzyme release, effects of cyclic nucleotides, 297
human, osteoclast activating factor, 1473
polymorphonuclear, role of IgG and IgM rheumatoid factor in induction of chemotactic factor from complement, 1503
specific antibody-forming, separation by adherence to insolubilized endogenous hormones, 22
superoxide dismutase activity, 1197

Leukotaxis
neutrophils, bacterial infection, 996

Limb of Henle
thin ascending, transport of sodium chloride, urea, and water, 393

Lipase
triglyceride, hormone-sensitive, human adipose tissue, 1124

Lipid
and carbohydrate metabolism in hyperlipoproteinemia, effects of weight reduction, 64
composition of granulocyte membrane, effect of phagocytosis, 726
metabolism, culture of human adipose tissue, effects of insulin and glucose, 91

Lipid storage disease
β-sitosterolemia and xanthomatosis, 1033

Lipolysis
and ketogenesis, effects of glucagon, in man, 190
role of adrenergic receptors, in man, 338

Lipopolysaccharide
Pseudomonas, immunity in rabbit respiratory tract, 1351

Lipoprotein B
apo-, plasma concentration in man, 1258

Lipoproteinemia
hyper-, familial type II, in childhood, 1237

Lipoproteins
abnormal, in abetalipoproteinemia, 440

Liposome
interaction with immunoglobulin, 536

Lithium
increased granulocyte release of transcobalamin III, vitamin B_{12}-binding capacity, 228
induction of diabetes insipidus, 1115

Liver
biliohepatic circulation of glucose, 526
glucose exchange across cell membranes, 634
heme oxygenase, stimulation by endotoxin, 647
production of cyclic AMP, effects of glucagon, in man, 198
secretion of albumin and other proteins, role of microtubules, 1512

Lung
carcinoma, ectopic ACTH production, 1022
clearance and in vivo growth, *Diplococcus pneumoniae*, 1320
fetal, gestation-dependent effects of cortisol, 1518
human fetus and neonate, cytoplasmic receptor for glucocorticoids, 477
protein synthesis and granular pneumocyte ultrastructure, effect of hyperoxia, 705
volumes in diffuse obstructive pulmonary syndromes, 1178

Lupus erythematosus
systemic, serum heat-labile opsonins, 343
systemic, skin immunoglobulins, association with renal disease, 1434

Luteinizing hormone-releasing factor
synthetic, pituitary responsiveness to, effects of exogenous estrogen and progestin, 1750

Lymphocytes
decreased function in aged humans, 99
human, in vivo effects of hydrocortisone, 240
human, sensitized, activation of monocytes, 559
role in immune response to ragweed antigen E, 735
T- and B-cell surface markers, variable immunodeficiency and panhypogammaglobulinemia, 834
T and B, in peripheral blood and tissue lesions, Sjögren's syndrome, 180
T and B subpopulations, effect of corticosteroids, 565
transformation, effect of aggregated human gamma globulin, 1108

Lysis
red cells, hereditary erythroblastic multinuclearity and paroxysmal nocturnal hemoglobinuria, 31

Lysosomes
human leukocytes, effects of cyclic nucleotides on enzyme release, 297

M

Macrophage
activation, BCG-induced, effect on erythrocyte clearance, 1742
antimicrobial function, in leprosy, 380
effects of antihuman neutrophil antibodies, 1534
heme oxygenase, stimulation by endotoxin, 647
Magnesium
increase in bone crystal, human renal osteodystrophy, 52
Malignancy
anemia, bone marrow erythropoiesis, 1132
Mannitol
permeability in renal tubule, effect of cyclic AMP, 1250
Membrane
artificial, interaction of immunoglobulin with liposomes, 536
erythrocyte, sulfhydryl groups, relation to glycolysis and hemolytic anemia, 805
granulocyte, effect of phagocytosis on fatty acids, 726
Mesangium
glomerular, macromolecular uptake in nephrotoxic nephritis, 431
Messenger ribonucleic acid
translational control, hemoglobin synthesis in thalassemic bone marrow, 955
Metabolic clearance
and production rates, human thyrotropin, 895
Metabolism
cardiac, and coronary hemodynamics, in aortic insufficiency, 1599
effect of glucagon on lipolysis and ketogenesis, in man, 190
effect of glucagon on net splanchnic cyclic AMP production, in man, 198
effect of natriuretic factor on pyruvate oxidation by toad bladder, 1568
fetal steroid, effect of maternal intrahepatic cholestasis, 1709
food iron absorption in man, two-pool radioactive extrinsic tag measurement, 247
glucose and amino acids, splanchnic, in obesity, 582
glucose, free fatty acids, and amino acids, splanchnic and leg, effect of exercise, 1080
glucose, human neutrophils, stimulation by chemotactic factors, 591
insulin kinetics, three compartment model, in man, 1481
ketone-bodies, in obesity, 508
reduction of glyceraldehyde by human erythrocytes, L-hexonate dehydrogenase activity, 1258
renal regulation of acid-base equilibrium during chronic acid ingestion, 465
third component of complement and glycine-rich glycoprotein in hypocomplementemia, 1578
triiodothyronine and thyroxine, effect of cold, microsomal and tissue binding, 980
urea, chronic renal failure, 1385
Micropuncture
distal tubular feedback in autoregulation of nephron glomerular filtration rate, 516
pathophysiology of glomerulonephritis, 1402
role of parathyroid hormone in proximal tubule sodium reabsorption after albumin infusion, 501
transepithelial proximal difference across proximal tubule, 454
Microtubules
human leukocytes, relationship to lysosomal enzyme release, 297
role in hepatic secretion of albumin and other protein, 1512
Migration
human leukocytes, effect of ascorbic acid, 813
Mitogen
pokeweed, decreased lymphocyte response in aged humans, 99
Monocytes
human, activation by sensitized lymphocytes, 559
human, in vivo effects of hydrocortisone, 240
human, phagocytic and bactericidal properties, 131
Mucopolysaccharidosis
Sanfilippo B disease, pinocytosis of *N*-acetyl-α-D-glucosaminidase, 85
Mucosa
gastric, effect of histamine on cyclic AMP metabolism, 334
Myocardial
blood flow, total and effective, coronary and noncoronary heart disease, 363
hypoxia and ischemia, incomplete relaxation between beats, 1627
ischemia, release of adenosine, in man, 1447
oxygen consumption and ischemic injury in norepinephrine infusion, role of free fatty acids, 1290
reversal of ouabain and acetylstrophanthidin effects by specific antibody, 1655
Myosin
proteolysis during platelet storage, 1493

N

Natriuretic factor
effect on proportional reduction of sodium intake, chronic uremia, 1736
effects on sodium transport, water, and electrolytes, pyruvate oxidation by toad bladder, 1568
presence in urine of chronic uremia, absence in nephrotic uremia, 1559
Neonate
human, lung cytoplasmic receptor for glucocorticoids, 477
Neoplastic diseases
urinary glycoprotein, 868
Nephritis
nephrotoxic, macromolecular uptake by glomerular mesangium, 431
Nephron
filtration rate, superficial and juxtamedullary, during saline load, 971
stop-flow pressure response to obstruction, 1497
superficial, maturation, relationship to total kidney function, 279
Nephropathic cystinosis
cystine uptake by cystinotic and normal fibroblasts, 1003
Neutropenia
cyclic, stem cell defect, grey collie syndrome, 950
Neutrophils
human, effects of homologous and heterologous antibodies, 1534
human, stimulation of glucose metabolism by chemotactic factors, 591
leukotactic response to bacterial infection, 996
Newborn
spontaneous and amino acid-stimulated secretion of glucagon, 1159
Norepinephrine
alpha adrenergic stimulation, suppression of vasopressin, 219
effect on myocardial oxygen consumption and ischemic injury, role of free fatty acids, 1290
effect on oliguria in unilateral acute renal failure, 1546
Nucleotides
cyclic AMP and cyclic GMP, effects on lysosomal enzyme release from human leukocytes, 297
cyclic AMP and cyclic GMP, plasma clearance rates and renal clearance, 163
cyclic AMP and cyclic GMP, sites of production and removal in plasma, 173

Nucleus
rat liver, binding capacity for triiodothyronine, 768
rat liver and GH_1 cells, binding of triiodothyronine, 656
Nutrition
total parenteral amino acid mixture, gastrointestinal disease, 904

O

Obesity
effect of weight reduction on carbohydrate and lipid metabolism, 64
glucose metabolism and insulin response, human adipose tissue, 848
ketone-body metabolism, 508
splanchnic glucose and amino acid metabolism, 582
Obstruction
renal, nephron stop-flow pressure response, 1497
Oliguria
mechanism in unilateral acute renal failure, 1546
Opsonins
heat-labile, systemic lupus erythematosus serum, 343
Organ culture
effect of gliaden on intestinal epithelial cells in gluten-sensitive enteropathy, 487
Osmotic gradients
passive diffusion of sodium chloride, urea, and water in thin ascending limb of Henle, 393
Osteoclast
activating factor, human leukocytes, 1473
Osteodystrophy
renal, human, bone crystal maturation, 52
Ouabain
and acetylstrophanthidin effects in cardiac muscle, reversal by specific antibody, 1655
Oxygen
consumption and blood flow, diaphragm, Kety-Schmidt technique, 1216
decline of minimal consumption with age, role of pituitary and thyroid glands, 572
effect on lung protein synthesis and granular pneumocyte ultrastructure, 705
high affinity, hemoglobin San Diego, 320
myocardial consumption in norepinephrine infusion, role of free fatty acids, 1290
ventilatory acclimatization to hypoxemia, role of spinal fluid pH, 1091

P

Pancreas
abnormal secretion of insulin and glucagon in diabetes, 1637
adrenergic control of glucagon secretion, in man, 1284
effect of cholinergic agents on glucose-induced biphasic insulin release, 710
effects of free fatty acids on glucagon secretion, in man, 1441
Parathyroidectomy
effects of acetazolamide on urinary excretion of cyclic AMP and phosphate, 122
Parathyroid hormone
effect of calcium on renal response, 717
immunochemical localization in ectopic malignant tumors, 1726
role in calcium metabolism of brain in acute renal failure, 387
role in 25-hydroxycholecalciferol effect on renal handling of phosphorus, 913
role in 25-hydroxyvitamin D_3 metabolism and calcium transport by intestine, 1139
role in proximal tubule sodium reabsorption after albumin infusion, 501
Parathyroidism
hyper-, in chronic renal failure, effects of dietary calcium, phosphorus, and hydrogen ion, 256
Paroxysmal nocturnal hemoglobinuria
immune lysis of red cells, 31
P_{CO_2}
blood and urinary, pathogenesis of distal renal tubular acidosis, 669
Penicillin
and streptomycin synergism in streptococcal endocarditis, 829
Penicillin G
in pericardial fluid, 7
Pericardial fluid
antibiotic levels, 7
Permeability
renal tubule, effect of cyclic AMP and dibutyryl cyclic AMP, 1250
pH
blood and urinary, pathogenesis of distal renal tubular acidosis, 669
effect on hyperparathyroidism in chronic renal failure, 256
spinal fluid, role in ventilatory acclimatization to hypoxemia, 1091
Phagocytosis
and bactericidal properties of human monocytes, 131
effect on granulocyte membrane fatty acids, 726
effects of antihuman neutrophil antibodies, 1534
Phenobarbital
effect on blood flow and clearance of antipyrine and propranolol, 1101
Phentolamine
effect on human lipolysis, 338
Phenylbutazone
effect on warfarin stereochemistry, 1607
Phlorizin
effect on glucose exchange across liver cell membranes, 634
Phosphate
parathyroid hormone-induced excretion by kidney, inhibition by calcium, 717
transport in proximal tubule, effect of vasopressin, 660
transport in proximal tubule, relationship to sodium reabsorption, 143
urinary excretion, stimulation by acetazolamide, 122
Phosphorus
effect on hyperparathyroidism in chronic renal failure, 256
excretion by kidney, effect of 25-hydroxycholecalciferol, role of parathyroid hormone, 913
Phytohemagglutinin
decreased lymphocyte response in aged humans, 99
induction of platelet release reaction, 211
stimulation of human leukocytes, osteoclast activating factor, 1473
Pinocytosis
N-acetyl-α-D-glucosaminidase in Sanfilippo B disease, 85
Pituitary gland
and hypothalamus function in hyperprolactinemia, 1588
responsiveness to synthetic luteinizing hormone-releasing factor, effects of exogenous estrogen and progestin, 1750
role in decline of minimal oxygen consumption with age, 572
and testicular responsiveness in male hypogonadotropic hypogonadism, 408
Plant sterol
β-sitosterolemia and xanthomatosis, human lipid storage disease, 1033
Plaques
hemolytic, in vitro formation by leukocytes, control by vasoactive hormones, 13
Plasma
apolipoprotein B in man, 1458
clearance rates of cyclic nucleotides, 163
free fatty acids, effects on pancreatic glucagon secretion, in man, 1441
sites of production and removal of cyclic nucleotides, 173

Plasma factor
acute acidosis, regulation of renal cortex ammoniagenesis, 117
Plasmin
human and canine, physicochemical and biological properties, 154
Plasminogen
activation by urokinase, formation of three plasmins, 154
Platelet
aggregation, structural requirement of collagen, 875
human, presence of collagenase, 1647
release reaction and endoperoxide intermediate in prostaglandin synthesis, 1468
release reaction, induction by phytohemagglutinin, 211
storage, myosin proteolysis, 1493
Pneumocyte
granular, effect of hyperoxia on ultrastructure, 705
Polypeptide
analysis of abnormal lipoproteins in abetalipoproteinemia, 440
Polysaccharide
lipo-, *Pseudomonas*, immunity in rabbit respiratory tract, 1351
Polyuria
lithium-induced diabetes insipidus, 1115
Porphyrin
hepatic formation, stimulators and inhibitors in human sera, 1167
Post partum
human serum, inhibition of hepatic porphyrin formation, 1167
Potassium
limb vascular responses in essential hypertension, 678
and sodium cotransport, human erythrocyte, inhibition by furosemide, 745
Potential difference
transepithelial, across proximal tubule, 454
Pregnancy
effect of maternal intrahepatic cholestasis on fetal steroid metabolism, 1709
Prekallikrein
correction of hematologic defects in Fletcher factor deficiency, 622
Pressure
stop-flow response, nephron of obstructed kidney, 1497
Production rates
and metabolic clearance, human thyrotropin, 895
Progestin
and exogenous estrogen, effects on pituitary responsiveness to synthetic luteinizing hormone-releasing factor, 1750
Prolactin
secretion, hypogonadal women, effect of estrogen, 652
secretion, hypothalamic-pituitary function, 1588
Propranolol
effect on human lipolysis, 338
hepatic clearance, effect of phenobarbital, 1101
Prostaglandins
and cholera enterotoxin, effects on intestinal mucosal cyclic AMP, 941
synthesis, role of endoperoxide intermediate on platelet release reaction, 1468
Prostaglandin $F_{2\alpha}$
effect on pulmonary mechanics, guinea pig, 1679
Proteases
neutral, and cathepsin D in human articular cartilage, 1044
Protein
glyco-, urinary, myelocytic leukemia, 868
monoclonal IgM, antialbumin antibody, 932
nonimmunoglobulin, component of amyloid fibrils in amyloidosis, 1054
plasma mutant, hypercatabolism, fibrinogen Philadelphia, 600
secretion by liver, role of microtubules, 1512
synthesis by lung, effect of hyperoxia, 705
uptake by glomerular mesangium in nephrotoxic nephritis, 431
Proteolysis
myosin, during platelet storage, 1493
Pseudomonas
lipopolysaccharide, immunity in rabbit respiratory tract, 1351
Pulmonary
acclimatization to hypoxemia, role of spinal fluid pH, 1091
obstructive syndromes, lung volumes, 1178
protein synthesis and granular pneumocyte ultrastructure, effect of hyperoxia, 705
Pyridoxal phosphate
metabolism in alcoholism, effect of acetaldehyde on erythrocytes, 693

R

Radioactive assay
two-pool extrinsic tag measurement of heme and nonheme iron absorption from diet, in man, 247
Radioimmunoassay
double antibody, total plasma apolipoprotein B concentration in man, 1458
localization of parathyroid hormone in malignant ectopic hyperparathyroidism, 1726
multiple ligand-binding, diiodotyrosine, 416
Ragweed
antigen E, immune response, role of lymphocytes, 735
Red cell
lysis, hereditary erythroblastic multinuclearity and paroxysmal nocturnal hemoglobinuria, 31
Reflexes
baroreceptor and chemoreceptor, interaction of, 1226
Relaxation
incomplete, between beats after myocardial hypoxia and ischemia, 1627
Release reaction
platelet, induction by phytohemagglutinin, 211
Releasing factor
hypothalamic, deficiency in male hypogonadotropic hypogonadism, 408
Renal disease
systemic lupus erythematosus, association with skin immunoglobulins, 1434
Renal osteodystrophy
human, bone crystal maturation, 52
Renin
secretion, role of saline or sodium ion, 988
Respiration
effects of slow-reacting substance of anaphylaxis, histamine, bradykinin, and prostaglandin $F_{2\alpha}$, 1679
Respiratory distress syndrome
premature infant, lung cytoplasmic receptor for glucocorticoids, 477
Respiratory tract
lower, immunoglobulin synthesis and secretion, 354
rabbit, immunity to *Pseudomonas* lipopolysaccharide, 1351
Reticuloendothelial cells
transport of iron, 1527
Rheology
increased serum viscosity in diabetes mellitus, 1071
Rheumatoid arthritis
effect of aggregated gamma globulin on lymphocyte transformation, 1108
Rheumatoid factor
IgG and IgM, induction of leukocyte chemotactic factor from complement, 1503
Ribonucleic acid
messenger, translational control, hemoglobin synthesis in thalassemic bone marrow, 955

S

Saline
role in regulation of renin and aldosterone secretion, 988

Salivary glands
Sjögren's syndrome, T and B lymphocytes, 180
Sanfilippo B disease
pinocytosis of *N*-acetyl-α-D-glucosaminidase, 85
Secretin
immunoreactive, effects of intraduodenal HCl and glucose, 1185
Serotonin
release from platelets, induction by phytohemagglutinin, 211
Serum
and bacteria, effect on superoxide production by granulocytes, 1662
human, inhibitors and stimulators of hepatic porphyrin formation, 1167
β-Sitosterolemia
and xanthomatosis, lipid storage disease, 1033
Sjögren's syndrome
T and B lymphocytes in peripheral blood and tissue lesions, 180
Skin
accumulation of griseofulvin, role of sweat, 1673
immunoglobulins in systemic lupus erythematosus, association with renal disease, 1434
Sodium
effect on superficial and juxtamedullary nephron function, 971
ion, role in regulation of renin and aldosterone secretion, 988
natriuretic factor in urine of chronic uremia, absence in nephrotic uremia, 1559
and potassium cotransport, human erythrocyte, inhibition by furosemide, 745
proportional reduction of intake, chronic uremia, 1736
reabsorption by proximal tubule after albumin infusion, role of parathyroid hormone, 501
reabsorption in proximal tubule, relationship to phosphate transport, 143
transport, role in diarrhea in viral gastroenteritis, 1335
transport, toad bladder, effect of natriuretic factor, 1568
Sodium chloride
transport in thin ascending limb of Henle, osmotic gradients by passive diffusion, 393
Spaces
intercellular, jejunum, effects of volume expansion and cholera toxin, 1300
Starvation
effect on pituitary and thyroid gland function in decline of minimal oxygen consumption with age, 572
Steatorrhea
inhibition of ileal water absorption by fatty acids, 205
oleic and ricinoleic acid inhibition of jejunal water and electrolyte absorption, in man, 374
Stereochemistry
warfarin, effect of phenylbutazone, 1607
Steroid
fetal metabolism, effect of maternal intrahepatic cholestasis, 1709
Stomach
effect of histamine on cyclic AMP metabolism in gastric mucosa, 334
Stratum corneum
accumulation of griseofulvin, role of sweat, 1673
Streptococcus viridans
endocarditis, synergism between penicillin and streptomycin, 829
Streptomycin
and penicillin synergism in streptococcal endocarditis, 829
in pericardial fluid, 7
Sulfhydryl groups
erythrocyte membrane, relation to glycolysis and hemolytic anemia, 805
Superoxide
production by granulocytes, effect of bacteria and serum, 1662
Superoxide dismutase
activity in leukocytes, 1197
role in reduction of ferritin iron by xanthine oxidase, 665
Sweat
role in skin accumulation of griseofulvin, 1673
Synthetase
δ-aminolevulinic acid, human erythroblasts, 1326

T

Taurocholic acid
biliary excretion, effect of essential fatty acid deficiency on gallstone formation, 423
Testes
human normal and abnormal, secretion of androgens and estrogens, effect of human chorionic gonadotropin, 1
hypophyso-gonadal function in human infants, 819
and pituitary responsiveness in male hypogonadotropic hypogonadism, 408
β-Thalassemia
translational control of hemoglobin synthesis in bone marrow, 955
Thoracotomy
effect on myocardial blood flow, 1618
Thrombocytopenia
in trypanosomiasis, 1359
Thymocytes
effect of cholera toxin, 1149
Thymus
lymphocyte subpopulation, effect of corticosteroids, 565
lymphocytes, cell surface markers in variable immunodeficiency and panhypogammaglobulinemia, 834
lymphocytes, decrease in peripheral blood, Sjögren's syndrome, 180
Thyrocalcitonin
renal tubular interaction with cyclic AMP, 25-hydroxycholecalcifero', and calcium, 756
Thyroid gland
role in decline of minimal oxygen consumption with age, 572
Thyroid hormone
binding, isolated nuclei of rat liver and GH_1 cells, 656
Thyroparathyroidectomy
effect on 25-hydroxyvitamin D_3 metabolism and calcium transport by intestine, 1139
effect on renal tubular interactions of thyrocalcitonin, cyclic AMP, 25-hydroxycholecalciferol, and calcium, 756
Thyrotropin
human, metabolic clearance and production rates, 895
Thyroxine
cross-reactivity with triiodothyronine, nuclear binding capacity, 768
metabolism, effect of cold, microsomal and tissue binding, 980
Tissue culture
cystine uptake by cystinotic and normal fibroblasts, 1003
gestation-dependent effects of cortisol on fetal lung, 1518
hepatic cells, stimulation and inhibition of porphyrin formation by human sera, 1167
human adipose tissue, effects of insulin and glucose, 91
pituitary GH_1 cells, triiodothyronine binding in nuclei, 656
Toxin
cholera, effect on bicarbonate secretion by ileum, 964
cholera, effect on thymocytes, 1149
cholera, effects on solubilized adenylate cyclase, 1202
cholera, and volume expansion, effects on jejunal intercellular spaces, 1300
Transcobalamin III
release from granulocytes, effect of lithium and fluoride on serum vitamin B_{12}-binding capacity, 228

Transplantation
renal, blastogenic suppression and alloantibody activity of serum, 270
Transport
dipeptides in human jejunum, 1368
sodium plus potassium, human erythrocyte, inhibition by furosemide, 745
Triflocin
effect on feedback control of glomerular filtration rate, 1695
Triiodothyronine
binding, isolated nuclei of rat liver and GH_1 cells, 656
metabolism, effect of cold, microsomal and tissue binding, 980
nuclear binding capacity, cross-reactivity with thyroxine, 768
Trypanosomiasis
thrombocytopenia in, 1359
Tubule
collecting, effects of ethacrynic acid on osmotic water permeability, 796
distal, feedback in autoregulation of nephron glomerular filtration rate, 516
distal, pathogenesis of acidosis, 669
proximal, effect of cyclic AMP and dibutyryl cyclic AMP on permeability, 1250
proximal, effect of vasopressin on phosphate transport, 660
proximal, relationship of sodium and phosphate transport, 143
proximal, sodium reabsorption after albumin infusion, role of parathyroid hormone, 501
proximal, transepithelial potential difference, 454
Tumor
malignant ectopic hyperparathyroidism, immunochemical localization of parathyroid hormone, 1726
Tyrosine
diiodo-, multiple ligand-binding radioimmunoassay, 416

U

Ultrafiltration
glomerular, dynamics in acute renal failure, 105
Urea
metabolism, chronic renal failure, 1385
transport in thin ascending limb of Henle, osmotic gradients by passive diffusion, 393
Urine
natriuretic factor in chronic uremia, absence in nephrotic uremia, 1559
Urokinase
activation of plasminogen, formation of three plasmins, 154
Ursodeoxycholic acid
formation from chenodeoxycholic acid, 612

V

Vasoconstriction
neurogenic, effect of digitalis on coronary vascular resistance, 288
Vasopressin
effect on phosphate transport in proximal tubule, 660
inhibition by lithium, 1115
mechanism of suppression during alpha adrenergic stimulation with norepinephrine, 219
release, beta adrenergic stimulation with isoproterenol, 857
Ventilation
acclimatization to hypoxemia, role of spinal fluid pH, 1091
distribution, diffuse obstructive pulmonary syndromes, 1178
Ventricle
left, effects of dobutamine, 1265
Viscosity
serum, increase in diabetes mellitus, 1071
Vitamin B_6
metabolism in alcoholism, 693
Vitamin B_{12}
binding capacity, effect of lithium and fluoride on granulocyte release of transcobalamin III, 228
deficiency, abnormal human intrinsic factor, 1274
Volume
expansion, and cholera toxin, effects on jejunal intercellular spaces, 1300
expansion, extracellular, effect of glucose on urinary cations during, 1424
expansion, role of saline or sodium ion in regulation of renin and aldosterone, 988
lung, in diffuse obstructive pulmonary syndromes, 1178

W

Warfarin
stereochemistry, interaction with phenylbutazone, 1607
Water
absorption by ileum, inhibition by intraluminal fatty acids, 205
and electrolyte absorption by jejunum, inhibition by oleic and ricinoleic acids, in man, 374
and electrolyte content, toad bladder, effect of natriuretic factor, 1568
excretion, suppression of vasopressin during alpha adrenergic stimulation with norepinephrine, 219
excretion, vasopressin release and beta adrenergic stimulation, 857
osmotic permeability, collecting tubule, effect of ethacrynic acid, 796
transport in thin ascending limb of Henle, osmotic gradients by passive diffusion, 393
Weight
over 100 kg, electrical dose for ventricular defibrillation with precordial electrodes, 310
Weight reduction
effects on carbohydrate and lipid metabolism in hyperlipoproteinemia, 64

X

Xanthine oxidase
reduction of ferritin iron, role of superoxide dismutase, 665
Xanthomatosis
and β-sitosterolemia, lipid storage disease, 1033
X-ray
crystallographic structure of deoxy form of hemoglobin San Diego, 329

CONTENTS

NUMBER 1, JULY 1974

Effects of glucose on bicarbonate reabsorption in the dog kidney. *Wadi N. Suki, Christy S. Hebert, Bobby J. Stinebaugh, Manuel Martinez-Maldonado, and Garabed Eknoyan* 1

Renal handling of diamino acids in lysinuric protein intolerance. *Olli Simell and Jaakko Perheentupa* .. 9

Effect of experimental pneumococcal meningitis on respiration and circulation in the rabbit. *Malcolm R. Sears, J. Morgan O'Donoghue, H. Kenneth Fisher, and Harry N. Beaty* 18

High-affinity accumulation of chloroquine by mouse erythrocytes infected with *Plasmodium berghei*. *Coy D. Fitch, Norman G. Yunis, Rekha Chevli, and Yolanda Gonzalez* 24

Reciprocal influence of salt intake on adrenal glomerulosa and renal vascular responses to angiotensin II in normal man. *Norman K. Hollenberg, William R. Chenitz, Douglass F. Adams, and Gordon H. Williams* 34

Measurement of fibrinopeptide A in human blood. *H. L. Nossel, I. Yudelman, R. E. Canfield, V. P. Butler, Jr., K. Spanondis, G. D. Wilner, and G. D. Qureshi* 43

Continuous distributions of ventilation-perfusion ratios in normal subjects breathing air and 100% O_2 *Peter D. Wagner, Raymond B. Laravuso, Richard R. Uhl, and John B. West* 54

Pressure control of sodium reabsorption and intercellular backflux across proximal kidney tubule. *Alain Grandchamp and Emile L. Boulpaep* 69

Effects of phorbol myristate acetate on the metabolism and ultrastructure of neutrophils in chronic granulomatous disease. *John E. Repine, James G. White, C. Carlyle Clawson, and Beulah M. Holmes* 83

Phospholipid metabolism in the initiation of renal compensatory growth after acute reduction of renal mass. *F. Gary Toback, Patricia D. Smith, and Leah M. Lowenstein* 91

Dermatitis Herpetiformis. Immunologic concomitants of small intestinal disease and relationship to histocompatibility antigen HL-A8. *Roger L. Gebhard, Z. Myron Falchuk, Stephen I. Katz, Clementine Sessoms, G. N. Rogentine, and Warren Strober* 98

Autonomic mechanisms in hemodynamic responses to isometric exercise. *C. Edwin Martin, James A. Shaver, Donald F. Leon, Mark E. Thompson, Pesara S. Reddy, and James J. Leonard* 104

Suppression of human growth hormone secretion by melatonin and cyproheptadine. *G. A. Smythe and L. Lazarus* 116

Antibodies to human albumin in cirrhotic sera. *S. Hauptman and T. B. Tomasi, Jr.* 122

Detection of anti-glomerular basement membrane antibodies by a radioimmunological technique. Clinical application in human nephropathies. *P. Mahieu, P. H. Lambert, and P. A. Miescher* 128

Increased adenosine triphosphatase in leukocytes of asthmatic children. *Ronald G. Coffey, John W. Hadden, and Elliott Middleton, Jr.* 138

Orosomucoid content of pleural and peritoneal effusions. *Daniel Rudman, Rajender K. Chawla, Alejandro E. Del Rio, Bettye M. Hollins, Elmer C. Hall, and Judy M. Conn* 147

Relative rates of transcapillary movement of free thyroxine, protein-bound thyroxine, thyroxine-binding proteins, and albumin. *Clifford H. G. Irvine and M. W. Simpson-Morgan* 156

Glutamine transport in rat kidney mitochondria in metabolic acidosis. *William Adam and David P. Simpson* 165

Immunoreactive forms of circulating parathyroid hormone in primary and ectopic hyperparathyroidism. *Ralph C. Benson, Jr., B. Lawrence Riggs, Barbara M. Pickard, and Claude D. Arnaud* .. 175

Cysteine activation in cultured cystinotic cells. The specific activity of cysteinyl-tRNA synthetase and $tRNA_{Cys}$ and the determination of the Michaelis-Menten constants for cysteinyl-tRNA synthetase. *John R. Waterson, William P. Winter, and Roy D. Schmickel* 182

Hepatic autophagy in uncontrolled experimental diabetes and its relationships to insulin and glucagon. *M. Amherdt, V. Harris, A. E. Renold, L. Orci, and R. H. Unger* 188

Effects of dietary sodium and of acute saline infusion on the interrelationship between dopamine excretion and adrenergic activity in man. *R. Wayne Alexander, John R. Gill, Jr., Hirohiko Yamabe, Walter Lovenberg, and Harry R. Keiser* 194

Triiodothyronine and thyroxine in hyperthyroidism. Comparison of the acute changes during therapy with antithyroid agents. *J. Abuid and P. R. Larsen* 201

CONCISE PUBLICATIONS

Elevation of plasma neurophysin in women on oral contraceptives. *Alan G. Robinson* 209
Lung tissue elastin composition in newborn infants with the respiratory distress syndrome and other diseases. *Hugh E. Evans, Stephen Keller, and Ines Mandl* 213
JULY AUTHOR INDEX 218

NUMBER 2, AUGUST 1974

The contribution of local factors to the elevated venous tone of congestive heart failure. *Robert Zelis* .. 219
Effects of hemorrhage on regional blood flow distribution in dogs and primates. *Stephen F. Vatner* ... 225
The structure of human high density lipoprotein and the levels of apolipoprotein A-I in plasma as determined by radioimmunoassay. *Gustav Schonfeld and Barbara Pfleger* 236
Pinocytosis by human alveolar macrophages. Comparison of smokers and nonsmokers. *Henry Yeager, Jr., Steven M. Zimmet, and Sorell L. Schwartz* 247
Effects of colchicine and vinblastine on the cellular action of vasopressin in mammalian kidney. A possible role of microtubules. *Thomas P. Dousa and Larry D. Barnes* 252
Immunology of the lower respiratory tract. II. The plaque-forming response of canine lymphoid tissues to sheep erythrocytes after intraplulmonary or intravenous immunization. *H. B. Kaltreider, L. Kyselka, and S. E. Salmon* 263
Utilization of α-keto and α-hydroxy analogues of valine by the growing rat. *Rajender K. Chawla and Daniel Rudman* 271
Plasma catecholamines and carbohydrate metabolism in patients with acute myocardial infarction. *Niels Juel Christensen and Jørgen Videbaek* 278
Calcium metabolism in newborn infants. The interrelationship of parathyroid function and calcium, magnesium, and phosphorus metabolism in normal, "sick," and hypocalcemic newborns. *Louis David and Constantine S. Anast* 287
Circulating immune complexes in the serum in systemic lupus erythematosus and in carriers of hepatitis B antigen. Quantitation by binding to radiolabeled C1q. *Urs E. Nydegger, Paul H. Lambert, Heidi Gerber, and Peter A. Miescher* 297
Inhibition of in vivo insulin secretion by prostaglandin E_1. *R. Paul Robertson, David J. Gavareski, Daniel Porte, Jr., and Edwin L. Bierman* 310
Inhibition of penicillin transport from the cerebrospinal fluid after intracisternal inoculation of bacteria. *Reynold Spector and A. V. Lorenzo* 316
Fatty acid-binding protein in small intestine. Identification, isolation, and evidence for its role in cellular fatty acid transport. *Robert K. Ockner and Joan A. Manning* 326
Studies on the vivo effects of antibody. Interaction of IgM antibody and complement in the immune clearance and destruction of erythrocytes in man. *John P. Atkinson and Michael M. Frank* 339
Acute immunologic pulmonary alveolitis. *Kent J. Johnson and Peter A. Ward* 349
Jejunal absorption and secretion of calcium in patients with chronic renal disease on hemodialysis. *Tom F. Parker, Pedro Vergne-Marini, Alan R. Hull, C. Y. C. Pak, and John S. Fordtran* 358
The turnover of cholesterol in human atherosclerotic arteries. *S. N. Jagannathan, W. E. Connor, W. H. Baker, and A. K. Bhattacharyya* 366
Release of prostaglandin by mitogen- and antigen-stimulated leukocytes in culture. *Victor A. Ferraris and Frederick R. DeRubertis* 378
The hypercalciurias. Causes, parathyroid functions, and diagnostic criteria. *Charles Y. C. Pak, Masahiro Ohata, E. Clint Lawrence, and W. Snyder* 387
Serial studies of immunocompetence of patients undergoing chemotherapy for acute leukemia. *E. M. Hersh, J. U. Gutterman, G. M. Mavligit, K. B. McCredie, M. A. Burgess, A. Matthews, and E. J. Freireich* 401
Hemoglobin affinity for oxygen in the anginal syndrome with normal coronary arteriograms. *Pantel S. Vokonas, Peter F. Cohn, Michael D. Klein, Myron B. Laver, and Richard Gorlin* 409
Secretion of parathyroid hormone in patients with medullary thyroid carcinoma. *Leonard J. Deftos and Jacqueline G. Parthemore* 416

Studies of platelet 5-hydroxytryptamine (serotonin) in storage pool disease and albinism. *Harvey J. Weiss, Thomas B. Tschopp, John Rogers, and Harvey Brand* 421
Balanced globin chain synthesis in hereditary persistence of fetal hemoglobin. *C. L. Natta, G. A. Niazi, S. Ford, and A. Bank* 433
Cellular reactivity studies to streptococcal antigens. Migration inhibition studies in patients with streptococcal infections and rheumatic fever. *Stanley E. Read, Vincent A. Fischetti, Virginia Utermohlen, Rudolf E. Falk, and John B. Zabriskie* 439
Relationship of serum complement levels to events of the malarial paroxysm. *F. A. Neva, W. A. Howard, R. H. Glew, W. A. Krotoski, A. A. Gam, W. E. Collins, J. P. Atkinson, and M. M. Frank* 451
Interrelations in the oxidative metabolism of free fatty acids, glucose, and glycerol in normal and hyperlipemic patients. A compartmental model. *C. L. Malmendier, C. Delcroix, and M. Berman* .. 461
Pure human big gastrin. Immunochemical properties, disappearance half time, and acid-stimulating action in dogs. *John H. Walsh, Haile T. Debas, and Morton I. Grossman* 477
Abnormalities of chemotactic lymphokine synthesis and mononuclear leukocyte chemotaxis in Wiskott-Aldrich syndrome. *Leonard C. Altman, Ralph Snyderman and R. Michael Blaese* 486
Thyroid-stimulating activity and chorionic gonadotropin. *Bruce C. Nisula and Jean-Marie Ketelslegers* 494
AUGUST AUTHOR INDEX 500

NUMBER 3, SEPTEMBER 1974

The relationships between arterial oxygen flow rate, oxygen binding by hemoglobin, and oxygen utilization after myocardial infarction. *Marshall A. Lichtman, Jules Cohen, Jerald A. Young, April A. Whitbeck, and Marion Murphy* 501
Resting membrane potential and ionic distribution in fast- and slow-twitch mammalian muscle. *David S. Campion* 514
Pulmonary alveolar macrophage. Defender against bacterial infection of the lung. *Elliot Goldstein, William Lippert, and David Warshauer* 519
An inhibitory innervation at the gastroduodenal junction. *Sinn Anuras, Allan R. Cooke, and James Christensen* 529
Vasoactive intestinal peptide stimulation of adenylate cyclase and active electrolyte secretion in intestinal mucosa. *Charles J. Schwartz, Daniel V. Kimberg, Harland E. Sheerin, Michael Field, and Sami I. Said* 536
Glycoprotein synthesis and secretion by mucosal biopsies of rabbit colon and human rectum. *Richard P. MacDermott, Robert M. Donaldson, Jr., and Jerry S. Trier* 545
Measurement of circulating desialylated glycoproteins and correlation with hepatocellular damage. *James S. Marshall, Allan M. Green, Jack Pensky, Stanford Williams, Arthur Zinn, and Don M. Carlson* 555
Effects of catecholamines, exercise, and nitroglycerin on the normal and ischemic myocardium in conscious dogs. *Stephen F. Vatner, Robert J. McRitchie, Peter R. Maroko, Thomas A. Patrick, and Eugene Braunwald* 563
Measurement of pregnancy-associated plasma proteins during human gestation. *Tsue-Ming Lin, Seymour P. Halbert, and William N. Spellacy* 576
A radioimmunoassay for measurement of 3,3′,5′-triiodothyronine (reverse T_3). *Inder J. Chopra* 583
Effect of atropine on gastrin and gastric acid response to peptone meal. *Stanislaw J. Konturek, Jerzy Biernat, Jan Oleksy, Jens F. Rehfeld, and Flemming Stadil* 593
Kinetics of the attachment of intrinsic factor-bound cobamides to ileal receptors. *V. I. Mathan, Bernard M. Babior, and Robert M. Donaldson, Jr.* 598
Human puberty. Simultaneous augmented secretion of luteinizing hormone and testosterone during sleep. *R. M. Boyar, R. S. Rosenfeld, S. Kapen, J. W. Finkelstein, H. P. Roffwarg, E. D. Weitzman, and Leon Hellman* 609
Structural changes accompanying enzymatic activation of human Hageman factor. *Susan D. Revak, Charles G. Cochrane, Alan R. Johnston, and Tony E. Hugli* 619
On the hypocalciuric action of chlorothiazide. *Linda S. Costanzo and I. M. Weiner* 628
Lipid peroxidation by human blood phagocytes. *Thomas P. Stossel, Robert J. Mason, and Arnold L. Smith* 638

3α-Androstanediol kinetics in man. *T. Kinouchi and R. Horton* 646
Mechanisms of seizures and coma in hypoglycemia. Evidence for a direct effect of insulin on electrolyte transport in brain. *Allen I. Arieff, Tom Doerner, Harry Zelig, and Shaul G. Massry* 654
Granulocyte transfusion therapy of experimental *Pseudomonas* pneumonia. *David C. Dale, Herbert Y. Reynolds, James E. Pennington, Ronald J. Elin, Terry W. Pitts, and Robert G. Graw, Jr.* 664
Streptozotocin diabetes. Correlation with extent of depression of pancreatic islet nicotinamide adenine dinucleotide. *Tom Anderson, Philip S. Schein, Mary G. McMenamin, and David A. Cooney* 672
Studies of hemoglobin denaturation and Heinz body formation in the unstable hemoglobins. *Christine C. Winterbourn and R. W. Carrell* 678
Immunotherapy of coccidioidomycosis. *Antonino Catanzaro, Lynn Spitler, and Kenneth M. Moser* 690
Influence of sodium and parathyroid hormone on calcium release from intestinal mucosal cells. *Stanley J. Birge, Sandra C. Switzer, and David R. Leonard* 702
Identification of an intestinal sodium and calcium-dependent phosphatase stimulated by parathyroid hormone. *Stanley J. Birge and Helen R. Gilbert* 710
Delineation of the dimensions and permeability characteristics of the two major diffusion barriers to passive mucosal uptake in the rabbit intestine. *Henrik Westergaard and John M. Dietschy* 718
Solubilized receptor for intrinsic factor-vitamin B_{12} complex from guinea pig intestinal mucosa. *Max Katz and Bernard A. Cooper* 733
Myocardial function and lipid metabolism in the chronic alcoholic animal. *Timothy J. Regan, Mohammad I. Khan, Philip O. Ettinger, Bunyad Haider, Michael M. Lyons, and Henry A. Oldewurtel* 740
Cellular action of antidiuretic hormone in mice with inherited vasopressin-resistant urinary concentrating defects. *Thomas P. Dousa and Heinz Valtin* 753
Investigation of the physiological basis for increased exercise threshold for angina pectoris after physical conditioning. *David N. Sim and William A. Neill* 763
SEPTEMBER AUTHOR INDEX 772

NUMBER 4, OCTOBER 1974

50TH ANNIVERSARY COMMEMORATION i
Canalicular bile secretion in man. Studies utilizing the biliary clearance of [^{14}C]mannitol. *James L. Boyer and Joseph R. Bloomer* 773
Resolution of experimental pulmonary emboli with heparin and streptokinase in different dosage regimens. *J. F. Cade, J. Hirsh, E. Regoeczi, M. Gent, M. R. Buchanan, and D. M. Hynes* 782
Increased sheep lung vascular permeability caused by Pseudomonas bacteremia. *Kenneth L. Brigham, William C. Woolverton, Lynn H. Blake, and Norman C. Staub* 792
Preferential binding of β^n globin chains associated with stroma in sickle cell disorders. *Arthur Bank, Gregory Mears, Robert Weiss, Joyce V. O'Donnell, and Clayton Natta* 805
Formation and excretion of pyrrole-2-carboxylate in man. *Anne M. Heacock and Elijah Adams* 810
Glucose modulation of amino acid-induced glucagon and insulin release in the isolated perfused rat pancreas. *Anthony S. Pagliara, Susan N. Stillings, Barbara Hover, Duane M. Martin, and Franz M. Matschinsky* 819
Characterization of the effects of arginine and glucose on glucagon and insulin release from the perfused rat pancreas. *John E. Gerich, M. Arthur Charles, and Gerold M. Grodsky* 833
Profile of circulating vasoactive substances in hemorrhagic shock and their pharmacologic manipulation. *Barbara A. Jakschik, Garland R. Marshall, Janet L. Kourik, and Philip Needleman* 842
Thyroid hormone action. In vitro characterization of solubilized nuclear receptors from rat liver and cultured GH_1 cells. *Herbert H. Samuels, Jir S. Tsai, Juan Casanova, and Frederick Stanley* 853
Hereditary hemolytic anemia with human erythrocyte pyrimidine 5′-nucleotidase deficiency. *William N. Valentine, Kay Fink, Donald E. Paglia, Susan R. Harris, and William S. Adams* 866
Increased collagen synthesis by scleroderma skin fibroblasts in vitro. A possible defect in the regulation or activation of the scleroderma fibroblast. *E. Carwile LeRoy* 880
The responses of rat intestinal brush border and cytosol peptide hydrolase activities to variation in dietary protein content. Dietary regulation of intestinal peptide hydrolases. *J. Alex Nicholson, Denis M. McCarthy, and Young S. Kim* 890

Neural control of the lower esophageal sphincter. Influence of the vagus nerves. *Satish Rattan and Raj K. Goyal* ... 899
Sanfilippo A syndrome. Sulfamidase deficiency in cultured skin fibroblasts and liver. *Reuben Matalon and Albert Dorfman* ... 907
Hyperresponse to thyrotropin-releasing hormone accompanying small decreases in serum thyroid hormone concentrations. *Apostolos G. Vagenakis, Basil Rapoport, Fereidoun Azizi, Gary I. Portnay, Lewis E. Braverman, and Sidney H. Ingbar* ... 913
Effects of steroid hormones on human polymorphonuclear leukocyte lysosomes. *Robert H. Persellin and Leighton C. Ku* ... 919
Mechanism of impaired water excretion in the hypothyroid rat. *Dimitrios S. Emmanouel, Marshall D. Lindheimer, and Adrian I. Katz* ... 926
Osmotic extraction of hypotonic fluid from the lungs. *Richard M. Effros* ... 935
Imbalance in α and β globin synthesis associated with a hemoglobinopathy. *R. F. Rieder and G. W. James, III* ... 948
Influence of calcium on the inotropic actions of hyperosmotic agents, norepinephrine, paired electrical stimulation, and treppe. *James T. Willerson, J. Stanley Crie, Robert C. Adcock, Gordon H. Templeton, and Kern Wildenthal* ... 957
Hematopoiesis in the grey collie dog. Studies of the regulation of erythropoiesis. *John W. Adamson, David C. Dale, and Ronald J. Elin* ... 965
Nitrogen sparing induced by a mixture of essential amino acids given chiefly as their keto-analogues during prolonged starvation in obese subjects. *Daniel G. Sapir, Oliver E. Owen, Thomas Pozefsky, and Mackenzie Walser* ... 974
Hepatic ketogenesis and gluconeogenesis in humans. *A. J. Garber, P. H. Menzel, G. Boden, and O. E. Owen* ... 981
Qualitative and quantitative aspects of the human antibody response to streptococcal group A carbohydrate. *Stanford T. Shulman and Elia M. Ayoub* ... 990

CONCISE PUBLICATIONS

Immunologic specificity of transfer factor. *Kenneth S. Zuckerman, James A. Neidhart, Stanley P. Balcerzak, and Albert F. LoBuglio* ... 997
Evaluation of leukocyte chemotaxis in vitro in thermally injured patients. *Glenn D. Warden, Arthur D. Mason, Jr., and Basil A. Pruitt, Jr.* ... 1001
Superoxide dismutases in polymorphonuclear leukocytes. *Marvin L. Salin and Joe M. McCord* ... 1005
October Author Index ... 1010

Number 5, November 1974

Immunological studies of the human placenta. Characterization of immunoglobulins on trophoblastic basement membranes. *W. Page Faulk, M. Jeannet, W. D. Creighton, and A. Carbonara* ... 1011
The interactions of proinsulin with insulin receptors on the plasma membrane of the liver. *Pierre Freychet* ... 1020
The role of platelet membrane phospholipids in the platelet release reaction. *Paul K. Schick and Byung P. Yu* ... 1032
A microperfusion study of phosphate reabsorption by the rat proximal renal tubule. Effect of parathyroid hormone. *Norman Bank, Hagop S. Aynedjian, and Stephen W. Weinstein* ... 1040
Pathogenic role of cyclic AMP in the impairment of urinary concentrating ability in acute hypercalcemia. *Nama Beck, Harbans Singh, Sarah W. Reed, H. V. Murdaugh, and Bernard B. Davis* ... 1049
Sulfate metabolism in human chondrocyte cultures. *Edith R. Schwartz, P. Roger Kirkpatrick, and Roby C. Thompson* ... 1056
Studies on "big" growth hormone from human plasma and pituitary. *Donald R. Wright, A. David Goodman, and Kathleen D. Trimble* ... 1064
Effect of age and magnesium depletion on bone magnesium pools in rats. *Allen C. Alfrey, Nancy L. Miller, and Richard Trow* ... 1074
Analyses of lymphocytes from patients with rheumatoid arthritis and systemic lupus erythematosus. Occurrence of interfering cold-reactive antilymphocyte antibodies. *R. J. Winchester, J. B. Winfield, F. Siegal, P. Wernet, Z. Bentwich, and H. G. Kunkel* ... 1082

The defect in hemophilic and von Willebrand's disease plasmas studied by a recombination technique. *Herbert A. Cooper and Robert H. Wagner* 1093
Modulation of the random migration of human platelets. *Frank H. Valone, K. Frank Austen, and Edward J. Goetzl* 1100
Selective measurement of two lipase activities in postheparin plasma from normal subjects and patients with hyperlipoproteinemia. *Ronald M. Krauss, Robert I. Levy, and Donald S. Fredrickson* 1107
Cell-mediated immunity after bacterial infection of the lower respiratory tract. *J. Robert Cantey and W. Lee Hand* 1125
Effect of mannitol on glomerular ultrafiltration in the hydropenic rat. *Roland C. Blantz* 1135
The immunohistopathology of glomerular antigens. The glomerular basement membrane, collagen, and actomyosin antigens in normal and diseased kidneys. *Jon I. Scheinman, Alfred J. Fish, and Alfred F. Michael* 1144
Protein binding by specific receptors on human placenta, murine placenta, and suckling murine intestine in relation to protein transport across these tissues. *Jonathan D. Gitlin and David Gitlin* 1155
Mechanisms for development of diabetic hypertriglyceridemia in streptozotocin-treated rats. Effect of diet and duration of insulin deficiency. *Eve P. Reaven and Gerald M. Reaven* 1167
Rapid transient efflux of phosphate ions from pancreatic islets as an early action of insulin secretagogues. *Norbert Freinkel, Catherine El Younsi, Jerry Bonnar, and Rex M. C. Dawson* 1179
Normal glomerular permeability and its modification by minimal change nephrotic syndrome. *Alan M. Robson, Joseph Giangiacomo, Randy A. Kienstra, Saiyid T. Naqvi, and Julie R. Ingelfinger* ... 1190
Relationship between frequency dependence of lung compliance and distribution of ventilation. *Adam Wanner, Stephen Zarzecki, Neal Atkins, Angel Zapata, and Marvin A. Sackner* 1200
The effect of adrenergic blockade on the glucagon responses to starvation and hypoglycemia in man. *Robert M. Walter, R. James Dudl, Jerry P. Palmer, and John W. Ensinck* 1214
Kinetics of salicylate elimination by anephric patients. *David T. Lowenthal, William A. Briggs, and Gerhard Levy* 1221
Enhanced phagocytic capacity. The biologic basis for the elevated histochemical nitroblue tetrazolium reaction. *Charles E. McCall, Lawrence R. DeChatelet, Robert Butler, and David Brown* 1227

CONCISE PUBLICATIONS

Rapid identification of *Candida albicans* septicemia in man by gas-liquid chromatography. *Geraldine G. Miller, Michael W. Witwer, Abraham I. Braude, and Charles E. Davis* 1235
The effect of 3′,5′-adenosine monophosphate on granulocyte adhesion. *Richard E. Bryant and Marilyn C. Sutcliffe* 1241
November Author Index 1246

Number 6, December 1974

The cardiovascular effects of morphine. The peripheral capacitance and resistance vessels in human subjects. *Robert Zelis, Edward J. Mansour, Robert J. Capone, and Dean T. Mason* 1247
Use of inert gases and carbon monoxide to study the possible influence of countercurrent exchange on passive absorption from the small bowel. *John H. Bond, David G. Levitt, and Michael D. Levitt* 1259
Normal contractile state of hypertrophied myocardium after pulmonary artery constriction in the cat. *John F. Williams, Jr., and Ralph D. Potter* 1266
Specificity of heteroantisera to human acute leukemia-associated antigens. *Michael A. Baker, K. Ramachandar, and Robert N. Taub* 1273
Effect of acute and chronic calcium administration on plasma renin. *Theodore A. Kotchen, Kimball I. Maull, Robert Luke, Douglas Rees, and Walter Flamenbaum* 1279
Effects of volume expansion, purified parathyroid extract, and calcium on renal bicarbonate absorption in the dog. *Charles K. Crumb, Manuel Martinez-Maldonado, Garabed Eknoyan, and Wadi N. Suki* 1287
Differential susceptibility of human IgA immunoglobulins to streptococcal IgA protease. *Andrew G. Plaut, Richard Wistar, Jr., and J. Donald Capra* 1295
Bile acid kinetics in relation to sex, serum lipids, body weights, and gallbladder disease in patients with various types of hyperlipoproteinemia. *Kurt Einarsson, Kjell Hellström, and Mora Kallner* 1301

The secondary structure of human Hageman factor (factor XII) and its alteration by activating agents. *Carl R. McMillin, Hidehiko Saito, Oscar D. Ratnoff, and Alan G. Walton* 1312
Decreased insulin binding to lymphocytes from diabetic subjects. *Jerrold M. Olefsky and Gerald M. Reaven* 1323
Effect of adrenalectomy on the renal response to chloride depletion in the rat. *R. G. Luke* 1329
Effects of corticosteroids on human monocyte function. *John J. Rinehart, Stanley P. Balcerzak, Arthur L. Sagone, and Albert F. LoBuglio* 1337
Intestinal absorption of hemoglobin iron-heme cleavage by mucosal heme oxygenase. *Steven B. Raffin, Choong H. Woo, Kenneth T. Roost, David C. Price, and Rudi Schmid* 1344
Competitive binding of bilirubin and drugs to human serum albumin studied by enzymatic oxidation. *R. Brodersen* 1353
The central nervous system as a site of action for the coronary vasoconstrictor effect of digoxin. *Hasan Garan, Thomas W. Smith, and Wm. John Powell, Jr.* 1365
Superficial and deep juxtaglomerular apparatus renin activity of the rat kidney. Effect of surgical preparation and NaCl intake. *Walter Flamenbaum and Robert J. Hamburger* 1373
Human parathyroid hormone. Immunological characterization of antibodies against a glandular extract and the synthetic amino-terminal fragments 1–12 and 1–34 and their use in the determination of immunoreactive hormone in human sera. *Jan A. Fischer, Ulrich Binswanger, and Felix M. Dietrich* 1382
Somatostatin-induced changes in insulin and glucagon secretion in normal and diabetic dogs. *Hideo Sakurai, Richard Dobbs, and Roger H. Unger* 1395
Glucagon secretion from the perfused rat pancreas. Studies with glucose and catecholamines. *Gordon C. Weir, Stephen D. Knowlton, and Donald B. Martin* 1403
Comparison of the effects on renin release of beta adrenergic antagonists with differing properties. *Michael A. Weber, Gordon S. Stokes, and Judith M. Gain* 1413
Coronary reperfusion in primates. Serial electrocardiographic and histologic assessment. *Gregory T. Smith, John R. Soeter, Harold H. Haston, and J. Judson McNamara* 1420
Dependence of saline-induced natriuresis upon exposure of the kidney to the physical effects of extracellular fluid volume expansion. *John P. Fitzgibbons, F. John Gennari, Howard B. Garfinkel, and Stanley Cortell* 1428
The stimulatory effect of platelets and platelet membranes on the procoagulant activity of leukocytes. *Julian Niemetz and Aaron J. Marcus* 1437
Immunochemical studies of plasma kallikrein. *Andranik Bagdasarian, Biswajit Lahiri, Richard C. Talamo, Pat Wong, and Robert W. Colman* 1444
Mechanisms mediating bradycardia during coronary arteriography. *Dwain L. Eckberg, Carl W. White, J. Michael Kioschos, and Francois M. Abboud* 1455
Myocardial blood flow distribution during ischemia-induced coronary vasodilation in the unanesthetized dog. *Robert J. Bache, Frederick R. Cobb, and Joseph C. Greenfield, Jr.* 1462
Mechanism of effect of thoracic inferior vena cava constriction on renal water excretion. *Robert J. Anderson, Pravit Cadnapaphornchai, Judith A. Harbottle, Keith M. McDonald, and Robert W. Schrier* 1473
The role of collagen quaternary structure in the platelet: collagen interaction. *Lawrence F. Brass and Howard B. Bensusan* 1480
Characteristics of the relationship between the flow rate of tubular fluid and potassium transport in the distal tubule of the rat. *Robert T. Kunau, Jr., Harold L. Webb, and Susan C. Borman* 1488
The "no-flow" phenomenon after temporary coronary occlusion in the dog. *Robert A. Kloner, Charles E. Ganote, and Robert B. Jennings* 1496

SUBJECT INDEX

A

Absorption
passive, inert gases and carbon monoxide, small intestine, influence of counter-current exchange, 1259
renal, of diamino acids in lysinuric protein intolerance, 9

Acid
stimulation, action of human "big gastrin" in dogs, 477

Acidosis
metabolic, glutamine transport in kidney mitochondria, 165

Actomyosin
antigen in kidney diseases, 1144

Adenylate cyclase
impaired stimulation by vasopressin, nephrogenic diabetes insipidus, 753
intestinal mucosa, vasoactive intestinal peptide stimulation, 536

Adhesion
granulocytes, effect of cyclic AMP, 1241

Adrenal
and kidney vascular responses to angiotensin II, effect of sodium chloride, 34

Adrenalectomy
effect of renal response to chloride depletion, 1329

β-Adrenergic
antagonists, effects on renin release, 1413

Adrenergic
nervous system, and glucagon response to starvation and hypoglycemia, 1214

Age
and magnesium depletion, effect on bone magnesium pools, 1074

Albinism
and storage pool disease, platelet serotonin, 421

Albumin
antibodies, human cirrhotic sera, 122
free and protein-bound thyroxine, and thyroxine-binding proteins, transcapillary movement, 156
human serum, competitive binding of bilirubin and drugs, 1353

Alcohol
chronic, effect on myocardial function and lipid metabolism, 740

Aldosterone
effect of sodium chloride on adrenal response to angiotensin II, 34

Alveolitis
immunologic pulmonary, acute, 349

Amino acid(s)
arginine, lysine, and ornithine, renal reabsorption in lysinuric protein intolerance, 9
composition of elastin, lung, newborn infants with respiratory distress syndrome, 213
essential, effects of keto-analogues in prolonged fasting in obesity, 974
valine, utilization of α-keto and α-hydroxy analogues, 271

Aminoacylation
cysteine activation in cultured cystinotic cells, specific activity and Michaelis-Menten constants for cysteinyl-tRNA synthetase, 182

Ammoniagenesis
renal, glutamine transport in mitochondria in metabolic acidosis, 165

AMP
cyclic, effect on granulocyte adhesion, 1241
cyclic, role in urinary concentrating defect, hypercalcemia, 1049

Androgen
3α-androstanediol kinetics, human, 646

Anemia
autoimmune hemolytic, interaction of IgM antibody and complement in immune clearance of erythrocytes, human, 339
hereditary hemolytic, erythrocyte pyrimidine 5′-nucleotidase deficiency, 866
sickle cell, binding of β^S globin chains to stroma, 805

Anergy
Wiskott-Aldrich syndrome, chemotactic lymphokine synthesis, mononuclear leukocyte chemotaxis, 486

Angina pectoris
increased exercise threshold after physical conditioning, 763
normal coronary arteriograms, hemoglobin affinity for oxygen, 409

Angiotensin II
effect of sodium chloride on adrenal and renal vascular responses to, 34
renin, catecholamines, and prostaglandin E, role in hemorrhagic shock, pharmacologic antagonists, 842

Antibody(ies)
anti-glomerular basement membrane, application of radioimmunoassay in human nephropathies, 128
cold-reactive antilymphocyte, rheumatoid arthritis and systemic lupus erythematosus, 1082
human albumin, cirrhotic sera, 122
human parathyroid hormone glandular extract and synthetic amino-terminal fragments, immunological characterization, 1382
IgM, and complement, interaction in immune clearance of erythrocytes, human, 339
kallikrein, human plasma, 1444
response to streptococcal group A carbohydrate, qualitative differences, human, 990

Antigen(s)
glomerular basement membrane, collagen, and actomyosin, immunohistopathology in kidney diseases, 1144
hepatitis B, circulating immune complexes, radiolabeled C1q binding assay, 297
histocompatibility HL-A8, dermatitis herpetiformis, association with jejunal IgA synthesis, 98
human acute leukemia, specificity of heteroantisera, 1273
stimulation of leukocytes, prostaglandin release, 378
streptococcal, cellular reactivity to, rheumatic fever, 439

Apolipoprotein A-I
radioimmunoassay of plasma levels, structure of human high-density lipoprotein, 236

Arginine
and glucose, effects on glucagon and insulin release from pancreas, 833

Arteriography
coronary, bradycardia during, Bezold-Jarisch reflex, 1455

Artery
atherosclerotic, human, cholesterol turnover, 366

Asthma
increased ATPase in leukocytes, 138

Atherosclerosis
arterial cholesterol turnover, 366

ATP
increase in leukocytes, asthma, 138

Autoregulation
effect of hemorrhage on regional blood flow distribution, dogs and baboons, 225

B

Bacteria
infection, *Pseudomonas aeruginosa*, increased lung vascular permeability, sheep, 792
intracisternal, inhibition of penicillin transport from cerebrospinal fluid, 316

Bezold-Jarisch reflex
bradycardia during coronary arteriography, 1455
Bicarbonate
absorption, renal, effects of calcium, parathyroid hormone, and volume expansion, 1287
reabsorption in kidney, effects of glucose, 1
Bile
secretion, canalicular, clearance of [^{14}C]mannitol, human, 773
Bile acid
kinetics, relation to sex, serum lipids, body weight, and gallbladder disease, in hyperlipoproteinemia, 1301
Bilirubin
and drugs, competitive binding to human serum albumin, 1353
Blood
human, measurement of fibrinopeptide A, 43
Blood flow
myocardial distribution, during ischemia-induced coronary vasodilation, 1462
peripheral, effect of morphine, 1247
regional distribution, effects of hemorrhage, dogs and baboons, 225
Blood pressure
and renin release, effects of β-adrenergic antagonists, 1413
Bone
magnesium pools, effect of age and magnesium depletion, 1074
Bradycardia
during coronary arteriography, Bezold-Jarisch reflex, 1455
Brain
electrolyte transport, direct effect of insulin, hypoglycemic seizures and coma, 654
Bronchoalveolar cells
plaque-forming response of canine lymphoid tissue to sheep erythrocytes after intrapulmonary or intravenous immunization, 263
Brush border
and cytosol, small intestine, effect of dietary protein on peptide hydrolases, 890
Burn
patients, in vitro leukocyte chemotaxis, 1001

C

Calcitonin
and parathyroid hormone secretion, medullary thyroid carcinoma, 416
Calcium
absorption and secretion, jejunal, chronic renal disease on hemodialysis, 358
acute and chronic administration, effects on plasma renin, 1279
effect on inotropic actions of hyperosmotic agents, norepinephrine, paired electrical stimulation, and treppe, 957
effect on renal bicarbonate absorption, 1287
inhibition of vasopressin-dependent cyclic AMP and urinary concentrating ability, 1049
magnesium, and phosphorus metabolism, role of parathyroid hormone, newborn infant, 287
metabolism and parathyroid function, diagnostic criteria for hypercalciuria, 387
and sodium-dependent intestinal phosphatase, effect of parathyroid hormone, 710
transport in intestinal mucosa, role of sodium and parathyroid hormone, 702
urinary clearance, effect of chlorothiazide, 628
Canalicular
bile secretion, clearance of [^{14}C]mannitol, human, 773
Cancer
orosomucoid content of pleural and peritoneal effusions, 147
primary and ectopic hyperparathyroidism, immunoreactive forms of circulating parathyroid hormone, 175
Candida albicans
septicemia in man, identification by gas-liquid chromatography, 1235
Capillary
damage, coronary occlusion and "no-reflow" phenomenon, 1496
flux of free and protein-bound thyroxine, thyroxine-binding proteins, and albumin, 156
Carbohydrate
metabolism, plasma catecholamines, acute myocardial infarction, 278
streptococcal group A, qualitative differences of human antibody response, 990
Carbon monoxide
and inert gases, passive absorption in small intestine, influence of counter-current exchange, 1259
Carcinoma
medullary thyroid, secretion of parathyroid hormone and calcitonin, 416
Cardiology
arterial oxygen flow, binding, and utilization after myocardial infarction, 501
autonomic regulation of heart rate in isometric exercise, 104
bradycardia during coronary arteriography, Bezold-Jarisch reflex, 1455
contractile function, hypertrophied myocardium after pulmonary artery constriction, 1266
coronary reperfusion in primates, serial electrocardiographic and histologic study, 1420
effect of catecholamines, exercise, and nitroglycerin on ischemic myocardium, 563
effect of morphine on peripheral capacitance and resistance vessels, human, 1247
hemoglobin affinity for oxygen, angina pectoris with normal coronary arteriograms, 409
increased exercise threshold for angina pectoris after conditioning, 763
myocardial blood flow distribution during ischemia-induced coronary vasodilation, 1462
myocardial function and lipid metabolism in chronic alcoholic, 740
plasma catecholamines and carbohydrate metabolism, acute myocardial infarction, 278
role of central nervous system in coronary vasoconstriction by digitalis, 1365
role of local factors in elevated venous tone, congestive heart failure, 219
Catecholamine(s)
and carbohydrate metabolism, acute myocardial infarction, 278
effect on ischemic myocardium, 563
excretion and adrenergic activity, effects of sodium, 194
and glucose control of glucagon secretion, perfused pancreas, 1403
plasma renin, angiotensin II, and prostaglandin E, role in hemorrhagic shock, pharmacologic antagonists, 842
Cerebrospinal fluid
penicillin transport, inhibition by intracisternal bacteria, 316
pneumococcal meningitis, increased lactic acid, 18
Chemotaxis
leukocyte, in vitro, thermally injured patients, 1001
monocyte, effect of corticosteroids, 1337
mononuclear leukocyte, lymphokine synthesis, Wiskott-Aldrich syndrome, 486
Chemotherapy
acute leukemia, serial studies of immunocompetence, 401
Chloride
depletion, effect of adrenalectomy on renal response to, 1329
Chloroquine
high affinity accumulation, erythrocytes in malaria, 24
Chlorothiazide
and hypocalciuria, 628

Cholesterol
turnover, human atherosclerotic arteries, 366
Choline
incorporation into phospholipids during initiation of renal compensatory growth, 91
Chondrocytes
human, sulfate metabolism in cultures, 1056
Choroid plexus
penicillin transport from cerebrospinal fluid, inhibition by intracisternal bacteria, 316
Chromatography
gas-liquid, identification of *Candida albicans* septicemia in man, 1235
Circulation
effect of pneumococcal meningitis, in rabbit, 18
peripheral, elevated venous tone of congestive heart failure, 219
Cirrhosis
Laennec's, antibodies to human albumin in sera, 122
Coagulation
measurement of fibrinopeptide A in human blood, 43
platelet stimulation of leukocyte procoagulant activity, 1437
Cobamides
and bound intrinsic factor, kinetics of attachment to ileal receptor, 593
Coccidioidomycosis
pulmonary, immunotherapy, 690
Colchicine
and vincristine, effects on vasopressin activity, role of kidney microtubules, 252
Collagen
antigen in kidney diseases, 1144
quaternary structure, role in platelet:collagen interaction, 1480
synthesis, scleroderma skin fibroblasts, 880
Coma
and seizures, hypoglycemia, direct effect of insulin on brain electrolyte transport, 654
Complement
C1q, radiolabeled binding assay for circulating immune complexes, systemic lupus erythematosus, and hepatitis B antigen, 297
and IgM antibody, interaction in immune clearance of erythrocytes, human, 339
serum levels during malarial paroxysms, 451
Compliance
lung, relation of frequency dependence to gas distribution, 1220
Conditioning
physical, increased exercise threshold for angina pectoris, 763
Connective tissue
lung elastin composition, newborn infants with respiratory distress syndrome, 213
Contraceptives
oral, elevation of plasma neurophysin, 209
Contraction
hypertrophied myocardium after pulmonary artery constriction, 1266
Contrast medium
depression of sinus node function, bradycardia during coronary arteriography, 1455
Coronary
arteriography, bradycardia during, Bezold-Jarisch reflex, 1455
occlusion, "no-reflow" phenomenon, 1496
reperfusion, in primates, serial electrocardiographic and histologic study, 1420
vasoconstriction effect of digoxin, role of central nervous system, 1365
vasodilation, myocardial blood flow distribution, 1462
Coronary heart disease
increased exercise threshold for angina pectoris after conditioning, 763
Corticosteroids
effect in vitro on human monocyte function, 1337
Cyproheptadine
suppression of human growth hormone secretion, 116
Cysteine
activation in cultured cystinotic cells, specific activity and Michaelis-Menten constants for cysteinyl-tRNA synthetase, 182
Cystinosis
cysteine activation in cultured cells, specific activity and Michaelis-Menten constants for cysteinyl-tRNA synthetase, 182
Cytosol
and brush border, small intestine, effect of dietary protein on peptide hydrolases, 890
Cytotoxicity
heteroantisera, specificity of, to human acute leukemia antigens, 1273

D

Dead space
physiological, distributions of ventilation-perfusion ratios, 54
Dehydration
osmotic, pulmonary, 935
Denaturation
hemoglobin, and Heinz body formation, unstable hemoglobins, 678
Dermatitis herpetiformis
jejunal IgA synthesis, association with histocompatibility antigen HL-A8, 98
Diabetes
alloxan, effects of glucose on renal bicarbonate reabsorption, 1
decreased insulin binding to lymphocytes, 1323
effect of somatostatin on insulin and glucagon secretion, 1395
insipidus, nephrogenic, cellular action of antidiuretic hormone, 753
streptozotocin, effect of diet and insulin deficiency on hypertriglyceridemia, 1167
streptozotocin, reduction of pancreatic islet nicotinamide adenine dinucleotide, 672
uncontrolled, relationship of hepatic autophagy to insulin and glucagon, 188
Diamino acids
renal reabsorption in lysinuric protein intolerance, 9
Diet
and insulin deficiency, effect on hypertriglyceridemia, diabetes streptozotocin, 1167
Diffusion
barriers, passive uptake, intestinal mucosa, dimensions and permeability characteristics, 718
Digoxin
coronary vasoconstriction, role of central nervous system, 1365
Diplococcus pneumoniae
meningitis in rabbit, effect on respiration and circulation, 18
Diuretic
chlorothiazide, and hypocalciuria, 628
Dopamine
excretion and adrenergic activity, effects of sodium, 194
Drugs
and bilirubin, competitive binding to human serum albumin, 1353

E

Edema
role in elevated venous tone, congestive heart failure, 219
Elastin
composition, lung, newborn infants with respiratory distress syndrome, 213
Electrical
paired stimulation, inotropic action, effect of calcium, 957
Electrolyte
active secretion, intestinal mucosa, vasoactive intestinal peptide stimulation, 536
transport, brain, direct effect of insulin, hypoglycemia seizures and coma, 654

Ellagic acid
alteration of secondary structure of human Hageman factor, 1312
Embolism
pulmonary, resolution by heparin and streptokinase, 782
Enzyme(s)
activation of human Hageman factor, structural changes, 619
ATPase, increase in leukocytes, asthma, 138
cysteinyl-tRNA synthetase, specific activity and Michaelis-Menten constants, cysteine activation in cultured cystinotic cells, 182
heme oxygenase, mucosal cleavage of hemoglobin heme, intestinal absorption of iron, 1344
lipase, protamine-resistant and -inactivated, activities in post-heparin plasma in hyperlipoproteinemia, 1107
peptide hydrolases, small intestinal brush border and cytosol, effect of dietary protein, 890
pyrimidine 5′-nucleotidase deficiency in erythrocytes, hereditary hemolytic anemia, 866
sodium and calcium-dependent phosphatase, intestinal effect of parathyroid hormone, 710
sulfamidase deficiency in cultured skin fibroblasts and liver, Sanfilippo A syndrome, 907
superoxide dismutases, two, human polymorphonuclear leukocytes, 1005
Epinephrine
effect on random migration of platelets, 1100
Erythrocyte(s)
binding of β^S globin chains to stroma, sickle cell anemia, 805
immune clearance, interaction of IgM antibody and complement, human, 339
malaria-infected, high-affinity accumulation of chloroquine, 24
pyrimidine 5′-nucleotidase deficiency, hereditary hemolytic anemia, 866
Erythropoiesis
regulation of, in grey collie dog, 965
Erythropoietin
levels in grey collie dog, regulation of hematopoiesis, 965
Esophagus
lower sphincter, control by vagus nerve, 899
Estrogen
elevation of plasma neurophysin, 209
Ethanol
chronic, effect on myocardial function and lipid metabolism, 740
Exchange
counter-current, influence on passive absorption of inert gases and carbon monoxide, small intestine, 1259
Exercise
effect on ischemic myocardium, 563
increased threshold for angina pectoris after conditioning, 763
isometric, autonomic mechanisms in hemodynamic responses, 104

F

Factor
Hageman, human, structural changes with enzymatic activation, 619
intrinsic, and bound cobamides, kinetics of attachment to ileal receptor, 593
intrinsic, and bound vitamin B_{12}, solubilized receptor from intestinal mucosa, 733
migration inhibitory, lower respiratory tract cell-mediated immunity after bacterial infection, 1125
transfer, immunologic specificity of, 997
transfer, immunotherapy in coccidioidomycosis, 690
Factor VIII
recombination, plasma binding of active fragment, human hemophilia and von Willebrand's disease, 1093
Factor XII
human Hageman factor, alteration of secondary structure by activating agents, 1312
Fasting
prolonged, in obesity, effect of keto-analogues of essential amino acids, 974
Fatty acids
free, glucose, and glycerol, oxidative metabolism, hyperlipemia, 461
transport, role of fatty acid-binding protein, small intestine, 326
Fetal
hemoglobin, hereditary persistence, balanced globin chain synthesis, 433
Fibrinopeptide A
measurement in human blood, 43
Fibroblasts
scleroderma skin, collagen synthesis, 880
Filtration
glomerular, effect of mannitol, 1135
Flow rate
distal tubular fluid, relation to potassium transport, 1488

G

Gallbladder disease
correlation with bile acid kinetics, hyperlipoproteinemia, 1301
Gas
distribution, relation to frequency dependence of lung compliance, 1120
inert, and carbon monoxide, passive absorption in small intestine, influence of counter-current exchange, 1259
Gastrin
human "big," immunology and acid-stimulating action in dogs, 477
Gastroduodenal
junction, inhibitory innervation, 529
Gestation
human, measurement of pregnancy-associated plasma proteins, 576
Globin
β^S, binding to stroma, sickle cell anemia, 805
chain synthesis, hereditary persistence of fetal hemoglobin, 433
synthesis in hemoglobin Leiden, excess α-chains, 948
Glomerulonephritis
radioimmunoassay for anti-glomerular basement membrane antibody, 128
Glomerulus
permeability, normal and nephrotic patients, 1190
ultrafiltration, effect of mannitol, 1135
Glucagon
and insulin, relationship to hepatic autophagy in uncontrolled diabetes, 188
and insulin release from pancreas, amino acid-induced, effect of glucose, 819
and insulin release from pancreas, effects of arginine and glucose, 833
and insulin secretion, diabetes, effect of somatostatin, 1395
response to starvation and hypoglycemia, effect of adrenergic blockade, 1214
secretion, perfused pancreas, glucose and catecholamine control, 981
Gluconeogenesis
and ketogenesis, hepatic, human, 981
Glucose
and arginine, effects on glucagon and insulin release from pancreas, 833
and catecholamine control of glucagon secretion, perfused pancreas, 1403
effects on bicarbonate reabsorption in kidney, 1
free fatty acids, and glycerol, oxidative metabolism, hyperlipemia, 461
modulation of amino acid-induced glucagon and insulin release in pancreas, 819
Glutamine
transport in kidney mitochondria in metabolic acidosis, 165
Gluten-sensitive enteropathy
relation to dermatitis herpetiformis,

jejunal IgA synthesis and histocompatibility antigen HL-A8, 98
Glycerol
free fatty acids, and glucose, oxidative metabolism, hyperlipemia, 461
Glycoproteins
circulating desialylated, correlation with hepatocellular damage, 555
orosomucoid content of pleural and peritoneal effusions, neoplastic disease, 147
synthesis and secretion, mucosal biopsies of rabbit colon and human rectum, 545
Gonadotropin
chorionic, thyroid-stimulating activity, 494
Granulocyte
adhesion, effect of cyclic AMP, 1241
transfusion therapy, *Pseudomonas* pneumonia, 664
Granulomatous disease
chronic, effects of phorbol myristate acetate on metabolism and ultrastructure of neutrophils, 83
Grey collie syndrome
regulation of erythropoiesis, 965
Growth
renal compensatory, phospholipid metabolism during initiation of, 91
Growth hormone
"big," human plasma and pituitary, 1064
human, suppression of secretion by melatonin and cyproheptadine, 116

H

Hageman factor
human, secondary structure, alteration by activating agents, 1312
human, structural changes with enzymatic activation, 619
Heart failure
congestive, role of local factors in elevated venous tone, 219
Heinz body
formation and hemoglobin denaturation, unstable hemoglobin, 678
Hematology
alteration of secondary structure of human Hageman factor by activating agents, 1312
balanced globin chain synthesis, hereditary persistence of fetal hemoglobin, 433
cholesterol turnover in human atherosclerotic arteries, 366
effect of corticosteroids on human monocyte function, 1337
effect of cyclic AMP on granulocyte adhesion, 1241
excess α-globin synthesis in hemoglobin Leiden, 948
factor VIII recombination, plasma binding of active fragment, human hemophilia and von Willebrand's disease, 1093
hereditary hemolytic anemia, erythrocyte pyrimidine 5′-nucleotidase deficiency, 866
lipid peroxidation by human blood phagocytes, 638
measurement of fibrinopeptide A in human blood, 43
platelet stimulation of leukocyte procoagulant activity, 1437
random migration, human platelets, 1100
regulation of erythropoiesis, grey collie dog, 965
role of platelet membrane phospholipids in platelet release reaction, 1032
sickle cell anemia, binding of β^S globin chains to stroma, 805
structural changes with enzymatic activation of human Hageman factor, 619
Heme oxygenase
mucosal cleavage of hemoglobin heme, intestinal absorption of iron, 1344
Hemocyanin
and tuberculin, immunologic specificity of transfer factor, 997
Hemodialysis
chronic renal disease, jejunal absorption and secretion of calcium, 358
Hemodynamics
autonomic mechanisms in isometric exercise, 104
coronary reperfusion in primates, serial electrocardiographic and histologic study, 1420
effect of hemorrhage on regional blood flow distribution, dogs and baboons, 225
effect of thoracic inferior vena cava constriction on renal water excretion, 1473
myocardial blood flow distribution during ischemia-induced coronary vasodilation, 1462
role of local factors in elevated venous tone, congestive heart failure, 219
Hemoglobin
affinity for oxygen, angina pectoris with normal coronary arteriograms, 409
fetal, hereditary persistence, balanced globin chain synthesis, 433
iron, intestinal absorption, heme cleavage by mucosal heme oxygenase, 1344
Hemoglobin A
hemoglobin denaturation and Heinz body formation, 678
Hemoglobin Christchurch
hemoglobin denaturation and Heinz body formation, 678
Hemoglobin Köln
hemoglobin denaturation and Heinz body formation, 678
Hemoglobin Leiden
excess α-globin synthesis, 948
Hemoglobin Sydney
hemoglobin denaturation and Heinz body formation, 678
Hemophilia
human, factor VIII recombination, plasma binding of active fragment, 1093
Hemorrhage
effect on regional blood flow distribution, dogs and baboons, 225
role of plasma renin, angiotensin II, catecholamines, and prostaglandin E, pharmacologic manipulation in shock, 842
Heparan sulfate
degradation in Sanfilippo A disease, deficiency of sulfamidase, 907
Heparin
effect on measurement of two lipase activities, hyperlipoproteinemia, 1107
and streptokinase, resolution of pulmonary emboli, 782
Hepatitis
B antigen, circulating immune complexes, radiolabeled C1q binding assay, 297
Heteroantisera
specificity of, human acute leukemia antigens, 1273
Histamine
effect on cyclic AMP in granulocyte adhesion, 1241
Hormone(s)
adrenocortical, role in renal response to chloride depletion, 1329
antidiuretic, cellular action in nephrogenic diabetes insipidus, 753
estrogen elevation of plasma neurophysin, 209
free and protein-bound thyroxine, T_4-binding proteins, and albumin, transcapillary movement, 156
glucagon response to starvation and hypoglycemia, effect of adrenergic blockade, 1214
glucagon secretion, perfused pancreas, glucose and catecholamine control, 1214
growth, "big," human plasma and pituitary, 1064
human growth, suppression of secretion by melatonin and cyproheptadine, 116
insulin, decreased binding to lymphocytes, diabetes, 1323

insulin deficiency and diet, effect on hypertriglyceridemia, diabetes streptozotocin, 1167
insulin, direct effect on brain electrolyte transport, seizures and coma in hypoglycemia, 654
insulin and glucagon, effects of arginine and glucose on pancreatic release, 833
insulin and glucagon, glucose modulation of amino acid-induced pancreatic release, 819
insulin and glucagon secretion, diabetes, effect of somatostatin, 1395
insulin receptors, liver plasma membrane, interactions of proinsulin, 1020
insulin secretion, inhibition by prostaglandin E_1, 310
insulin secretogogues, phosphate release during early islet stimulation, 1179
luteinizing, and testosterone, human puberty, simultaneous secretion during sleep, 609
parathyroid, antibodies to human glandular extract and synthetic amino-terminal fragments, immunological characterization, 1382
parathyroid, and calcitonin secretion, medullary thyroid carcinoma, 416
parathyroid, and calcium metabolism, diagnostic criteria for hypercalciuria, 387
parathyroid, effect on proximal renal tubule phosphate reabsorption, 1040
parathyroid, effect on renal bicarbonate absorption, 1287
parathyroid, immunoreactive forms, primary and ectopic hyperparathyroidism, 175
parathyroid, role in calcium, magnesium, and phosphorus metabolism, newborn infant, 287
parathyroid, and sodium, role in calcium transport, intestinal mucosa, 702
parathyroid, stimulation of intestinal sodium and calcium-dependent phosphatase, 710
steroid, effects on human polymorphonuclear leukocyte lysosomes, 919
thyroid deficiency, effect on water excretion, 926
thyroid, in vitro solubilized nuclear receptors, 853
thyroid-stimulating activity, chorionic gonadotropin, 494
thyrotropin-releasing, hyperresponse to small decreases of serum thyroid hormones, 913
3,3′,5′-triiodothyronine (reverse T_3), radioimmunoassay, 583
triiodothyronine and thyroxine in hyperthyroidism, acute effects of antithyroid agents, 201
vasopressin, and cyclic AMP, role in urinary concentrating defect, hypercalcemia, 1049
vasopressin, effects of colchicine and vinblastine, role of kidney microtubules, 252

Human
hemophilia and von Willebrand's disease, factor VIII recombination, plasma binding of active fragment, 1093
placenta, characterization of immunoglobulins on trophoblastic basement membranes, 1011

Hydrocortisone
effect on increased ATPase in leukocytes in asthma, 138

α-Hydroxyisovaleric acid
replacement for valine, 271

Hydroxyprolinemia
high urinary excretion of pyrrole-2-carboxylate, 810

5-Hydroxytryptamine
platelets, storage pool disease and albinism, 421

Hypercalcemia
urinary concentrating defect, role of cyclic AMP, 1049

Hypercalciuria
parathyroid function and calcium metabolism, diagnostic criteria, 387

Hyperlipemia
oxidative metabolism of free fatty acids, glucose, and glycerol, 461

Hyperlipoproteinemia
bile acid kinetics, relation to sex, serum lipids, body weight, and gallbladder disease, 1301
measurement of two lipase activities in postheparin plasma, 1107

Hyperparathyroidism
immunological characterization of antibodies to parathyroid hormone glandular extract and amino-terminal fragments, 1382
primary and ectopic, immunoreactive forms of circulating parathyroid hormone, 175

Hypersensitivity
delayed, serial studies of immunocompetence, acute leukemia, 401

Hyperthyroidism
acute effects of antithyroid agents on triiodothyronine and thyroxine, 201

Hypertriglyceridemia
streptozotocin diabetes, effect of diet and insulin deficiency, 1167

Hypoglycemia
effect of adrenergic blockade on glucagon response to, 1214
mechanism of seizures and coma, direct effect of insulin on brain electrolyte transport, 654

Hypolipoproteinemia
plasma apolipoprotein A-I, structure of human high density lipoprotein, 236

I

IgA
immunoglobulins, human, differential susceptibility to streptococcal IgA protease, 1295

Immune complexes
circulating, radiolabeled C1q binding assay, systemic lupus erythematosus and hepatitis B antigen, 297

Immunity
cell-mediated, after bacterial infection of lower respiratory tract, 1125

Immunocompetence
serial studies in acute leukemia, 401

Immunoglobulins
human IgA, differential susceptibility to streptococcal IgA protease, 1295
trophoblastic basement membranes, human placenta, 1011

Immunohistopathology
glomerular basement membrane, collagen, and actomyosin antigens, kidney diseases, 1144

Immunology
acute immunologic pulmonary alveolitis, 349
antibodies to human albumin, cirrhotic sera, 122
antibodies to human parathyroid hormone glandular extract and synthetic amino-terminal fragments, immunological characterization, 1382
cellular reactivity to streptococcal antigens, rheumatic fever, 439
cold-reactive antilymphocyte antibodies, rheumatoid arthritis and systemic lupus erythematosus, 1082
dermatitis herpetiformis, jejunal IgA synthesis, association with histocompatibility antigen HL-A8, 98
human "big gastrin," acid-stimulating action in dogs, 477
human plasma kallikrein, 1444
interaction of IgM antibody and complement in immune clearance of erythrocytes, human, 339
lower respiratory tract, plaque-forming response of canine lymphoid tissue to sheep erythrocytes after intrapulmonary or intravenous immunization, 263
parathyroid hormone forms in pri-

mary and ectopic hyperparathyroidism, 175
qualitative differences of human antibody response to streptococcal group A carbohydrate, 990
radioimmunoassay for anti-glomerular basement membrane antibody, application in human nephropathies, 128
specificity of heteroantisera to human acute leukemia antigens, 1273
specificity of transfer factor, 997
Immunotherapy
coccidioidomycosis, 690
Indomethacin
prevention of renal dilatation in hemorrhage, dogs and baboons, 225
Infarction
myocardial, acute, plasma catecholamines and carbohydrate metabolism, 278
myocardial, effect on arterial oxygen flow, binding, and utilization, 501
Infection
bacterial, lung, role of pulmonary alveolar macrophage, 519
bacterial, phagocytosis and elevated nitroblue tetrazolium reaction, polymorphonuclear leukocytes, 1227
Candida albicans, in man, identification by gas-liquid chromatography, 1235
and leukocyte chemotaxis, thermally injured patients, 1001
Listeria monocytogenes or *Diplococcus pneumoniae*, lower respiratory tract cell-mediated immunity, 1125
malaria, high-affinity accumulation of chloroquine by erythrocytes, 24
malaria, serum complement levels during paroxysms, 451
Pseudomonas aeruginosa, increased lung vascular permeability, sheep, 792
Pseudomonas pneumonia, granulocyte transfusion therapy, 664
streptococcal, cellular reactivity, rheumatic fever, 439
streptococcal, qualitative differences of human antibody response to group A carbohydrates, 990
Inotropism
hyperosmotic agents, norepinephrine, paired electrical stimulation, and treppe, effect of calcium, 957
Insulin
decreased binding to lymphocytes, diabetes, 1323
deficiency and diet, effect on hypertriglyceridemia, diabetes streptozotocin, 1167
direct effect on brain electrolyte transport, seizures and coma in hypoglycemia, 654
and glucagon, relationship to hepatic autophagy in uncontrolled diabetes, 188
and glucagon release from pancreas, amino acid-induced, effect of glucose, 819
and glucagon release from pancreas, effects of arginine and glucose, 833
and glucagon secretion, diabetes, effect of somatostatin, 1395
receptors, liver plasma membrane, interactions of proinsulin, 1020
secretion, inhibition by prostaglandin E_1, 310
secretogogues, phosphate release during early islet stimulation, 1179
Intestine
absorption of hemoglobin iron, heme cleavage by mucosal heme oxygenase, 1344
dimensions and permeability characteristics of diffusion barriers to passive mucosal uptake, 718
mucosa, effect of sodium and parathyroid hormone on calcium transport, 702
protein binding by specific receptors, relation to protein transport, 1155
rabbit colon and human rectum, glycoprotein synthesis and secretion by mucosal biopsies, 545
small, brush border and cytosol peptide hydrolases, effect of dietary protein, 890
small, calcium absorption and secretion, chronic renal disease on hemodialysis, 358
small, fatty acid-binding protein, 326
small, influence of counter-current exchange on passive absorption of inert gases and carbon monoxide, 1259
small, jejunal IgA synthesis, dermatitis herpetiformis, 98
small, mucosa, solubilized receptor for intrinsic factor-vitamin B_{12} complex, 733
small, mucosa, vasoactive intestinal peptide stimulation of adenylate cyclase and active electrolyte secretion, 536
small, receptors for intrinsic factor-bound cobamides, kinetics of attachment, 593
sodium and calcium-dependent phosphatase, effect of parathyroid hormone, 710
Intrinsic factor
and bound cobamides, kinetics of attachment to ileal receptor, 593
and vitamin B_{12} complex, solubilized receptor from intestinal mucosa, 733
Iodine
effect on response of thyrotropin-releasing hormone to small decreases of serum thyroid hormones, 913
Iron
hemoglobin, intestinal absorption, heme cleavage by mucosal heme oxygenase, 1344
Ischemia
myocardial, effects of catecholamines, exercise, and nitroglycerin, 563
myocardial, "no-reflow" phenomenon, 1496

J

Junction
gastroduodenal, inhibitory innervation, 529
Juxtaglomerular apparatus
superficial and deep, renin activity, effect of surgery and sodium chloride intake, 1373

K

Kallikrein
human plasma, immunology of, 1444
Ketoacids
analogues of essential amino acids, effect in prolonged fasting in obesity, 974
Ketogenesis
and gluconeogenesis, hepatic, human, 981
α-Ketoisovaleric acid
replacement for valine, 271
Kidney
and adrenal vascular responses to angiotensin II, effect of sodium chloride, 34
bicarbonate absorption, effects of calcium, parathyroid hormone, and volume expansion, 1287
calcium absorption and secretion, jejunal, chronic renal disease on hemodialysis, 358
dependence of saline-induced natriuresis on extracellular fluid volume expansion, 1428
distal tubular fluid flow rate and potassium transport, 1488
effect of adrenalectomy on renal response to chloride deprivation, 1329
effect of glucose on bicarbonate reabsorption, 1
effect of mannitol on glomerular ultrafiltration, 1135
glomerular basement membrane, collagen, and actomyosin antigens, immunohistopathology in renal diseases, 1144
microtubules, effects of colchicine and vinblastine on cellular action of vasopressin, 252
mitochondria, glutamine transport in metabolic acidosis, 165

normal glomerular permeability, effect of nephrosis, 1190
phosphate reabsorption, proximal renal tubule, effect of parathyroid hormone, 1040
phospholipid metabolism during initiation of renal compensatory growth, 91
pressure control of sodium reabsorption and intercellular backflux across proximal tubule, 69
radioimmunoassay for anti-glomerular basement membrane antibody, application in human nephropathies, 128
reabsorption of diamino acids in lysinuric protein intolerance, 9
renin release, effects of acute and chronic calcium administration, 1279
role of cyclic AMP in urinary concentrating defect, hypercalcemia, 1049
salicylate pharmacokinetics in anephrics, 1221
superficial and deep juxtaglomerular apparatus renin activity, effect of surgery and sodium chloride intake, 1373
water excretion, effect of thoracic inferior vena cava constriction, 1473
water excretion, effect of thyroid deficiency, 926

L

Lactic acid
increase in cerebrospinal fluid, pneumococcal meningitis, 18
Leukemia
acute, serial studies of immunocompetence, 401
human acute myelogenous and lymphoblastic, specificity of heteroantisera to antigens, 1273
Leukocyte(s)
asthma, increased ATPase, 138
chemotaxis in vitro, thermally injured patients, 1001
human polymorphonuclear, effects of steroid hormones on lysosomes, 919
human polymorphonuclear, two superoxide dismutases, 1005
mitogen- and antigen-stimulated, prostaglandin release, 378
mononuclear chemotaxis, lymphokine synthesis, Wiskott-Aldrich syndrome, 486
polymorphonuclear, bacterial infection or polycythemia vera, phagocytosis and elevated nitroblue tetrazolium reaction, 1227
procoagulant activity, stimulation by platelets, 1437
Leukopenia
Pseudomonas pneumonia, granulocyte transfusion therapy, 664
Lipase
protamine-resistant and -inactivated, activities in post-heparin plasma in hyperlipoproteinemia, 1107
Lipid
metabolism and myocardial function in chronic alcoholic, 740
peroxidation by human blood phagocytes, 638
platelet membrane, role in release reaction, 1032
serum, correlation with bile acid kinetics, hyperlipoproteinemia, 1301
Lipoprotein
human high-density, structure of, plasma levels of apolipoprotein A-I, 236
lipase and hepatic lipase, measurement of activities in post-heparin plasma, 1107
Liver
correlation of hepatocellular disease with circulating desialylated glycoproteins, 555
ketogenesis and gluconeogenesis, human, 981
plasma membrane insulin receptors, interactions of proinsulin, 1020
Liver disease
Laennec's cirrhosis, antibodies to human albumin in sera, 122
Lung
acute immunologic pulmonary alveolitis, 349
bacterial infection, role of pulmonary alveolar macrophage, 519
compliance frequency dependence, relation to gas distribution, 1220
elastin composition, newborn infants with respiratory distress syndrome, 213
osmotic extraction of hypotonic fluid, 935
pinocytosis by human alveolar macrophages, effect of cigarette smoking, 247
vascular permeability increase due to *Pseudomonas aeruginosa*, 792
Lupus erythematosus
systemic, circulating immune complexes, radiolabeled C1q binding assay, 297
systemic, cold-reactive antilymphocyte antibodies, 1082
Luteinizing hormone
and testosterone, human puberty, simultaneous secretion during sleep, 609
Lymphocytes
diabetes, decreased insulin binding, 1323
rheumatoid arthritis and systemic lupus erythematosus, cold-reactive antilymphocyte antibodies, 1082
Lymphokine
synthesis, mononuclear leukocyte chemotaxis, Wiskott-Aldrich syndrome, 486
Lysinuric protein intolerance
renal reabsorption of diamino acids, 9
Lysosomes
hepatic, uncontrolled diabetes, effect of insulin and glucagon, 188
human polymorphonuclear leukocyte, effects of steroid hormones, 919

M

Macrophages
human alveolar, effect of cigarette smoking on pinocytosis, 247
pulmonary alveolar, defender against bacterial lung infection, 519
Magnesium
calcium, and phosphorus metabolism, role of parathyroid hormone, newborn infant, 287
depletion and age, effect on bone magnesium pools, 1074
Malaria
high-affinity accumulation of chloroquine by erythrocytes, 24
paroxysms and serum complement levels, 451
Mannitol
clearance, canalicular bile secretion, human, 773
effect on glomerular ultrafiltration, 1135
inotropic action, effect of calcium, 957
Melatonin
suppression of human growth hormone secretion, 116
Membrane
basement, anti-glomerular antibody, application of radioimmunoassay in human nephropathies, 128
glomerular basement, antigen in kidney diseases, 1144
and phospholipid metabolism during initiation of renal compensatory growth, 91
placenta and intestine, protein binding by specific receptors, relation to protein transport, 1155
plasma, liver, insulin receptor, interactions of proinsulin, 1020
platelet, role of phospholipids in release reaction, 1032
platelet, stimulation of leukocyte procoagulant activity, 1437
potential, ionic distribution, fast- and slow-twitch mammalian muscle, 514
trophoblastic basement, human placenta, characterization of immunoglobulins, 1011

Meningitis
inhibition of penicillin transport from cerebrospinal fluid by intracisternal bacteria, 316
pneumococcal, effect on respiration and circulation, in rabbit, 18
Metabolism
hepatic gluconeogenesis and ketogenesis, human, 981
oxidative, free fatty acids, glucose, and glycerol, hyperlipemia, 461
Methylmercaptoimidazole
acute effects on triiodothyronine and thyroxine in hyperthyroidism, 201
Microtubules
kidney, effects of colchicine and vinblastine on cellular action of vasopressin, 252
Mitochondria
kidney, glutamine transport in metabolic acidosis, 165
Mitogen
stimulation of leukocytes, prostaglandin release, 378
Monocyte
function in vitro, effect of corticosteriods, 1337
Morphine
cardiovascular effects, peripheral capacitance and resistance vessels, human, 1247
Mucosa
intestine, dimensions and permeability characteristics of diffusion barriers, 718
intestine, effect of sodium and parathyroid hormone on calcium transport, 702
rabbit colon and human rectum, organ culture, glycoprotein synthesis and secretion, 545
small intestine, solubilized receptor for intrinsic factor-vitamin B_{12} complex, 733
Muscle
mammalian, fast- and slow-twitch, resting membrane potential and ionic distribution, 514
pyloric, inhibitory neural control, 529
Myocardium
arterial oxygen flow, binding, and utilization after infarction, 501
blood flow distribution during ischemia-induced coronary vasodilation, 1462
function and lipid metabolism, effect of chronic alcohol, 740
hypertrophied, contractile function after pulmonary artery constriction, 1266
infarction, acute, plasma catecholamines and carbohydrate metabolism, 278
infarction, coronary reperfusion in primates, serial electrocardiographic and histologic study, 1420
ischemia, effects of catecholamines, exercise, and nitroglycerin, 563
ischemia, hemoglobin affinity for oxygen, angina pectoris with normal coronary arteriograms, 409
ischemia and "no-reflow" phenomenon, 1496

N

Natriuresis
saline-induced, dependence on extracellular fluid volume expansion, 1428
Neonate
parathyroid function and calcium, magnesium, and phosphorus metabolism, 287
respiratory distress syndrome, lung elastin composition, 213
Nephrolithiasis
calcium metabolism and parathyroid function, diagnostic criteria for hypercalciuria, 387
Nephrosis
glomerular permeability, 1190
Nervous system
adrenergic, and dopamine excretion, effects of sodium, 194
central, role in coronary vasoconstriction by digitalis, 1365
Neural
control, inhibitory, gastroduodenal junction, 529
control of lower esophageal sphincter, role of vagus nerve, 899
Neurophysin
plasma elevation by oral contraceptives, 209
Neutrophils
chronic granulomatous disease, effect of phorbol myristate acetate on ultrastructure and metabolism, 83
Nicotinamide adenine dinucleotide
reduction of, in pancreatic islets, streptozotocin diabetes, 672
Nitroblue tetrazolium
elevated reaction and phagocytosis, polymorphonuclear leukocytes, bacterial infection or polycythemia vera, 1227
Nitroglycerin
effect on ischemic myocardium, 563
"No-reflow"
phenomenon, coronary occlusion, 1496
Norepinephrine
excretion and adrenergic activity, effects of sodium, 194
inotropic action, effect of calcium, 957
Nucleus
rat liver and GH_1 cells, in vitro thyroid hormone binding with solubilized receptors from, 853

O

Obesity
effect of keto-analogues of essential amino acids in prolonged fasting, 974
Organ culture
mucosal biopsies of rabbit colon and human rectum, glycoprotein synthesis and secretion, 545
Orosomucoid
pleural and peritoneal effusions, neoplastic disease, 147
Osmotic
extraction of hypotonic fluid, pulmonary, 935
Osteoarthritis
sulfate metabolism in human chondrocyte cultures, 1056
Oxprenolol
effect on renin release and heart rate, 1413
Oxygen
arterial flow, binding, and utilization after myocardial infarction, 501
effect on continuous distribution of ventilation-perfusion ratios, 54
hemoglobin affinity, angina pectoris with normal coronary arteriograms, 409

P

Pancreas
effects of arginine and glucose on glucagon and insulin release, 833
glucose modulation of amino acid-induced glucagon and insulin release, 819
perfused, control of glucagon secretion by glucose and catecholamines, 1403
phosphate release during early islet stimulation by insulin secretogogues, 1179
reduction of islet nicotinamide adenine dinucleotide, 672
Pancreatic cholera syndrome
vasoactive intestinal peptide stimulation of adenylate cyclase and active electrolyte secretion in intestinal mucosa, 536
Parathyroid hormone
antibodies to human glandular extract and synthetic amino-terminal fragments, immunological characterization, 1382
and calcitonin secretion, medullary thyroid carcinoma, 416
and calcium metabolism, diagnostic criteria for hypercalciuria, 387
effect on phosphate reabsorption by proximal renal tubule, 1040
effect on renal bicarbonate absorption, 1287
immunoreactive forms, primary and

ectopic hyperparathyroidism, 175
role in calcium, magnesium, and phosphorus metabolism, newborn infant, 287
and sodium, role in calcium transport, intestinal mucosa, 702
stimulation of intestinal sodium and calcium-dependent phosphatase, 710
Paroxysm
malarial, and serum complement levels, 451
Penicillin
transport from cerebrospinal fluid, inhibition by intracisternal bacteria, 316
Peptide
vasoactive intestinal, stimulation of adenylate cyclase and active electrolyte secretion in intestinal mucosa, 536
Peritoneal
effusions, neoplastic, orosomucoid content, 147
Permeability
and dimensions of diffusion barriers to passive intestinal mucosal uptake, 718
glomerular, normal and nephrotic patients, 1190
vascular, sheep lung, effect of *Pseudomonas* infection, 792
Peroxidation
lipid, by human blood phagocytes, 638
Phagocytosis
auto-, hepatic, relationship to insulin and glucagon, uncontrolled diabetes, 188
effects of phorbol myristate acetate on metabolism and ultrastructure of neutrophils in chronic granulomatous disease, 83
elevated histochemical nitroblue tetrazolium reaction, polymorphonuclear leukocytes, bacterial infection or polycythemia vera, 1227
human polymorphonuclear leukocytes, two superoxide dismutases, 1005
lipid peroxidation by human blood monocytes, 638
Phentolamine
effect on cardiovascular response to morphine, 1247
Phlorizin
inhibition of glucose effect on renal bicarbonate reabsorption, 1
Phorbol myristate acetate
effects on metabolism and ultrastructure of neutrophils, chronic granulomatous disease, 83
Phosphate
reabsorption, proximal renal tubule, effect of parathyroid hormone, 1049
release during early islet stimulation by insulin secretogogues, 1179
Phospholipid
metabolism during initiation of renal compensatory growth, 91
platelet membrane, role in release reaction, 1032
Phosphorus
calcium, and magnesium metabolism, role of parathyroid hormone, newborn infant, 287
Pineal gland hormone
melatonin, suppression of human growth hormone secretion, 116
Pinocytosis
human alveolar macrophages, effect of cigarette smoking, 247
Pituitary
and plasma "big" human growth hormone, 1064
posterior, neurophysin, plasma elevation by oral contraceptives, 209
Placenta
human, characterization of immunoglobulins on trophoblastic basement membranes, 1011
protein binding by specific receptors, relation to protein transport, 1155
Plaque assay
Jerne, response of canine lymphoid tissue to sheep erythrocytes after intrapulmonary or intravenous immunization, 263
Plasma
and pituitary "big" human growth hormone, 1064
Plasma flow
and interstitial pressure, renal, role in saline-induced natriuresis, 1428
Plasmodium berghei
infected erythrocytes, high-affinity accumulation of chloroquine, 24
Platelet
interaction with collagen, role of quaternary structure of collagen, 1480
membrane phospholipids, role in release reaction, 1032
random migration, 1100
serotonin, storage pool disease and albinism, 421
stimulation of leukocyte procoagulant activity, 1437
Pleural
effusions, neoplastic, orosomucoid content, 147
Pneumonia
Pseudomonas, granulocyte transfusion therapy, 664
Polycythemia vera
phagocytosis and elevated nitroblue tetrazolium reaction, polymorphonuclear leukocytes, 1227
Posture
effect on continuous distribution of ventilation-perfusion ratios, 54
Potassium
and sodium distribution, membrane potential, fast- and slow-twitch mammalian muscle, 514
transport, relation to fluid flow rate, distal tubule, 1488
Practolol
autonomic blockade of hemodynamic responses to isometric exercise, 104
Pregnancy
plasma proteins, measurement during human gestation, 576
thyroid-stimulating activity, chorionic gonadotropin, 494
Pressure
hydrostatic and osmotic, control of sodium reabsorption and intercellular backflux across kidney proximal tubule, 69
interstitial, and renal plasma flow, role in saline-induced natriuresis, 1428
Proinsulin
interactions with insulin receptors, liver plasma membrane, 1020
Propranolol
autonomic blockade of hemodynamic responses to isometric exercise, 104
effect of renin release and heart rate, 1413
Propylthiouracil
acute effects on triiodothyronine and thyroxine in hyperthyroidism, 201
Prostaglandin
effect on random migration of platelets, 1100
release, mitogen- and antigen-stimulated leukocytes, 378
role in hemorrhage effects on regional blood flow distribution, dogs and baboons, 225
Prostaglandin E
plasma renin, angiotensin II, and catecholamines, role in hemorrhagic shock, pharmacologic antagonists, 842
Prostaglandin E_1
effect on cyclic AMP in granulocyte adhesion, 1241
inhibition of insulin secretion, 310
Protease
streptococcal IgA, differential susceptibility of human IgA immunoglobulins, 1295
Protein(s)
binding by specific receptors, placenta and intestine, relation to transport, 1155
dietary, effect on small intestinal

brush▼border and cytosol peptide hydrolases, 890
fatty acid-binding, small intestine, 326
glyco-, circulating desialylated, correlation with hepatocellular damage, 555
glyco-, synthesis and secretion, mucosal biopsies of rabbit colon and human rectum, 545
plasma, pregnancy-associated, measurement during human gestation, 576
thyroxine-binding, free and protein-bound thyroxine, and albumin, transcapillary movement, 156
Pseudomonas
pneumonia, granulocyte transfusion therapy, 664
Pseudomonas aeruginosa
increased lung vascular permeability, sheep, 792
Puberty
human, simultaneous secretion of luteinizing hormone and testosterone during sleep, 609
Pulmonary
acute immunologic alveolitis, 349
alveolar macrophage, defender against bacterial lung infection, 519
coccidioidomycosis, immunotherapy, 690
compliance frequency dependence, relation to gas distribution, 1220
emboli, resolution by heparin and streptokinase, 782
osmotic extraction of hypotonic fluid, 935
pinocytosis by human alveolar macrophages, effect of cigarette smoking, 247
vascular permeability increase due to *Pseudomonas aeruginosa*, 792
Pyridine nucleotide
synthesis in pancreatic islets, reduction by streptozotocin diabetes, 672
Pyrimidine 5′-nucleotidase
deficiency in erythrocytes, hereditary hemolytic anemia, 866
Pyrrole-2-carboxylate
formation and excretion, human, 810

Q

Quaternary structure
collagen, role in collagen:platelet interaction, 1480

R

Radioimmunoassay
3α-androstanediol kinetics, human, 646
anti-glomerular basement membrane antibodies, application in human nephropathies, 128
human "big gastrin," immunology and acid-stimulating action in dogs, 477
measurement of fibrinopeptide A in human blood, 43
plasma levels of apolipoprotein A-I structure of human high density lipoprotein, 236
prostaglandin release by mitogen- and antigen-stimulated leukocytes, 378
3,3′,5′-triiodothyronine (reverse T_3), 583
Renin
activity, superficial and deep juxtaglomerular apparatus, effect of surgery and sodium chloride intake, 1373
angiotensin II, catecholamines, and prostaglandin E, role in hemorrhagic shock, pharmacologic antagonists, 842
release, effects of acute and chronic calcium administration, 1279
release, effects of β-adrenergic antagonists, 1413
Respiration
continuous distribution of ventilation-perfusion ratio, effects of posture and breathing air and 100% oxygen, 54
effect of pneumococcal meningitis, in rabbit, 18
Respiratory distress syndrome
newborn infants, lung elastin composition, 213
Respiratory tract
lower, cell-mediated immunity after bacterial infection, 1125
lower, plaque-forming response of canine lymphoid tissue to sheep erythrocytes after intrapulmonary or intravenous immunization, 263
Rheumatic fever
cellular reactivity to streptococcal antigens, 439
low affinity of serum antibody to streptococcal group A carbohydrate, 990
Rheumatoid arthritis
cold-reactive antilymphocyte antibodies, 1082

S

Salicylate
pharmacokinetics in anephrics, 1221
Salicyluric acid
formation from salicylate in anephrics, 1221
Sanfilippo A syndrome
sulfamidase deficiency in cultured skin fibroblasts and liver, 907
Scleroderma
skin fibroblasts, collagen synthesis, 880
Seizures
and coma, hypoglycemia, direct effect of insulin on brain electrolyte transport, 654
Septicemia
Candida albicans, in man, identification by gas-liquid chromatography, 1235
Serotonin
antagonist cyproheptadine, suppression of human growth hormone secretion, 116
platelets, storage pool disease and albinism, 421
release in platelet:collagen interaction, role of collagen quaternary structure, 1480
Sex
correlation with bile acid kinetics, hyperlipoproteinemia, 1301
Shock
hemorrhagic, role of plasma renin, angiotensin II, catecholamines, and prostaglandin E, 842
Shunt
intrapulmonary, and distribution of ventilation-perfusion ratios, 54
Sialic acid
removal from circulating glycoproteins, correlation with hepatocellular damage, 555
Sickle cell anemia
binding of β^S globin chains to stroma, 805
Skin
collagen synthesis by scleroderma fibroblasts, 880
Sleep
simultaneous secretion of luteinizing hormone and testosterone during, in human puberty, 609
Slit pore
epithelial, effect on glomerular permeability, 1190
Small airway disease
frequency dependence of lung compliance and gas distribution, 1220
Smoke
cigarette, effect on pinocytosis by human alveolar macrophages, 247
Sodium
and calcium-dependent intestinal phosphatase, effect of parathyroid hormone, 710
effect on dopamine excretion and adrenergic activity, 194
and parathyroid hormone, role in calcium transport, intestinal mucosa, 702
and potassium distribution, membrane potential, fast- and slow-twitch mammalian muscle, 514
reabsorption and intercellular backflux across kidney proximal tubule, 69

Sodium chloride
effect on adrenal and renal vascular responses to angiotensin II, 34
effect on superficial and deep juxtaglomerular apparatus renin activity, 1373
induction of natriuresis, dependence on extracellular fluid volume expansion, 1428
Somatostatin
effect on insulin and glucagon secretion, diabetes, 1395
Sphincter
lower esophageal, control by vagus nerve, 899
Staphylococcus aureus
lung infection, role of pulmonary alveolar macrophage, 519
Starvation
effect of adrenergic blockade on glucagon response to, 1214
Steroid(s)
3α-androstanediol kinetics, human, 646
cortico-, effect in vitro on human monocyte function, 1337
effects on human polymorphonuclear leukocyte lysosomes, 919
Storage pool disease
and albinism, platelet serotonin, 421
Streptococcus
antigens, cellular reactivity to, rheumatic fever, 439
group A carbodydrate, qualitative differences of human antibody response, 990
Streptococcus sanguis
IgA protease, differential susceptibility of human IgA immunoglobulins, 1295
Streptokinase
and heparin, resolution of pulmonary emboli, 782
Streptozotocin
diabetes, effect of diet and insulin deficiency on hypertriglyceridemia, 1167
diabetes, reduction of pancreatic islet nicotinamide adenine dinucleotide, 672
Sucrose
inotropic action, effect of calcium, 957
Sulfamidase
deficiency in cultured skin fibroblasts and liver, Sanfilippo A syndrome, 907
Sulfate
metabolism, human chondrocyte cultures, 1056
Superoxide
dismutases, human polymorphonuclear leukocytes, 1005

T

Testosterone
and luteinizing hormone, human puberty, simultaneous secretion during sleep, 609
Thrombin
and measurement of fibrinopeptide A in human blood, 43
Thyroid
deficiency and water excretion, 926
medullary carcinoma, secretion of parathyroid hormone and calcitonin, 416
stimulating activity, chorionic gonadotropin, 494
Thyroid hormone
in vitro solubilized nuclear receptors, 853
radioimmunoassay for reverse T_3, 583
Thyrotropin
thyroid-stimulating activity, chorionic gonadotropin, 494
Thyrotropin-releasing hormone
hyperresponse to small decreases of serum thyroid hormone, 913
Thyroxine
free and protein-bound, T_4-binding proteins, and albumin, transcapillary movement, 156
in vitro solubilized nuclear receptors, 853
and triiodothyronine, effect of small decreases on thyrotropin-releasing hormone, 913
and triiodothyronine in hyperthyroidism, acute effects of antithyroid agents, 201
Tissue factor
activity, leukocytes, stimulation by platelets, 1437
Transfer factor
immunologic specificity of, 997
immunotherapy in coccidioidomycosis, 690
Treppe
inotropic action, effect of calcium, 957
Triiodothyronine
in vitro solubilized nuclear receptors, 853
and thyroxine, effect of small dedecreases on thyrotropin-releasing hormone, 913
and thyroxine in hyperthyroidism, acute effects of antithyroid agents, 201
3, 3′, 5′-Triiodothyronine
reverse T_3, radioimmunoassay, 583
Tuberculin
and hemocyanin, immunological specificity of transfer factor, 997
Tubule
distal, relationship between fluid flow rate and potassium transport, 1488
proximal, phosphate reabsorption, effect of parathyroid hormone, 1040
proximal, pressure control of sodium reabsorption and intercellular backflux, 69

U

Urine
concentrating defect in hypercalcemia, role of cyclic AMP, 1049
concentration deficiency, nephrogenic, action of antidiuretic hormone, 753

V

Vagus
neural control of lower esophageal sphincter, 899
Valine
utilization of α-keto and α-hydroxy analogues, 271
Vasoconstriction
coronary, digoxin effect, role of central nervous system, 1365
Vasodilation
coronary, myocardial blood flow distribution, 1462
Vasopressin
cellular action in nephrogenic diabetes insipidus, 753
and cyclic AMP, role in urinary concentrating defect, hypercalcemia, 1049
effects of colchicine and vinblastine, role of kidney microtubules, 252
role in effect of vena cava constriction on renal water excretion, 1473
Vena cava
thoracic inferior, effect of constriction on renal water excretion, 1473
Ventilation
distribution, relation to frequency dependence of lung compliance, 1220
Ventilation-perfusion ratio
continuous distribution, effects of posture and breathing air and 100% oxygen, 54
Vincristine
and colchicine, effects on vasopressin activity, role of kidney microtubules, 252
Vitamin B_{12}
and intrinsic factor complex, attachment to ileal receptors, 598
and intrinsic factor complex, solubilized receptor from intestinal mucosa, 733
Volume expansion
extracellular, effect on renal bicarbonate absorption, 1287
extracellular fluid, role in saline-induced natriuresis, 1428
von Willebrand's disease
human, factor VIII recombination,

absence of plasma binding of active fragment, 1093

W

Water
excretion, effect of thyroid deficiency, 926
excretion, renal, effect of thoracic inferior vena cava constriction, 1473
Water layer
intestinal diffusion barrier, dimensions and permeability characteristics to passive mucosal uptake, 718
Wiskott-Aldrich syndrome
chemotactic lymphokine synthesis and mononuclear leukocyte chemotaxis, 486

X

Xenon
measurement of renal blood flow, effect of sodium chloride on response to angiotensin II, 34

Statement of Ownership, Management, and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: The Journal of Clinical Investigation produced monthly by The Rockefeller University Press at 1230 York Ave., New York 10021 for The American Society for Clinical Investigation, San Francisco, California, nonprofit corporation, authorized to mail at special rates. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 7042; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 6349. Total paid circulation, 6349; free subscriptions, 23; office use, left-over, unaccounted, spoiled, 670; net press run, 7042. Single issue nearest date October 1974. (Signed, W. A. Bayless, Director, The Rockefeller University Press.)
